TABLE OF CONTENTS

Introduction 9

Chapter 1:
We, the People are Hostages and
Global Warlords have Stolen Our Future 44

Chapter 2:America, Russia and NATO
Search for New Animosities and
Conquest of New Frontiers of Influence 54
(i)

Chapter 3: Towards Understanding
of Man and Humanity, the Earth and
the Universe Which We Live-in 65

Chapter 4:Peace and Conflict Management:
Russia-Ukraine and the West Needs a Dialogue
for a Humanitarian Strategy to End the War
not Perpetuated Animosities 116

Chapter 5: Conflict Beyond Reason:
the NATO, Russia, the EU and Ukraine
Urgently Needed New Thinking
to End the War 124

Chapter 6:Global Peace and Conflict
Resolution: Ukraine and Russia and We,
the People – Voices of the Oppressed 139

Chapter 7: How Wars and Political
Wickedness Destroy Humanity?
The Case of Palestine 150
(ii)

Chapter 8: Israel and the US Plan
to Destroy Palestine and Arab Leaders
Just Waiting for the End Game 158

Chapter 9: War on Gaza:
Are We Witnessing the End of Time
and Civilized Humanity? 166

Chapter 10: Ignorant and Arrogant Leaders
Bomb Mother Earth Again and Again 175

Chapter 11: How to be Human
in the Tyranny of a War on Humanity? 182

Chapter 12: HowArab Leaders Betrayed
the Masses? The Al-Aqsa Mosque and its
Importance in Islam - East Jerusalem - Palestine 195

Chapter 13:Is Global Peace and Security
Just a Fantasy? The Leaders Who Betrayed the
Canons of Truth, Wisdom and Humanity 207
(iii)

Chapter 14: Leaders Who Could not Lead:
Ignorance and Egoistic Leaders Destroy
Mankind and the Living Earth 218

Chapter 15: Global Peace and Security:
Unending Crusades against
the Arab-Muslim World 227

Chapter 16: The Arab Triangle:
How the Oil-fed Prosperity Bubble
Destroyed Arab's Moral and Intellectual Culture? 236

Chapter 17:The War on Gaza and How
the US and Israel Are Dehumanizing
Human Culture 252

Chapter 18: Strange Celebrations:
How the US-European Celebrate the
Strange D-Day Mocking the Reasoned History? 264
(iv)

Chapter 19:Global Thinking and Rethinking:
Emerging Rational Models to Combat
Human Ignorance and Arrogance in Global Peace,
Conflict Resolution and Sustainable Future. 274

INTRODUCTION

Wars on Humanity- Ukraine and Palestine and Global Leaders. We, the People Search for Peace, Security and Conflict Resolution

The Brotherhood of Truth is one in all ages
It is narrow men who create sects.
Let them not think that the goods of this world can shield them from evil or its consequences.
God's Truth and His Messengers can be known to all: for He in is His Mercy
Has given us faculties and judgment, if we would but use them. The message is not New: all Creation proclaims it: High above all is the Lord of Glory Supreme.

(A synoptic narrative offered by Abdullah Yousef Ali in his commentary to the Chapter 23 on "The Believers." The Quran).

Global peace, security and conflict management and diplomacy are complex disciplines of continuous change, unpredictability and adaptability to future-making and multidisciplinary framework having rational practices to analyze varied and critical facets of contemporary and emerging national, regional and international crisis situations and conflicts between states, governments, and nations for analysis, conflict management, and workable strategies to attain accords and peaceful resolution.

Given the multidisciplinary nature and scope of academic studies in global affairs, politics and international relations, foreign policy making, psychology, social science, public communication and other interactive areas, the ever fast growing global interest and participation seem to have overwhelmed the scope of the discipline to envisage broader implications beyond time and space, geopolitical and invisible information-age and technologically advanced frontiers in its pursuit for rational approaches to understand the imperatives of new, innovative and unthinkable challenges to global peace, security and conflict management. Exploring the future is a learning future that all educational programs aim at to equip the students for the infinite challenges

ahead - be it educational, intellectual and technological frontiers to imagine adaptability to the futuristic demands.

The approach ushers a new beginning and a new life to a fraught conjecture of unthinking and failures in the past and the present. With the infinite convergence of the information technologies and the new revitalized aspirations of global citizenry in peace and conflict management, the infinite varieties of space and time implications make it incumbent upon the thinking and concerned scholars to focus on developing new and creative framework of models to deal with new invisible and horizon less challenges we are set to encounter and experience in this discipline.

The 21st century and beyond approaches crystallize the breadth of global peace, security and conflict resolution, both traditional and emerging innovative strategies and how they relate to contemporary dynamic conflict environments dominated by the customary superpowers and obsolete nature of the international laws of governance. The global systems of governance of the few exhibits a spectacle of ignorance, greed and cruelty toward the interests

and aspirations of morally, spiritually and intellectually conscientious global citizenry in its quest for progress, change and security into sustainable future-making.

German poet **Bertolt Brech** shared his futuristic vision

"*To Those Born Later*":

What kind of times are they, when
A talk about trees is almost a crime
Because it implies silence about so many horrors?
That man there calmly crossing the street
Is already perhaps beyond the reach of his friends
Who are in need?
They say to me: Eat and drink! Be glad you have it!
But how can I eat and drink if I snatch what I eat
From the starving, and
My glass of water belongs to one dying of thirst?
And yet I eat and drink.
I would also like to be wise.
In the old books it says that wisdom is:

To shun the strife of the world and to live out
Your brief time without fear
Also to get along without violence
To return good for evil
Not to fulfill your desires but to forget them
Is accounted wise.
All this I cannot do.
Truly, I live in dark times.

Colonization and occupation are reasoned with false propaganda by despotic leaders. Tyranny and insanity are transitory but boundless in absurdity and force of cruelty being witnessed live across Ukraine, Palestine and elsewhere. An evil is inseparable from aggression and killing machines destroying lives, infrastructures, hospitals, places of worship and human survival. There are no international institutions of peace and conflict management to reflect what went wrong. Israeli extremists and Palestinians striving for national identities and freedom are encroached by perpetuated animosities. Propaganda and Western vigilance replaced pains, horrors and massive devastation caused to humanitarian survival in Gaza. The US and West European political leaders appear indifferent to the reality of equal human rights, justice and freedom. The on-going wars in

Gaza and Ukraine are no exception as planned human tragedies to foster political absolutism of the few powerful nations. Tyranny and transgression having been transformed into live and sensational entertainments on TV screen and corruption perpetuated by egomaniac and sadistic warmongering global leadership and greed and need of the overwhelming international corporate cultural entities have resulted in abject failure of the leading global institutions and system of governance worldwide provide insurmountable challenges and opportunities to intellectuals and thinking people of the globe to understanding the critical crossroads for new futuristic endeavors. After WW2, those officials who articulated the visions, devised principles and values of the global institutionalized governance lacked thinking of the phenomenon of Change and adaptability to the future. It is a major challenge to think of a Navigational Change to ensure that our common future is protected and sustainable as One Humanity living in co-existence on One Planet.

The on-going catastrophic crises in Ukraine, Gaza and the Occupied West Bank parts of Palestine are urgent wake-up calls to human soul and imagination as power corrupts power and all systems of po-

litical governance seem broken and dysfunctional to safeguard humanity. The global institutions, global leadership and systematic working of international political affairs are managed by wrong thinking, wrong people and wrong priorities. None seem to have the capacity to further the cause of global humanity, peace, conflict resolution and security. The global humanity looks for change but there seems to be no systematic mechanism for integrated change to ensure continuity of encompassed human thoughts, hopes and ideals for tomorrow, the near future or distant future. Despite the sketchy illusions of freedom, democracy, human rights, liberty and justice, we are encroached, stuffed and at terrible risk of annihilation more accidental and by error of judgment than planned scheme of things by Man against Man.

The UNO shrunk to dead-ended spectacle and its failure to protect the 2.9 million civilian population in war zones - just a spectator and has no power to stop the Gaza war between Hamas and Israel and the US-Russian and other European leaders who are waging wars, killing human beings, destroying their moral and spiritual values of mankind so that a divided humanity would not forge a unity of purpose to survive against the ruthless authoritarian vices and

imposed ruins. If you were to question the economic lords of the world, they would deny doing anything illegal or wrong to humanity.

Lessons of history are ignored - people holding gospels in one hand have driven mankind to the insanity of the Two World Wars with the other hand without an end in sight to the continued crimes against humanity. The prospects for the 21st century to be a different age of peace, understanding, reconciliation and harmony among the people of the globe are just passing illusions, crippled aspirations, not the facts of life. Opinionated politics and governance make institutionalized policies; facts of human life live in denials. Politics is a game of problems, pretensions and individualistic anarchy and exploitation. People, politics and institutions appear to be on a collision course imperiled by exploitative economies, corrupt and incompetent leadership, austerity debts, poverty, and exclusion from governance. **Is there a new culture of thinking and emotions to bring mankind back to its originality of rationality, unity and co-existence to safeguard from the planned calamities of man against man and to ensure a sustainable future?**

The purpose of life is built-in in the nature of human beings, it needs not to be invented but only to

be discovered as our own aim of life. **If we succeed in making this moral and intellectual discovery, it will greatly enhance our collaborative affinity to time, space and all other living things within the universe. God, the Creator** of all things (seen or unseen), made human beings the chief vicegerent on earth with defined role and responsibility. Those who violate the sanctity of life and earth would face the consequences of their wrong thinking. The denial and rejection of natural responsibility will put us in a constant situation of self-engineered conflicts and discords to all living things around us. That is what leads to violations of the sacred sanctity of life, human freedom, dignity and makes us hypocritical transgressors in our own consciousness and external relations to others.

George Orwell said it right: **"in a time of universal deceit, telling the truth is a revolutionary act."**

The Earth has 78% nitrogen, 21 % oxygen to maintain life and combustion engines working.

There are insurmountable challenges stemming out of man's systematic tyranny against man requiring constant challenge of intelligent adaptability – the idea man to share intelligent vision and new strategies towards future-making that only Man and

Humanity can imagine and articulate. Mankind is informed, and vigilant with a purpose and meaning for change and progress. How to safeguard the interests of mankind and to ensure its survival from the known and unknown conspiracies, onslaughts, and extinction of life and be able to live in harmonized multi-polar global culture of peace, understanding and civilizations? The immense challenge and its on-going emerging critical implications deserve serious thinking and moral and intellectual pondering from the thinking hubs of the concerned global mankind. There are serious gaps and critical issues involved in coercing the worldwide rational thinking process to challenge the odd, ignorance and perpetuated wickedness unleashed by the systematic political organisms managed and controlled by the corporate media and the 1% elite super bugs - the nerve center of the global economic-military-industrial complexes affiliated to Political Party-run State governance. Man being the nucleus of the humanity, if he can evolve an inward thought and eye not just on business of economic survival but purpose of life with rational reflection to see his own origin, coming out of a drop in mother's womb into a full fledged excellent Creation of God - complete system of functional human being- the Child of the Planet - the self-awareness and actualization is key to rethinking and reconnecting to the originality of Man.

If logic and reasoning are at the heart of contemporary pursuits for a peaceful future, our analogical reasoning articulates plausible new ideas and creative adaptation to crystallize the prospects for a new imagination of global unity and ultimate ideals of One Humanity to co-exist in peace and harmony within the splendid Universe. Unlike the exclusive materialistic approach, a balanced (material and spiritual factors) strategy to future-making and coping effectively with the problems of peace, security and conflict resolution, the mankind would certainly need **(1)** a moral, intellectual and spiritual interpretation of relationship to the Universe **(2)** a comprehensive defined concept of the moral and spiritual freedom, rights and obligations of the man within the working of a state, and **(3)** imperatives of laws and protection of all forms of life from wars and destruction and spearheading the direction of human affairs, policies and practices for global unity of the mankind.

The author offers intellectual foresight and ingenuity to surpass the standardized approaches to peace, security and conflict management, normal horizons of thoughts, traditional theories, academic lab tests, opinions and scenarios and envisaged operational fantasies, and passionate to groundbreaking spectacles and creative initiatives into inquiring and facilitating tangible framework of political imagination,

propositions, creative strategies to substantiate the rationale assumptions and perspectives to be manifested in peace and conflict resolution and to look beyond the obvious and unthinkable horizons within the context of globalization of humanity and the concerns of the informed, mature and active global citizenry in developing a sustainable future:

- Global peace, security and conflicts embody man-made conflicts requiring approaches and imagination of human rationality to find alternatives and workable remedies. Could there be new emerging global political thinking as evident in the political activism of the global citizenry that should be part of the agenda to perceive new visions to analyze and demonstrate creative solutions on issues of primary concerns to mankind.

- With massive corruption, egoistic, incompetent and tyrannical global political leadership across the industrialized West and the developing world, institutionalized indifference to the human basic needs and aspirations, corporate greed and need on rise, economic scrutiny by the few 1% affluent ruling class against the 99% unrepresented masses, how would the world of tomorrow be relevant and compatible to the present and to the future?

- At the emergence of the 21st century millennium, the two bogus Wars on Terrorism seem to have drained out all of the positive thinking and constructive energies of the besieged mankind. The global governance and the echelons of people's democracy have proven inept to stop the global genocide re-enacted after the WW2 in Iraq and Afghanistan. What new organizational structures, working principles and framework are necessary to ensure continuity of the human ideals of peace and security for the futuristic mankind?

- The global citizenry has assumed the physical and intellectual role and place of a "global village", the utopian ideal often futuristic scholars used to imagine for the future-to be constructed out of the formative ideas. The information technological advancements have turned that utopian reality into a visual reality of the 21st century. It is unthinkable that any futuristic system of world government or regional-local formation can possibly ignore this imperative. Therefore, the global citizenry as a force of change and adaptability must be included in all that can be imagined to be evolved for the future, be it the economy, politics, social, moral, spiritual and other vital spectrum of human affairs. Its inclusion will strengthen

and legitimize the course of action and the embodiment of future-making.

- The developments of global institutions were the outcome of the hopes of the beleaguered humanity for change and progress toward the future. But contemporary history shows naive and delusional results as if a process of reverse–engineering was used to crave the future. While learning from the past is important, the past cannot be a model for future-building. This is where the scholars and intellectuals went wrong while developing the international institutions after the WW2 dreadful events. To undo the past errors of thinking and judgments, the 21st century scholars and thinkers must imagine, visualize and articulate new and creative ideas and ideals to grasp the unfolding realities of the future-making. The given rational assumptions must be flexible enough to change and adapt to the requisites of the unknown future as it will happen.

- Global change, cultures and civilizations are not the hallmark of abstract states, ruling elite, constituent assemblies /parliaments, major international corporations, NGO's and self- appointed dictators and phony political leaders wandering around in search of political and eco-

> nomic manipulation and hegemony. Whereas, they are the outcome of thinkers, poets, visionary intellectuals and philosophers who know the mainstream passion of Man and Humanity and are well equipped to produce sustainable new ideas and creative ideals for a sustainable future. How would these varied factors collaborate systematically and pool their precious resources to converge on change and articulate a new rational future-building?

Modern ignorance can be attributed to the re-emergence of powerful modern fascism deriving its legitimacy from the ruptured liberal democracy to select few wealthy and affluent egomaniac leaders irrespective of the interests of the citizenry and mankind at large. The UNO, global systems of governance, laws, principles, charters, declarations, all transforming to a trajectory outcomes and having been sidelined by self-styled leadership engaged in the scourge of global warfare - the sadistic psyche - man killing man, back to the draconian age without any rescuing move by the world systems of States or the responsible global institutions. Men holding Divine Gospels in one hand have pushed mankind to commit large scale massacres and dreadful devastation during the Two World Wars and continued to be witnessed in wars raging in Gaza (Palestine) and Ukraine. As it

stands now, we are back to the alarming time when the perpetrators of the WW2 had encroached the globe with deaths and destruction but the current stage is more treacherous and frightening and full of unthinkable disastrous consequences for the future of the whole of humanity.

It is **vital to human comprehension that We, the People, of the Earth must know and realize – who we are, where we come from and what role do the living earth, the sun and the moon interactively play in preserving life and stability of our existence and working of varied galaxies in the universe.** This understanding could lead to appreciation of our natural bonds, preservation of the environment, balancing the utilization of natural resources and peaceful co-existence in global affairs for a sustainable future.

"We have not created the Heavens and the Earth and whatever is between them in sport: We have not created them but for a serious end. But the greater part of them do not understand it." (The Quran: Chapter 44: 38).

The earth was a **trust** to human beings and it was not meant to be bombed or destroyed by sadistic leaders and nations. Those who are bombing mankind and destroying all forms of life and habitats are

not the normal beings – they should see the mirror for being something else than intelligent human beings with a Divine Trust to protect the Earth for all living beings: In **Chapter 23: verse 72**, The Quran makes a vivid revelation:

"We did indeed offer the Trust to the Heavens and the Earth
And the Mountains but they refused
To undertake it, being afraid thereof:
But man undertook it;
He was indeed unjust and foolish."

American astronaut on moon looking at the floating Earth - thanks to NASA

Earth's average orbital speed is about 30 kilometers per second. In other units, that's about 19 miles per second, or 67,000 miles per hour, or 110,000 kilom-

eters per hour (110 million meters per hour). The earth rotates once every 23 hours, 56 minutes and 4.09053 seconds, called the sidereal period, and its circumference is roughly 40,075 kilometers. Thus, the surface of the earth at the equator moves at a speed of 460 meters per second--or roughly 1,000 miles per hour. The presence of small amounts of heat-trapping greenhouse gases in the atmosphere warms Earth's surface, resulting in a planet that sustains liquid water and life. Changes in climate conditions can affect the health and function of ecosystems and the survival of entire species.

The earth we live on and breathe its air and all the necessities for human survival could be a subject of religious belief or it could be a paradox of philosophical reasoning. But there is no philosophical genius to claim being the creator or originator of the earth, the sun, the moon or other known galaxies. Challenging the philosophical perspectives, religious beliefs (The Divine Revelations - The Torah, The Bible and The Qur'an), claim that God is the originator and creator of the entire universe - visible and invisible. Often unwilling to break away from man-made philosophical perceptions and notions, religious belief exposes natural phenomena and undeniable truth about the origin of human life, the origin of the earth and other known planets in our solar systems. At times,

reason overwhelms the human spiritual dimension and philosophical thoughts fail to imagine the reality of natural bonds between belief and human soul to flourish for peace and unity of mankind.

The author outlines the indifference of egoistic global leaders to tormenting problems unfolding ignorance, wars on humanity, exploitation of the Nature of Things, decadent moral and sociocultural and spiritual values and destruction of the universe in which we live and maintain our hopes for the future. True knowledge is benevolent to realize the essence of humanity within the splendid Universe. But the earth is continuously destroyed by wars and weapons of mass destruction, global warming, and greenhouse gases affecting the entire spectrum of human existence and survival on this planet. What is being destroyed was not created by humankind, institutions or governments**.**

Albert Einstein said it right: "The world is a dangerous place to live, not because of the people who are evil, but because of the people who don't do anything about it."

All wars perpetuate violence, fear and vindictiveness against mankind and are aimed at destruction of civilizations and dehumanization of succeeding

generations. The global mankind is the net victim of the catastrophic madness of the few warlords. Global leaders failed to learn anything from the past to change their mindset because of the knowledge, history and facts of life? If global leaders claim to be effective leaders they should know their weaknesses and strengths of vision to change and reform their minds and behaviors when facts of life warrant a change, be it in policy making or global interactive behavior? After all, listening and learning are critical factors for the changing role of 21st century political leadership and so is the flexibility mechanism to be built-in for effective leadership. But there are no intelligent and proactive leaders with a vision of the future to see the imperative of One Humanity except naive and self-geared egomaniac full of the sensation of power using triviality and viciousness to torture and kill the mankind and destroy ecological habitats. But contrary to the brutal perceptions and actions of the US-former Europeans imperialists, the international community is informed, mature, and enjoys the moral and intellectual capacity to know and understand the facts of life and to challenge the politically imperiled insensitivity to universal accord and Unity of the mankind against brutality of the terrorism of wars that unites them with a common fate more than divides them by any token of adversity and separate national identities.

Dr. Martin Luhter King, Jr. in his speech from Riverside Church on April 4, 1967 that led to his death, made the pertinent facts of life known:

> **We are now faced with the fact that tomorrow is today. We are confronted with the fierce urgency of now. In this unfolding conundrum of life and history there is such a thing as being too late. Procrastination is still the thief of time. Life often leaves us standing bare, naked and dejected with a lost opportunity. The "tide in the affairs of men" does not remain at the flood; it ebbs. We may cry out desperately for time to pause in her passage, but time is deaf to every plea and rushes on. Over the bleached bones and jumbled residue of numerous civilizations are written the pathetic words: "Too late." There is an invisible book of life that faithfully records our vigilance or our neglect. "The moving finger writes, and having writ moves on…" We still have a choice today; nonviolent coexistence or violent co-annihilation.**

The voices of reason are loud and clear as global humanity cannot suffer the penalties of tyranny and

evil-mongering. We the people of the world enjoin focused minds and imagination to articulate a new world of One Humanity, brotherhood and peaceful co-existence among all, free of hatred, intrigues tyranny, encroachment and animosity.

We, the People, of the globe possess understanding - how to change the egoistic and embittered insanity of the few hate-mongers and warlords into equilibrium of balanced relationship between Man, Life and God- given living Universe in which we reside all.

If time and history are a reference point, we humankind stand at a critical juncture of our own complacency to have allowed ignorance, hatred, fear and animosity to destroy our lives, culture and existence. Those obsessed with invincible armies cannot solve the emerging political crises. America and Russia cannot be blamed for all the catastrophic happenings across the globe. They represent the States, not living humanity. Men of new ideas possessing individual conscience have the most powerful weapon to challenge the few egoistic politicians in the global chessboard. Political self-interest pursued by intrigues and hypocrisy will not produce global peace and harmony. All global leaders want to be seen as winners, not losers. Ironically, when self-interest overtakes global interest, they are a scum floating on the torrent

of time. Intellectual and moral turmoil are the two shades of disingenuous politics at the global political theater. The informed global community deserves sincere commitment to peace and harmony, not slanderous blame of 'war crimes' against one another. Such rebuttals darken the prospects for workable alternatives and creative solutions in critical conflict management. The working of international institutions is at crossroads. Nobody can imagine any miracles out of nothing, be it at the UNO-New York, Washington or Moscow. Often sadistic dummies oversee critical lifelines of global humanitarian affairs. We must regain control of our own potentials and powers; analyze our strength and weaknesses as united and organized people of the globe. We the People can change even if the leaders lack imagination of our hopes and priorities. Political gangster-ism will expand into insane egoism to cause the downfall of the few as it happened to Hitler, Mussolini, Hosni Mubarak, George Bush, Rumsfeld, Tony Blair, Saddam Hussein, Qaddafi and Bashar al-Assad in Syria. The earth won't dwindle or the sky won't fall upon us if more will go the same way as happened in recent history.

In its search for change and progressive future-making, global mankind is oppressed by systematic ignorance, intransigence and arrogance of

the few affluent class of people managing the global institutions, militarization and governance - the perverted insanity lacking basic understanding of the Human Nature and of the working of the universe in which we enjoy coherent co-existence. Animals do not commit massacre of their kind and species, nor set-up rape camps for the war victims, the Western led wars against the humanity have across the world and continue to do so at an nonparallel global scale without being challenged by any global organizations or leaders. Torture and massacres of innocent civilians are convenient fun games to be defined as "collateral damage" and a statistic. Perhaps, they view humanity just in digits and numbers, not as the living entities with social, moral, spiritual and intellectual values and progressive agendas for change and development.

Man being a nucleus of human society is not represented in its fullest context encompassing the moral, spiritual, social, intellectual, psychological, behavioral and material banners. Contrasts and conflicts within Man and the embodied humanity generate a wide range of unthinkable conflicts which neither conform to any beginning nor the end in order to grasp the prevalent realities of global affairs. The unthinking and non-comprehension of Man and his origin and values leads to disjointed and unfulfilled

relations to the institutions and the global system of governance. The global institutions and system of governance have failed to imagine and reconstruct principles, rights and obligations which will incorporate understanding of human moral, spiritual and intellectual values and safeguard the interests and priorities of the diverse, changing and active global citizenry. Every beginning has its end. It is just that most powerful nations have failed to learn from the living history- a slap to EH Carr's precious thoughts of human history.

Change is a living phenomenon as we prepare competent graduates for the future. To appreciate the phenomenon of change in academic settings, students in an experiential learning environment should learn to be thoughtful, creative and intellectually well informed and be active participants in all of the cognitive processes within or outside the sphere of education for the learning objectives. It should be a collaborative project for students and the faculty to share knowledge, global and cross–cultural perspectives in a world marked by "change" as the most tangible discipline of human life. All educational programs aim at producing competent graduates for the futuristic global markets in education, intellectual and professional demands.

The phenomenon of change is imagined, visualized and articulated by thinkers, scholars and visionary intellectuals to facilitate futuristic perceptions, new ideas, scenarios and agenda. The author enjoins pro-active creative thinking and visions for global change, human development and citizenry emancipation and a wide range of contemporary knowledge, intuitive visions and cross cultural experiences from North America, Europe, the Middle East, Asia and Africa and to view two distinct operational models of crisis management, peace, and conflict resolution in force across the international system of governance:

(1) The academic and analytical model based on theoretical propositions, research and classroom discussions intended for academic purposes, literary exchange and intellectual consumption

(2) The bureaucratic model evolved over time and history by the establishments - military, strategic experts, civil service, foreign policy planners and war zones engagements and outcomes of consultancy and advisory projects on specific issues of national - global interests.

But the real world affairs are increasingly becoming unpredictable critical entities beyond time and space and the constantly changing nature and scope of challenges embodied in the discipline, none of these two models correspond to the extraordinary requisites of the fluid and complex peacemaking, security and conflict management theatre when it comes to dealing with real-world situations on the ground. No scholarly vision can define nor project an absolute prefixed formula to analyze varied and dreadful global conflicts in the 21st century charged political theatre and culture. The world is changing fast and so are the challenging and unpredictable requisites for understanding of human affairs, diverse national interests and policies of political governance and progressive but forceful presence and interests of global humanity. The global affairs need a multi-dimensional flexible framework of creative and new ideas-based changing perceptions and multi-interdisciplinary strategies to cope with the unknown horizons of distinctively unthinkable and undefined premise of conflicts and security threats of the impinging forces that direct the new challenges against global peace and governance.

To advance his political insights and intellectual vigor and inquiry into the working of the global governance, the author clarifies that influenced by changing and challenging fortunes of time and the

role of the increasingly neglected global citizenry - the reason and resource of the international humanity, would need three major working apparatus to ensure sustainable framework for global peace and conflict management and co-existence:

1. New International Organization – A NEW UNO compatible with the interests, aspirations and accountability factor to global citizenry and enshrined with a new Charter and principles of global governance corresponding to the 21st century changed global priorities.

2. A New System of global governance responding to the moral, intellectual, spiritual and economic and political interests and values of the 99% of humanity to be represented across national-international policy formulation forums, public agenda setting issues and decisions-making and implementation.

3. New proactive and intelligent pool of global team leadership - participative leaders - men of new ideas - the manifestation of globalization and representation of mankind to share and contribute visions and integrity to serve the interests, unity in diversity and priorities of the global mankind.

We, the People, must search for new ideas and ideals to envisage new futuristic thinking and visions for a world that is not yet planned but ostensibly to be different from the present and conceivably revulsion than being revolutionary in relation to the status-quo of the contemporary global human, economic, moral and political affairs overwhelmed by few people of class and economic ethnicity and related outgrown privileged corporate institutions. The plausible recognition and appreciation of the dynamic and expanding Universe in which time and space are aimed to envisage Man and the Humanity to co-exist extending freedom and opportunities to forces of history to create a fresh world of new ideas and imagination to make things happen for the best of Man and Humanity enjoining coherent bonds of mystical unitary experience and life in the encompassed universe.

Man, humanity, civilizations, ideologies, global system of governance, international institutions and recognized universal norms and principles are all passing through transformational lens and priorities of change and adaptability to the future - that is not with us but rational assumptions of the educated and learners alike, imply intellectual fore-sights to proactive futuristic imagination what the world would

be like tomorrow, day after tomorrow, near future and the distant future - a passion for the imaginative unknown but fast approaching for recognition and articulation.

To change the world, it is incumbent upon common people, intellectuals, academics, visionaries, poets, philosophers and thinking people to perceive and articulate new and creative ideas, new political imagination for the 21st century and beyond organizations to be functional for the people, by the people and accountable to the supremacy of the people's will. Thus facilitating space and opportunities for dialogue and reason to deal with issues of primary national conflicts, competing economic and political discords, freedom, justice, human rights, and to invent new terminologies of diplomacy, peacemaking and co-existence between Man, the Humanity and the encompassed Universe. Peace and global security are not the properties or the exclusive domains of any superpowers, UNO or the Security Council or corporate entity. The global mankind enjoins rational optimism to see the ideas and ideals of peace and human security as its own collectively, not of the few.

Progressively evolving is a new information-age plausible global culture of Thinking of One Hu-

manity and a new proactive civilization of strong bonds and affinity of people to people cultural communications – citizenry participation in social, economic and political Thinking and Globalization - man in one part of the world feels, thinks and acts-reacts to what happens to any man in another remote corners of the globe. Mankind is neither blind, nor inept, it defines its own purpose, meaning and identity for peace and harmony that the established institutions of governance - be it in America or Europe or elsewhere miserably failed to recognize or value their importance in global political affairs. Given the inherent systematic deficiencies and moral and intellectual corruption in the US - European – worldwide political governance and policy formulation toward the international community, the global community is actively organized and morally and intellectually powerful to halt all the belligerent nightmares planned and orchestrated by the few war lord of the globe.

"We have a world to conquer...one person at a time... starting with ourselves."-**Nikki Giovanni.**

Civilizations and Humanity are not developed by the political-military-industrial complexes led economies, or IMF operative bankers, ruling elite, spec-

ulatory stock markets, legal judgments, kings and queens, morally and spiritually decadent generations and crime riddled authoritarian ruler, but are the tangible progressive outcomes of the proactive intellectual and moral visions of the societal thinkers, poets, philosophers, knowledge, truth, compassion and continuous movement by man to support the humanity and its natural strive for new thinking, change and progress. Politics is problematic and increasingly becoming irrational and a burden on man's conscience. Now, it is up to the focused mind of Man and the spirited Humanity to assume the new-age responsible leadership and articulate a Navigational Change.

Thomas Paine vision of the "**Common Sense"** articulated the framework of freedom, liberty and justice for the American political independence:

"Everything that is right or reasonable pleads for separation. The blood of the slain, the weeping voice of nature cries, 'TIS TIME TO PART." The Declaration of Independence spells out the foundation of New Thinking:

"When in the Course of human events, it becomes necessary for one people to dissolve the political

bands . . . they should declare the causes....” This was the opening of **the Declaration of Independence.** Its second paragraph sets out the powerful philosophical commitment:

“**We hold these truths to be self-evident, that all men are created equal, that they are endowed by their Creator with certain unalienable Rights that among these are Life, Liberty and the pursuit of Happiness. To secure these rights, Governments are instituted among Men, deriving their just powers from the consent of the governed, that whenever any Form of Government becomes destructive of these ends, it is the Right of the People to alter or to abolish it, and to institute new Government.... “**

At a critical juncture of time and opportunities in global affairs, it is rational to think what mankind needs most - **Peace, co-existence or more cruel wars. Colin Wilson(A Criminal History of Mankind),** captions the perpetuated animosity and degenerating viciousness of the US led War on Terror and illustrates how it is a replica of the failed Roman Empire:

“**The Romans were slipping into violence by a process of self-justification, and once a nation or**

an individual has started down this particular slope, it is impossible to apply breaks the Roman people were too unimaginative and short sighted to realize that, once murder has been justified on grounds of expediency, it can become a habit, then a disease."

Would the global leaders ever stop to think of war as a means to peace and global security?

Effective leaders are always those who are open to communication - listening and learning, knowing their strengths and weaknesses and then coming up with rational policies and practices for change and adaptability to future-making. It is not only unthinkable but uncertain that global leaders would change their mindset when facts of life warranted a change. While the wars in Gaza and Ukraine have not ended in any logical context, millions displaced, massacred and habitats destroyed by aggressors, the global humanity could well imagine the emergence of a Third World War if the present trend continues without any public intervention to reform the sadistic intellect – the curse of wars:

Willy McBride wrote **"The Green Fields of France",** and it was sung by Fureys:

Did you really believe, when they told you the cause,
Did you really believe that this war would end wars?
Well, the suffering, the sorrow, the glory, the shame,
The killing and dying it was all done in vain
Oh Willy McBride it all happened again -
And again, and again, and again, and again.

Ukraine in search of peace and security

Chapter 1:
We, the People are Hostages and Global Warlords have Stolen Our Future

The 2nd World War ended on paper but its catastrophic consequences continued to haunt mankind throughout the globe. Its ripple effects continue to refresh the memories of inhumanity compelled by the powerful nations that subjected humanity in unwarranted battlefields. While transformational leadership was the essence of time and urgent need of the aftermath survival across Europe and elsewhere, those occupying the top elite positions were mostly men of the past - men of king lacking proactive imagination of the future and phenomenon of change and adaptability to global political affairs. All of the major international institutions evolved were led by the similarly indoctrinated ideas and ideology of the past that were initially part of the war-making strategies. Those hated and feared are seen as problematic

in many domains of international institutional work culture. European authoritarianism had a direct impact to produce absolute rulers leading to wars and aggression across Europe.

To post WW2, all institutional structures were overwhelmingly occupied with a focused agenda for restoration of economic, social and political normalization. Humanity was at its lowest ebb when poverty, displacement of civilian population, law and order and social justice were sidelined during the post war recovery timeline. The victorious allied nations, the UNO, World Bank and other Western military affiliated establishments had varied priorities to compete for influence during the post-World War global affairs. The prevalent social chaos and turmoil were not the exclusive agenda items for new thinking and solutions. How strange such major institutions ignored the basic needs for change and development of the surviving masses. Dr. Martin Luther King must have imagined it as a realist to invoke the human consciousness:

Immanuel Kant, (**Idea for a Universal History from a Cosmopolitan Point of View, 1784**), one of the most reputable German philosopher and international thinker of 'Perpetual Peace', explains that:

The greatest problem for the human race, to the solu-

tion of which Nature drives man, is the achievement of a universal civic society which administers law among men. **The highest purpose of Nature, which is the development of all the capacities which can be achieved by mankind, is attainable only in society, and more specifically in the society with the greatest freedom…..** *The history of mankind can be seen, in the large, as the realization of Nature's secret plan to bring forth a perfectly constituted state as the only condition in which the capacities of mankind can be fully developed, and also bring forth that external relation among states which is perfectly adequate to this end.*

There are widening economic and political discords and emerging conflicts between the governed and those governing the state. Those 99% people of the globe who occupied the civic centers across continued to question the criterion of insane satisfaction implied in the so called zones of economic prosperity and maintaining higher standards of living – an economic fantasy of human illumination. All man-made systematic notions of life, be it the former Communism or the current work in progress under Capitalism aimed at exclusion of the fullest human values: moral, social, economic, political, intellectual and spiritual, the planners see what they want to implement as suitable to the genius of

the few controlling agents of influence- bankers, military-industrial complexes and owners of free market stuff. They cite religion as primitive and irrelevant to the modern age but throughout history man's fullest skills, aspiration and success has flourished through the nature and scope of the system of belief - Divine Religions. Unlike economic forecasts and speculative reasoning, Divine revelations have helped the mankind to rediscover their sense of moral, social and spiritual originality and values and to frame a dynamic outlook of life harmonizing material and spiritual dimensions leading to peace, moral and intellectual freedom, new ideas and ideals for the future and a universal context to the besieged humanity. Thus facilitating the scattered mankind a focused forum to organize a universal character of unity – "**WE, THE PEOPLE" the beginning of the American Declaration of Independence, The UNO Charter, and so many of universal declarations of nobility and statements** - all have one way or other violated the very essence of the written covenants and victimized the large segment of mankind of which they were intended to be defending the cause. The 99% occupying protesters and victims of police brutalities – we, the people could not gain what was promised to them by the solid covenants via the democratic system of governance - a clear travesty

of moral, social and economic justice. Imagine what rational foundation is there for democracy to be operational as a system of people's governance. Paranoid, vengeful, the 1% economic war lords behave like maniacs. They bribe public institutions, donate to security and police establishments and claim to be the trustworthy guardian of democracy. Not so, the 99% people have come out with courage and imagination all over the living humanity to challenge the secluded and few corporate names and titles that are universally hated and feared – the bankers, the stock market draculas organized in appearance and reality to control the lifelines of the rest of the world population. The UNO like the League of the Nations is a failure in protecting human rights, freedom and economic and social justice to the 99% of humanity. Its reports and resolution to stop the on-going wars in Gaza, Ukraine, Syria, Yemen and between NATO and the Russian block is a staunch reminder to mankind that we could be victims of another deliberate war – the Third World War, more dreadful in consequences than any subjective imagination.

The UNO is just a spectator and has no power to stop the US-Russian and other European leaders who are waging wars, killing human beings, destroying their moral and spiritual values of mankind so

that a divided humanity would not forge a unity of purpose to survive against the ruthless authoritarian vices and imposed ruins. If you were to question the economic lords of the world, they would deny doing anything illegal or wrong to humanity.

What is at stake for the present and futuristic generations (if they remained intact after the 3rdWW)? There must be a systematic transformational capacity of man and the institutions to protect humanity from sadistic consequences of the few warmongers. Do the greedy or paranoid lead the mindset of the global warriors against mankind?

"**Greed Has Poisoned Men's Souls!** "I'm sorry but I don't want to be an Emperor, that's not my business. I don't want to rule or conquer anyone."Points out Charlie Chaplin in his October 02, 2012 speech: "**The Great Dictator."**

…….I should like to help everyone if possible, Jew, gentile, black man, white. We all want to help one another, human beings are like that. We all want to live by each other's happiness, not by each other's misery. We don't want to hate and despise one another. In this world there is room for everyone and the earth is rich and can provide for everyone. The way of life can be free and beautiful. But we have lost the way.

Greed has poisoned men's souls, has barricaded the world with hate;
has goose-stepped us into misery and bloodshed…..
We have developed speed but we have shut ourselves in:
machinery that gives abundance has left us in want.
Our knowledge has made us cynical,
our cleverness hard and unkind.
We think too much and feel too little:
More than machinery we need humanity;
More than cleverness we need kindness and gentleness.

Without these qualities, life will be violent and all will be lost.

In the seventeenth chapter of Saint Luke it is written:
- "The kingdom of God is within man"
Not one man, nor a group of men, but in all men; in you, the people.
You people have the power, the power to create machines, the power to create happiness. You the people have the power to make life free and beautiful, to make this life a wonderful adventure.

Strangely enough, **Arnold Toynbee**(**A Study of History**), warned about the stagnating spiritual and moral values of the mankind as major paradoxes of history are transforming warriors unto dreamers – the contemporary US leaders, the role models for this unfolding reality under the guise of "war on terrorism" going on in Iraq, Afghanistan and Pakistan. After three years of the US led illegal war in Iraq, John Hopkins University research indicated the loss of approximately 1.5 million human beings in Iraq. Now six years later, it is estimated that almost 3 million civilians have been killed by the US- British forces in Iraq. Why? Nobody can answer this question except George Bush, Tony Blair, Dick Cheney, Paul Wolfwoltz and so many others to be tried in an international court of justice for crimes against humanity. Millions have been uprooted and butchered in Afghanistan to standardize the savagery and more than 3000 innocent civilians were killed in a year by the American drone attacks in Pakhutoon Province - Waziristan of Pakistan. Some are killing others because of color and ethnicity. Do they have less human values and entitlement to rights? Nobody knows when this catastrophic and mindless cruelty by man against man will come to an end. When would the bankers, stock market brokers and financial pimps will return to their originality instead of warmonger-

ing and being the perpetrator of the US military-industrial complex and to serve the financial well being of mankind - the imaginative spirit that states clearly – **WE, THE PEOPLE….”**

What caused the dreadful Two World Wars is happening again. Ignorance and greed know no bound. In addition to the ruling elite, now the corporate leaders dictate the pros- and cons of global economic and political affairs. There is a compelling body of evidence to support the viewpoint that major global corporations are exploiting the riches of the planet for monetary gains and to cause catastrophic consequences for the living mankind without any systematic accountability. The planet Earth is for living of all the creations, not for looting its inhabitants for a sustainable future. Global warming is a man-made problem. Despite the January 2016, Paris Climate Change Agreement, many nations are reluctant to ratify the treaty. America under President Trump at the time terminated its commitment to uphold the terms of the Paris Accord on Climate Change. But President Biden rejoined the Climate Change framework. Donald Trump, re-elected again in November 2024, could well argue and act against the climate change paradigm. Others could be paranoid and react and rethink about climate change and its undeni-

able impacts on all aspects of human lives and their habitats. We, the People must find ways and means of workable solutions to reduce the impacts of carbon dioxide on the Ozone layer depletion and climate transformation. Our planet is for living and together, **We, the People,** must ensure its future sustainability through increased measures of safety and security of the planet, human life, and production of foods and reduction of greenhouse effects on the earthly habitats. If the few insane and victims of their own vengeful paranoid continue to control the global political powerhouses and determine the future of mankind as it happened during the Two World Wars, **We, the People,** have reason to oppose, reject and challenge such obsession as the new trend-setting development for the future of One Humanity?

Chapter 2:
America, Russia and NATO Search for New Animosities and Conquest of New Frontiers of Influence

People of Ukraine demand an end to war

photo thanks to the Orthodox Church Ukraine

Superpowers Ignore Lessons of History

America, Russia and NATO's Geneva diplomatic talks ended in failure without any formal course of action to avoid military confrontation on Ukraine's border. Other vital issues include how to treat each other in a futuristic imaginary encounter of common interests. The global community is watching the prelude to a staged drama of unwarranted warfare with profligacy, malevolence and unknown miseries of

unthinkable multitudes. All the superpowers – the stage actors of the 21st century have fictitious monsters equipped with innovative sophistry and captivating eloquence to talk about peace, security, human rights, global order and justice. They are master of deception playing on the passion of entrenched and exhausted mankind as if they could stop the emerging pains, horrors and devastation of warmongering to ensure a return to normalization of human affairs. To an inner human analytical eye encompassing proactive sense of global peace and harmony, it does not appear rational to articulate fears and misleading intentions to safeguard human peace and dignity while all the actions speak of a different language of obsessed assertions based on their own despotic national interests. There appears to be mythical contradictions in their claims of superiority and perhaps politically looking for an escape from the obsessed invincibility of superpowers. They claim peace but talk about threats of wars – how to rationalize the irony of human wickedness and inherent deception. Was the same stage drama not enacted during the First and 2nd World Wars killings millions and millions of people across this Planet Earth?

Human progress and future-making are jeopardized when lessons of history are deliberately misin-

terpreted and ignored by the paranoid, vengeful and suspicious leaders. If war is the only avenue to seek peace, we are on the wrong side of history and thinking of our future. It took several centuries to Europeans to understand the false shadows of apprehension of peace and harmony and to come to terms with nation-building, some resemblance of democracy, human equality of rights and unity for future-making via the EU. A reasoned perspective would illustrate that Russia after breakdown of the former USSR is not the same inheriting entity of Communist authoritarian ideology, leadership, institutions, political thought, policies and practices within the working systems of global order. There are visible progressive movements for political change, open communications, elections, institutional developments and global interactions and seeking reunion with the global order, UNO, world institutions, friendly relationships with adversaries and balanced socioeconomic ties with others. To enlarge the scope of reason and understanding, Russia needs formidable change as it appears to be forging on different national strategic interests; its position on Ukraine is not the same as eluded by most NATO members. Ukraine and Russia have common geography and history just like Britain, France and Germany have. Would it not be a matter of extreme political-strategic sensitivity if

other perceived enemies would dare to come close to military confrontations in Western Europe? It is logical that true friends of humanity will not act blindly to cause wild uproars and evil-mongering against the people anywhere on this planet.

How Relevant is NATO to the 21st Century Emerging Conflicts?

The focal issue seems to be the prospective membership of Ukraine to the community of NATO in Western Europe. America and Russia and other EU members enjoin conflicting views on this issue. Ukraine claims its freedom to join any international organizations for its betterment, peace and security. Russia and America should not be concerned except that they want to draw certain strategic gains out of this chaotic perceived tragedy of futuristic warfare. After the dreadful consequences of the Two World Wars, NATO was formed by the Europeans to maintain peace and security and avoid futuristic unwarranted national wars within the European hemisphere. Its formation and scope is limited to nationalistic conventional warfare in the European theatre. One wonders, what wars did NATO fight to protect its ideals and strategic priorities after the 1945 WW? What NATO had to do with Afghanistan, Iraq and

Libya? Were these accidental engagements or simply an extension of planned mischievous catastrophic instances of tyranny against the people of Iraq, Afghanistan, Libya and elsewhere who never posed any threat to NATO, America or to any Western European nations? American and European leaders pushed soldiers to fight unwanted draconian wars in Afghanistan, Iraq, Libya and other parts of the Middle East. Millions of innocent Afghans, Iraqi and Libyan civilians and Western troops were killed during the US-led NATO wars in these regions. Could any American-European leaders explain why every day approximately 18-25 US war veterans commit suicides?("**Why Do Soldiers Commit Suicide and Global Warlords**." Uncommon Thought Journal, USA).

How would one rationalize the role and actions of NATO in a global theater of strategic interests? The history of NATO and its plans and ideological motives are equally distorted and disfigured on the global screen of reason, honesty and accountability. Russia overtook eastern parts of Ukraine – Crimea by forces aligned to Russian speaking masses and trying to integrate those territories into the Russian federation. This issue has been discussed between Russian President Putin, former German Chancellor Angela

Merkel and French President Macron on several occasions. Could America, Russia and Europeans not talk again for a peaceful resolution of this and other related problems?

Global Humanity Looks for Hope of Peace Beyond the Lens of Geopolitics

Scott Ritter*(is a former Marine Corps intelligence officer who served in the former Soviet Union implementing arms control treaties, in the Persian Gulf during Operation Desert Storm, and in Iraq overseeing the disarmament of WMD):* "*What War with Russia Look Like*" *(Global Research: 01/11/2022):* ***explains the irony of current affairs:***

If the U.S. tries to build up NATO forces on Russia's western frontiers in the aftermath of any Russian invasion of Ukraine, Russia will then present Europe with a fait accomplice in the form of what would now be known as the "Ukrainian model." In short, Russia will guarantee that the Ukrainian treatment will be applied to the Baltic, Poland, and even Finland, should it be foolish enough to pursue NATO membership. Russia won't wait until the U.S. has had time to accumulate sufficient mil-

itary power, either. Russia will simply destroy the offending party through the combination of an air campaign designed to degrade the economic function of the targeted nation, and a ground campaign designed to annihilate the ability to wage war. Russia does not need to occupy the territory of NATO for any lengthy period—just enough to destroy whatever military power has been accumulated by NATO near its borders.

Is NATO being managed by those people who lived in the distant past and perhaps post WW2 historic culture is still alive and flourishing? Is there any glimpse of hope for change and new reasoned relationships between America, Russia and West European people? The future of violence and nationalistic resentment looks embedded into the distorted strategic necessities of the current affairs, be it the argument of Russia or American-led NATO and or the EU on its own. NATO is run by the wrong people, glued to wrong thinking and doing the wrong things without any rational sense of time, people's interest and history. Craig Murray ("**NATO-an idea Whose Time has Gone."**: Anti War.com), a former British diplomat and Rector of the University of Dundee, UK, foresees the body as obsolete to emerging strategic thinking and needs of the Western alliance:

It is also the case that the situation in countries where NATO has been most active in killing people, including Iraq, Libya, Afghanistan and Pakistan, has deteriorated. It has deteriorated politically, economically, militarily and socially. The notion that NATO member states could bomb the world into good was only ever believed by crazed and fanatical people like Tony Blair and Jim Murphy of the Henry Jackson Society. It really should not have needed empirical investigation to prove it was wrong, but it has been tried, and has been proved wrong….NATO's attempt to be global arbiter and enforcer has been disastrous at all levels. Its plan to redeem itself by bombing the Caliphate in Iraq and Syria is a further sign of madness. Except of course that it will guarantee some blow back against Western targets, and that will "justify" further bombings, and yet more profit for the arms manufacturers. On that level, it is very clever and cynical. NATO provides power to the elite and money to the wealthy.

Dr. Paul Craig Roberts was US Assistant Secretary of the Treasury and is author **The Failure of Laissez Faire Capitalism and Economic Dissolution of the West, How America Was Lost,** ***and*** **The Neoconservative Threat to World Order. "Provocations Have**

A History Of Escalating Into War: Can War Be Avoided and the Planet Saved?" Information Clearing House: (8/31/2018), strikes a proactive caution to all Western policy makers:

The Zionist neoconservatives who rule in Washington are capable of the same mistake that Napoleon and Hitler made. They believe in "the end of history," that the Soviet collapse means history has chosen America as the model for the future. Their hubris actually exceeds that of Napoleon and Hitler. When confronted with such deluded and ideological force, does turning the other cheek work or does it encourage more provocation.

Every beginning has its end. America needs Navigational Change after January 6, 2021 Trump's Revolutionary attack on democracy and the Constitution, and so does Russia and NATO in their search for peaceful transition to sustainable future-making. We, the People of global community live on one floating Planet Earth, and we must be conscious - who we are, how connected we are in human solidarity and where are we heading to in our imagination of the present and future. It is awful and a tragedy of human conscience to be speaking of military conflicts

and territorial gains when mankind urgently needs an effective cure for the Covid-19 pandemic. **George Floyd cries continues to be heard all over the globe: "I can't' breathe." We are One People, One Humanity** – ignorance, natural disasters, and man-made fatalities know not any borders, flags and nationalities but surge like wildfire as being witnessed in the COVID-19 pandemic worldwide. Again political absolutism heightens animosity and hatred rather than human understanding and cooperation for a precious cause of saving human lives on Earth. To save life of one human being is to safeguard the whole of humanity. We are all born equal One Humanity: - the Divine Message of Al-Qur'an clarifies the truth:

"**Proclaim in the name of thy Lord and Cherisher, Who created, Created man (human being) out of a (mere) clot of congealed blood, Proclaim! And thy Lord is Most Bountiful, He Who taught (the use of) the Pen, Taught man (human being) that which he knew not."**

Mahboob A. Khawaja, PhD.

Chapter 3:
Towards Understanding of Man and Humanity, the Earth and the Universe Which We Live-in

The interconnected Galaxies of splendid Universe -Thanks to NASA

Man defines the logic of humanity and embodies it in the entire characteristic of life. The overwhelming materialistic pattern of life often devoid of true knowledge to appreciate the wonders of the world encompassing pertinent factors of human life. At

times, scientific opinions exhibit arrogance and rejection of the Divine knowledge revealing essential facts of human life and perceptions and beliefs about the originality of the Earth and the Universe. In the 21st century of knowledge and critical thinking, one could detect the contrast between calculated human theories and the Divine revealed facts. At times, false opinions and beliefs go unchallenged breeding confusion and conflicts and encourage ignorance to form shallow and unpredictable viewpoints as ambiguous alternative. Truth cannot be mixed and blended with falsehood to misrepresent the natural facts of human life and become abhorrent perversion of logic and reality. No wonder at times, many scholars prefer intellectual expedience on such subjects lacking the true knowledge and find truth as offensive. Understandably, it is thinkable that the knowledge of the few cannot counteract the collective ignorance of many in any given discipline. We the people of the Earth and the people of the Universe are One Humanity embedded in a coherent relationship to the Nature of Things all around us - whether we are conscientious of this relationship or completely devoid of it, it does exist in truest form and shape. We are the creatures of the Earth and the Universe all around us day and night, months and years since time immemorial.

Human perpetuated ignorance and theoretical intelligence are endangering the working of the earth, the sun and the moon. Some of the leading (USA, Russia the EU and China), superpowers have placed sophisticated weapons in space to target their enemies on earth. Undeniably technological and scientific developments have impacted the environment and global warming, toxic air, depleting natural resources, increasing nuclear experiments and wars are the challenging problems facing the 21st century mankind. Nations, governments, public institutions and people could rethink about socioeconomic and technological advancement and be conscious of their impact on the present and future of humanity. The call is desperate for nations, governments and public institutions of the world and for individuals to be alarmed and be solution-oriented for the good of all humanity. Global warming is like a time bomb in-waiting and it is important to safeguard the earth not just as a responsibility but as a necessity for our future.

The United Nations suggests that climate change is not just the defining issue of our time**, but we are also at a defining moment in history.** Weather patterns are changing and will threaten food production, and sea levels are rising and could cause catastroph-

ic flooding across the globe. Countries must make drastic actions to avoid a future with irreversible damage to major ecosystems and planetary climate.

Nick Bistro, Professor at Oxford University ("**The Future of Humanity," 2007**), argues caution about the narrative of future as viewed by theologians and scientific assertions:

Traditionally, the future of humanity has been a topic for theology. All the major religions have teachings about the ultimate destiny of humanity or the end of the world. Eschatological themes have also been explored by big-name philosophers such as Hegel, Kant, and Marx. In more recent times the literary genre of science fiction has continued the tradition. Very often, the future has served as a projection screen for our hopes and fears; or as a stage setting for dramatic entertainment, morality tales, or satire of tendencies in contemporary society; or as a banner for ideological mobilization. It is relatively rare for humanity's future to be taken seriously as a subject matter on which it is important to try to have factually correct beliefs. There is nothing wrong with exploiting the symbolic and literary affordances of an unknown future, just as there is nothing wrong with fantasizing about imaginary countries populated by dragons and wizards.

Robert J. Burrows, an internationally known Australian scholar and peace activist and a man of humanity (“Extinction is Stalking Humanity”, Counterpunch: 07/26/2019), speaks of ready-made human threats to the earth and the greater environment. The global elite is deeply entrenched – fighting its wars, upgrading its nuclear arsenal, exploiting people, geoengineering the destruction of the biosphere, destroying the climate, invading/occupying resource-rich countries – and not about to give way without a concerted effort by many of us campaigning strategically on several key fronts. So strategy is imperative if we are to successfully deal with all of the issues that confront us in the time we have left. But do we have enough time on our side of the perpetuated ignorance to take any urgent remedial action?

In **‘Human Extinction by 2026?’** article I cited above, I referred to the use of geoengineering to wage war on Earth’s climate, environment and ultimately ourselves. See, for example, ‘Engineered Climate Cataclysm: Hurricane Harvey’ **and** ‘The Ultimate Weapon of Mass Destruction: “Owning the Weather” for Military Use’**.....**How have these threats come about? Essentially because the insane global elite, over the past thousand years, has progressively secured control over world affairs in order to maxi-

mize its privilege, profit and power, at any cost to the Earth and its populations (and now, ultimately, even its own members), successfully co-opting all major political, economic, corporate, legal and social institutions and those who work in these institutions – see 'The Global Elite is Insane Revisited' – while the bulk of the human population has been terrorized and dis-empowered to such as extent that our resistance has been tokenism and misdirected (almost invariably at governments). See, for example, 'Why Activists Fail'…..So here we stand. We are on the brink of human extinction (with 200 species of life on Earth being driven to extinction daily) and most humans utterly oblivious to (or in denial of) the desperate nature and time-frame of our plight.

Nick Bostorm (The Future of Humanity, 2007),calls for realistic observations and hopes for sustainable future-making.

We need realistic pictures of what the future might bring in order to make sound decisions. Increasingly, we need realistic pictures not only of our personal or local near-term futures, but also of remoter global futures. Because of our expanded technological powers, some human activities now have significant global impacts. The scale of human social organ-

ization has also grown, creating new opportunities for coordination and action, and there are many institutions and individuals who either do consider, or claim to consider, or ought to consider, possible long-term global impacts of their actions. Climate change, national and international security, economic development, nuclear waste disposal, biodiversity, natural resource conservation, population policy, and scientific and technological research funding are examples of policy areas that involve long time-horizons. Arguments in these areas often rely on implicit assumptions about the future of humanity. By making these assumptions explicit, and subjecting them to critical analysis, it might be possible to address some of the big challenges for humanity in a more well-considered and thoughtful manner.

If we, the people of globe are searching for facts of life and our inner-born relationship to the earth, the sun, the moon and the larger universe, we must analyze the pertinent facts not the opinions, objectively and responsibly. Most often scientific oriented scholars and thinkers proceed on argumentative analogy of the Nature of Things without a rational substance of understanding. But in reality there cannot be a comparative analogy between the observations of the human mind and the work of the Nature – The Divine Knowledge.

The Earth is a Trust to Mankind and is a Living Entity All the Time

We, the mankind live in a perfect and complex floating capsule (the Earth) consistently moving on its orbit around the sun and sustaining all forms and shapes of life (known and unknown) on earth. Its location and distance from the sun and other known planets is formed and shaped systematically and balanced and knowledge-based ordained since the ancient times imagined by the mankind. In a reasoned discussion, it is logically proven that the earth and the sun, the moon and other planets are essential to human life. They all support and enhance the living things in varied forms. Do we ever think how all this has come about? What makes the Earth to sustain all the living beings? How does Earth facilitate various forms and shapes of support to maintain all the living beings? How does the light originates from the sun and moon? Whose command governs the highly sophisticated functions systems of the earth, the sun and moon since billion of years? Human constructs of knowledge and intellect often neglect the imperatives of such essentials of life and survival on earth and across the universe. The ancient human cultures and civilizations lived in accord with the Nature of Things and excelled in peace and harmony to co-ex-

ist with the natural phenomena of recognition and submission. The 21st century of knowledge has come to be known as an age of contrasts and conflicts in beliefs, values and human intents.

Across the globe, we are alarmed to notice the horrifying impacts of global warming, depleting ozone layers, melting icebergs in Antarctica, extreme warm temperatures, excessive fossil fuel pollution, diminishing natural resources, oil spills across many oceans, shortage of clean air and water resources and continuous effects of technological advancements on the environment and toxic air we breathe. These problems stem from perpetuated ignorance and indifference to the knowledge-based understanding of the existence and working of the earth and the larger universe for the good of human life, change and progress of human civilizations. It is **vital to human comprehension that we the people of the Earth must know and realize – who we are, where we come from and what role do the living earth, the sun and the moon interactively play in preserving life and stability of our existence and working of varied galaxies in the universe.** This understanding could lead to appreciation of our natural bonds, preservation of the environment, balancing the utilization of natural resources and peaceful co-existence in global affairs for a sustainable future.

The amazing cosmic universe in view-Thanks to NASA

While discarding the human cynicism and philosophical reservations, there are common grounds and contrasts between religious beliefs and scientific approaches to look at the origin of life, the earth, the sun, the moon and other planets orbiting in the greater universe. In both thinking hubs, logic strives to find the truth and rational propositions to console the intellectual curiosity. But the laws governing the religious and scientific truth could demonstrate change and varied explanations to entertain the curious minds in all societal settings. However, science could pause in search of absolute truth but the Divine Revelations (religious beliefs) could search for absolute truthfulness and piety in all given situations. Intellectually and morally undeniable that when certain statements and dogmas are analyzed one must

prove the given proposition or theories to usher verifiable confirmation of truth. Scientific facts could be drawn from induction of facts of human life and conclusions must not be allowed to mix up the facts.

The earth we live on and breathe its air and all the necessities for human survival could be a subject of religious belief or it could be a paradox of philosophical reasoning. But there is no philosophical genius to claim being the creator or originator of the earth, the sun, the moon or other known galaxies. Challenging the philosophical perspectives, religious beliefs (The Divine Revelations - The Torah, The Bible and The Quran), claim that God is the originator and creator of the entire universe - visible and invisible. Often unwilling to break away from the man-made philosophical perceptions and notions, religious belief expose natural phenomena and undeniable truth about the origin of human life, the origin of the earth and other known planets in our solar systems. At times, reason overwhelms the human spiritual dimension and philosophical thoughts fail to imagine the reality of natural bonds between belief and human soul to flourish for peace and unity of the mankind.

Galaxies of Life and Curiosity to be explored in the Universe
Thanks to NASA

All of the religious based known teachings of the Divine Revelations **(The Torah, The Bible and The Quran)**, teach the unity of faith and mankind, peace and understanding about the origin of human life, the creation and working of the earth and larger universe in the solar system. Man and humanity unfold many tracks of physical, emotional, moral, psychological, mental and spiritual dimensions. All of these are important components of the body of human existence, progress and future-making. We cannot deny any of them as substantial truth and essentials for our moral, intellectual, physical and spiritual harmony to connect us with God – The Creator of Earth and Heavens. We, the people of knowledge and reason do realize that the earth, the sun, the moon and

the larger universe are all meant to serve the purpose of the most intelligent being on this planet – the human beings. This Divine favor encompasses our role and responsibility to administer it properly and be its guardian to protect its functionality without any reservations or prejudice to other beings. This is a Trust from God that we live on this earth and strive to appreciate its sustenance of life systematic working and future. In **Chapter 23: verse 72**, The Quran makes a vivid revelation:

"**We did indeed offer the Trust to the Heavens and the Earth**
And the Mountains but they refused
To undertake it, being afraid thereof:
But man undertook it;
He was indeed unjust and foolish."

We, the people of the world know and understand that the earth and mountains are creation of God and are in complete submission to His Commands without any will of their own or choice. It is assumed from the Divine Revelations that earth and heavens were created prior to the creation of man (human being). The earth, the heavens and mountains do not appear to have the faculty of choice that man does and exercises in all human affairs. At times, it could

be meant for symbolic interpretation by using the earth, the heavens and mountains to clarify to human minds.

It should be to the best interest of all the mankind to reflect on these phenomena and strike a balancing act of comprehension and better appreciation of the reasoned dialogue to find the meaning and purpose of life in relation to the earth and the splendid Universe that embodies our existence, present and future for the good of greater humanity and global accord. We, the people of the world are at a crossroad in making inference to human theories and the Divine facts when we ponder at the Nature of Things. The emerging challenges are outcomes of prevalent human ignorance as used being a point of reference and the denial of the Divine facts of life which constitute the existence and working of the Earth and all of the galaxies. There are pertinent issues which deserve immediate attention across the globe.

Nick Bostorm ("The Future of Humanity", 2007), elucidates how some of these critical issues which have been neglected by the scholarly writings:

Human extinction risks have received less scholarly attention than they deserve. In recent years, there

have been approximately three serious books and one major paper on this topic. John Leslie, a Canadian philosopher, puts the probability of humanity failing to survive the next five centuries to 30% in his book End of the World. His estimate is partly based on the controversial "Doomsday argument" and on his own views about the limitations of this argument. Sir Martin Rees, Britain's Astronomer Royal, is even more pessimistic, putting the odds that humanity will survive the 21st century to no better than 50% in Our Final Hour. Richard Posner, an eminent American legal scholar, offers no numerical estimate but rates the risk of extinction "significant" in Catastrophe. And I published a paper in 2002 in which I suggested that assigning a probability of less than 25% to existential disaster (no time limit) would be misguided. The concept of existential risk is distinct from that of extinction risk. As I introduced the term, an existential disaster is one that causes either the annihilation of Earth-originating intelligent life or the permanent and drastic curtailment of its potential for future desirable development.

Jeremy Griffith, An Australian Biologist outlines the rational to "**Save the World (2011)":**

The environment is promoted everywhere as the great 'Save the World' issue, BUT the truth is we have only been focusing on the symptoms of the devastation of our world and the disintegration of society that is happening everywhere we look, not the cause, which is us humans—our egocentric, competitive, selfish and aggressive behaviour. And the deeper truth is, to change that behaviour and, by so doing, truly save the world, we needed to find the reconciling, redeeming and thus rehabilitating biological explanation of our seemingly-highly-imperfect so-called HUMAN CONDITION! As the author Richard Neville so accurately summarized our species' plight: 'we humans are locked in a race between self destruction and self discovery' (Sydney Morning Herald, 14/10/86):

MOST WONDERFULLY, however, biology is now, at last, able to provide this long dreamed-of, exonerating and thus psychologically rehabilitating and human-race-transforming understanding of ourselves that will actually save the world! Yes, at the absolute eleventh hour for our species, the arrival of 'self discovery' finally and thankfully gives us the real means to defeat the threat of 'self destruction' and save the world!

What Do We Know about Earth as a Lifeline to Human Existence and Survival?

Thanks to NASA - the Universe We live-in

"(God) is the One Who spread out the earth and set therein mountains standing firm and rivers. For every fruit He placed two of a pair. He covers the day with the night. Verily in this there are Signs for people who reflect." (The Quran Chapter 13: verse 3)

"The earth, We spread it out and set therein mountains standing firm. We caused all kind of things to grow therein in due balance. Therein We provided you and those you do not supply with means of subsistence and there is not a thing but its stores are with Us. We do not send it down save in appointed measure." (The Quran Chapter 15: verses 19-20).

The existence and functionalities of Earth are a miraculous vitality to human life. Earth is enriched with water and air to sustain all forms of life - known and unknown. There are essential gases and air which sustain life and protect all external interventions on earth. The earth is connected to the sun and moon in a systematic Divine Order to support the livings creatures on earth. The sun and the moon are positioned at a measured distance to provide sun raises and light to all forms and shapes of creatures on earth. There is a systematic equilibrium and connectivity between the earth, the sun, the moon and all other known planets leading to believe that God Who created the earth, the sun, the moon and all other galaxies is One as God's Commands operate in systematic unity of all the galaxies. None of the working systems have ever failed – the earth, the sun, the moon and all the stars exist and their operations continuously assure the inhabitants of the earth for their survival and stability.

Earth is unique and so are its composition, orbiting rotation and systematic function within the solar system. It is covered in liquid water, sits within a habitable proximity to the warm glow of a sun and still retains an atmosphere capable of sustaining life. The sun, moon and vast array of stars littering the night

sky were all essential in generation and preservation of life on Earth. Earth is as perfect as it is a complex planet to be pondered at by all rational beings. If there was no earth, how could we might have existed and in what form or shape?

The oblate spheroid, or oblate ellipsoid, is an ellipsoid of revolution obtained by rotating an ellipse about its shorter axis. It is the regular geometric shape that most nearly approximates the shape of the Earth. A spheroid describing the figure of the Earth or other celestial body is called a reference ellipsoid. Earth is well equipped as a planet and ideally placed in our solar system and galaxy to support life as we know it. The product of some 4.6 billion years of cosmic construction, our planet is flush with life thanks to a fortuitous set of conditions. Earth is tilted with respect to the sun, and teeters as it spins.

- **Who commands the movement of the Planets?**
- **How do the systematic operations of the earth orbiting the sun and moon function and the distance maintain its continuity since the ancient times?**
- **Were the working of the planets and distance determined by some philosophical reasoning or the Divine authority to ensure systematic equilibrium in all the functions?**
- **Does Reason operates the functionalities of the Earth or is it the Command of God to ensure the miraculous operations since billion of years?**
- **Is it unreasonable to believe in the Divine Revelations and be the People of REASON?**

Earth's average orbital speed is about 30 kilometers per second. In other units, that's about 19 miles per second, or 67,000 miles per hour, or 110,000 kilometers per hour (110 million meters per hour). The earth rotates once every 23 hours, 56 minutes and 4.09053 seconds, called the sidereal period, and its circumference is roughly 40,075 kilometers. Thus, the surface of the earth at the equator moves at a

speed of 460 meters per second--or roughly 1,000 miles per hour.

The presence of small amounts of heat-trapping greenhouse gases in the atmosphere warms Earth's surface, resulting in a planet that sustains liquid water and life. Changes in climate conditions can affect the health and function of ecosystems and the survival of entire species.

View of the interconnected Planets -Thanks to NASA

Many ancient cultures and civilizations were surprised at the working of the earth, sun and moon supporting all the living creatures, even dictating religious beliefs, societal norms and artistic values and planning and development of civilizations. These heavenly bodies have also inspired philosophers,

provided direction to weary travelers navigating long journeys and deposited the very fabric of our existence.

Nearly 14 billion years ago, all matter, energy, space and time were unified as one, exploding outward in a violent, chaotic expansion at a speed that challenges contemporary scientific minds and understanding.

At its beginning, the cooling expansion of the hot, dense universe would allow for the formation of atomic nuclei to create molecules of hydrogen and helium, eventually giving rise to nebulae of gas that spawned stars, incandescent orbs of superheated gas. All of the heavier elements found on Earth, including those that compose the human body, were created in the cores of these brilliant, glowing stars. Without stars, the ingredients for planets and life would have never formed. No other star is more important to life on Earth than our Sun, the star that warms the planet and holds the Solar System together.

Our Earth - thanks to the New York Public Library

- **Why does the Earth Rotates against the Sun?**
- **Whose Command does it obey?**
- **Shall we, the intelligent human beings acquire the understanding or pass on without any reflection?**
- **Could the intelligent people ignore the working of intelligent things in the universe affecting the imperatives of human existence and survival?**

We, the people of Earth are standing and moving faster than the speed of sound. It could be hard to

imagine or believe it. But you were standing on solid ground, and not in the cockpit of a supersonic jet. At any given moment, we are all moving at a speed of about 1,674 kilometers an hour, thanks to the Earth's rotation and thanks to the Creator of the Earth.

By definition, the Earth's rotation is the amount of time that it takes to rotate once on its axis. The rotation is done in 24 hours. But there are two systems of rotation: for one, there's the amount of time it take for the Earth to turn once on its axis so that it returns to the same orientation compared to the rest of the Universe. Then there's how long it takes for the Earth to turn so that the Sun Earth's graceful 24-hour rotation rate is one of the traits that makes our planet so friendly to life, allowing most parts of Earth to stay a nice, comfortable temperature as they are bathed in sunlight during the day and darkness at night.

Each planet in the solar system has its own unique rotation rate. Why do Earth and the other planets rotate at all? Based on knowledge-based understanding, almost five billion years ago, our solar system had its beginnings as a vast cloud of dust and gas. The cloud began to collapse, flattening into a giant disk that rotated faster and faster, just as an ice skater spins faster as she brings her arms in. The Sun formed

at the center, and the swirling gas and dust in the rest of the spinning disk clumped together to produce the planets, moons, asteroids, and comets. The reason so many objects orbit the Sun in nearly the same plane (called the ecliptic) and in the same direction is that they all formed from this same disk.

Coming of the day and night unfolds immense reasoning for all kinds of living creatures on Earth. The orbiting of the Earth against the Sun is going on systematically for billions of years without any change. From night to day and day to night and changing of the climate, temperature, winds, seasons, air, clouds, water and resources for sustenance of all forms of the living on earth. Is it a miraculous phenomena or a reality to understand its implications for all the living beings on earth?

Changing of Day and Night Brings Life to all Living Beings

Earth completes its rotation at the axis in 24 hours. To an observer cooling down on the North Pole, the rotation appears counterclockwise. From nearly all points on Earth, the Sun appears to move across the sky from east to west each day. Of course, the Sun is not moving from east to west at all; Earth is rotating. The Moon and stars also seem to rise in the east and set in the west.

Earth's rotation means that there is a cycle of daylight and darkness approximately every 24 hours, the length of a day. Different places experience sunset and sunrise at different times and the amount of time a location is in daylight and darkness also differs by location. The Sun provides light for us during the day. The Moon provides light for Earth at night; the Moon gets its light from the reflection of light from the sun. It is like the Moon and Earth are having a race. The Earth moves 45 million miles around the Sun, while the Moon still has to catch up to orbit the Earth.

The sun, earth, and moon are held together by gravity, and they interact in lots of ways. The moon orbits the earth because of the pull of the earth. ... The tides are another interaction in the sun-earth-moon system. The tides happen because the moon and sun pull on the oceans, causing them to rise and fall each day.

The Quran explains the perpetual rotation of day and night. In contemporary scientific world, it is understandable to grasp this notion as we know the sun's relative immobility and Earth's rotation as vital signs for the thinking people:

"And a sign for them (human beings) is the night. We strip it of the day and they are in darkness."(Chapter 6: verse 37)

"Hast thou not seen how God merges the night into the day and merges the day into the night." (Chapter 31: verse 29).

We, the people flourish in an environment of natural make-up but hardly imagine about its natural composition and how it sustains our breathing, our life and our very existence. Is it a chance or is it a plan that operates the earth and all its embodiments? Who placed the earth, the sun and the moon to a perfect order of orbiting? Who ordered the balanced measurement of distance between the earth, the sun and the moon? How come the earth, the sun and the moon never collide with one another? Who main-

tains the orbiting speed of the earth, the sun and the moon? To enhance our understanding we must possess the essential knowledge and awareness of the natural setting in which we live.

Across the varied spectrum of human thoughts hardly any thinking people reflect upon the existing and continuous balanced environmental gases which sustain the living creatures on earth. Our environment contains 78% nitrogen, 21% oxygen, 0.97% argon and carbon dioxide 0.04% and the air safeguards the atmosphere and life on earth by absorbing ultraviolet solar radiation and reducing the temperature extremes in constantly and systematic changing of days and nights. Who is maintaining the balanced order in keeping the exact percentage of all the gases?

There are numerous philosophical reasoning but no proven truth about the origin of all the planets in our universe. To explain and reason with the Divine Revelations (The Torah, The Bible and The Quran), it could help the mankind for an appreciable understanding of all the concerns. In our search for knowledge-based rational understanding, we could view the Divine Revelations having compatibility with most of the modern scientific explanations and interpretations on the origin of Earth and Heavens.

The Divine Revelations and the Creation of Earth and Heavens

And such are the Parables; We set forth for mankind. But only those understand them who have knowledge. God created the heavens and the earth in true (proportions). Verily in that is Sign; For those who believe. (The Quran Chapter 29: 43-44).

The parables could be simple but enriched with profound meaning and purpose to be ascertained by pondering at them. In God's creation, there is strong evidence of intelligent purpose of life and wisdom. These are like the beckoning signals to understand and to satisfy human conscience who try to discover the eternal truth and those who pray in search of knowledge and faith just as in **Cardinal Newman's Hymn: "Lead kindly Light! Amid the encircling gloom, lead Thou me on!**"

We, the people are equipped with reason and reason needs logical explanation. Our resources of knowledge, perceptions and intellect are grounded in the tenets of harmonious meaning and purpose of life. How was the earth created? The Bible and the Quran speak of six days or periods (the exact nature and definition of this time-frame is unknown to hu-

man intellect), for the creation of the Heavens and Earth.

In Chapter 32, verse 4 and many other chapters describe the facts: **"God is the One Who created the heavens and the earth and what is between them in six periods."** In Chapter 2, verse 29, the Divine truth clarifies: **"(God) is the One Who created for you all that is on the earth. Moreover He turned to heaven and fashioned seven heavens with harmony. He is full of knowledge of all things."**

Many scholars identify varied forms of life (known and unknown) that exist in the Heavens, Earth and things between the Heavens and Earth.

In Chapter 50, verse 4, explains: "We created the heavens, the earth and what is between them in six periods and no weariness touched Us."

Chapter 21, verse of the Quran speaks of the orbiting Sun and Moon:

"**(God is) the One Who created the night, the day, the sun and the moon. Each one is traveling in an orbit with its own motion."**

Views of Earth from Apollo 8 - Thanks to NASA

The Vitality of Earth to Human Life

Earth is well equipped as a planet and ideally placed in our solar system and galaxy to support life as we know it. The product of some 4.6 billion years of cosmic construction, our planet is flush with life thanks to a fortuitous set of conditions. Earth is tilted with respect to the sun, and teeters as it spins.

Earth is living and it sustains all forms of life and so is the splendid Universe. The earth and other planets rotate around the sun. It is estimated that the earth is approximately 93 million miles away from the sun. At any given moment, we are all moving at a speed of about 1,674 kilometers an hour, thanks to the Earth's rotation. Earth's average orbital speed is about 30 kilometers per second. In other units, that's about 19 miles per second, or 67,000 miles per hour, or 110,000 kilometers per hour (110 million meters per hour).

The earth rotates once every 23 hours, 56 minutes and 4.09053 seconds, called the sidereal period, and its circumference is roughly 40,075 kilometers. Thus, the surface of the **earth** at the equator moves at a speed of 460 meters per second--or roughly 1,000 miles per hour.

Why Do the Earth and other Planets Rotate?

It will help to understand how our solar system formed. Almost five billion years ago, our solar system had its beginnings as a vast cloud of dust and gas. The cloud began to collapse, flattening into a giant disk that rotated faster and faster, just as an ice

skater spins faster as she brings her arms in. The Sun formed at the center, and the swirling gas and dust in the rest of the spinning disk clumped together to produce the planets, moons, asteroids, and comets. The reason so many objects orbit the Sun in nearly the same plane (called the ecliptic) and in the same direction is that they all formed from this same disk.

While the planets were forming, there was not much peace in our solar system. Clumps of matter of all sizes often collided, and either stuck together or side-swiped each other, knocking off pieces and sending each other spinning. Sometimes the gravity of big objects would capture smaller ones in orbit. This could be one way the planets acquired their moons.

In Chapter 21, verse 33, The Quran explains:

"(God is) the One Who created the night, the day, the sun and the moon. Each one is traveling in an orbit with its own motion."

Perhaps contemporary science and scientific curiosities would appreciate the Divine revelation pertaining to the creation of Earth, Heavens and the Universe in a broader context:

The Quran, Chapter 2, verse 22:

(God) is the One who made the earth a couch for you and the heavens an edifice, and sent down water from the sky. He brought forth therewith fruits for your sustenance. Do not join equals with God when you know."

Thanks to NASA

Again in the **Chapter 2, verse 164**:

Behold! In the creation of the heavens and earth,

In the disparity of night and day,

In the ship which sail upon on the sea for the profit on mankind,

In the water which God sent down from the sky thereby reviving the earth and its death,

In the beasts of all kinds He scatters therein,

In the changing of the winds and the subjected clouds between the sky and earth, Here are Signs for People who are wise."

In **Chapter 67, verse 15**:

(God is) the One Who made the earth docile to you. So walk upon its shoulders! Eat of His sustenance! Unto Him will be the Resurrection.

The Universe is engulfed with wrong human thinking, dysfunctional organizations, secret weapons and nuclear disasters and global warming of course is a time bomb in waiting. At a time of hegemonic global politics, hegemonic puzzles are not the workable substance for rational solutions.

In his commentary on the Quran, Abdullah Yousef Ali provides a synoptic narrative of the Chapter 23 on "The Believers":

The Brotherhood of Truth is one in all ages. It is narrow men who create sects. Let them not think that the goods of this world can shield them from evil or its consequences. God's Truth and His Messengers can be known to all: for He in is His Mercy. Has given us faculties and judgment, if we would but use them. The message is not New: all Creation proclaims it: High above all is the Lord of Glory Supreme.

In **Chapter 2: verse 213 (The Quran),** The Divine Message outlines the oneness of the origin of mankind. **Could these parables enjoin the basis of futuristic unity of One Humanity?**

Mankind was one single nation

And God sent messengers with glad tidings and warnings;

And with them He sent The Book in truth,

To judge between people in matters wherein they differed;

But the People of the Book after the clear Signs came to them, did not differ among themselves,

Except through selfish contumacy.

God by His Grace guided the Believers to the Truth,

Concerning that wherein they differed.

For God guides whom He will to a path that is straight.

To Reflect on Human Ingenuity versus Scientific and Technological Risks of Future-Making

We the People, We, the Humanity are continuously governed by abstract notions, wrong ideals and passions to misunderstand our own existence, our origin, our natural bonds of connections to the Earth

and the larger Universe. To strike a balancing and sustainable relationship with the Nature of Things, we the people of the Earth must reflect and remind ourselves how we are created, what is purpose of our life and what constitutes our physical and spiritual components to lead a happy and cherished individual and collective societal sustainability. There is a rational and perfect balance in our physical, mental and spiritual constitution of human existence.The human infrastructure is made of innumerable and highly specialized systematic components interconnected and synchronized to perform a well organized system of life. Our body, our thinking and intelligence imagination, speaking, our muscular system, the breathing system, the digestive system, skin, the respiratory system, the nerve system, the urinal system, sensing of taste, smell, hearing, vision and feelings. These functional systems have not been designed by men and women or the institutions of political governance, parliaments and other law-making entities of governance and other man-made institutions. They all work harmoniously and miraculously and deserve to be considered more thoughtfully as wonders of God - The Creator of the all Things. More often, we obsessed with material engagements that we overlook the reality of our physical and spiritual existence.

How does our mind - one vital component of our functional existence transform information and practical experiences into knowledge –based perceptions and instincts? The mind is the focal instrument an embodiment of essential comprehension but we hardly know about its functions. How do we figure our personal thoughts, words, meanings, events and pictures to make sense in a rational context? More we ponder at our composition and excellence of operations, more surprised we end up in gathering about our existence. If we exercise the courage and intent to learn more about ourselves and the things around us, it will be of great help to balance our life and viable future-making.

Ralph Emerson writing on "**Nature**" (**Cliff Notes- "Thoreau, Emerson and Transcendentalism"),** points out why we the humanity are morally and spiritually divided and incoherent: **According to Emerson, people in the past had an intimate and immediate relationship with God and nature, and arrived at their own understanding of the universe. All the basic elements that they required to do so exist at every moment in time……Spiritualization, hastened by inspired insight, will heal the fragmentation that plagues us. Emerson writes in "Prospects": "The reason why the world lacks**

unity, and lies broken and in heaps, is because man is disunited with himself. He cannot be a naturalist, until he satisfies all the demands of the spirit." By drawing upon our latent spiritual capabilities and seeking evidence of God's order in nature, we will make sense of the universe…….Throughout *Nature*, Emerson uses analogy and imagery to advance the concept of universal unity.

- Man and humanity exist within the bounds of Nature and History. To enhance a proactive progressive vision and ideals, we must be connected to the objective reality of our origin, aims and purpose of human life to respect, adore and protect equality of human rights and dignity, economic opportunities, justice and sense of One Humanity living in One World.
- Man and humanity are composed of material and spiritual components of life. To be happy and productive in our life struggle, we should seek a balanced relationship between the material and spiritual factors of life.
- Man and humanity have a natural bond with all the living creations on earth. Logic demands that man and humanity must possess the knowledge and understanding of this intricate relationship to be at peace with the Nature of Things.

- If and when man and humanity ignore or reject the Laws of Nature, they generate self-geared contradictory problems that could best be described as conflicts of wrongful human thinking and behavior.

The Australian biologist **Jeremy Griffith** ("**Save the World,"** 2011), highlights some of the contemporary issues: **So, what is the all-important, reconciling, exonerating and thus psychologically rehabilitating, makes-us-'whole', human-race-transforming, biological 'true understanding' of our often ferocious and destructive competitive, selfish and aggressive human condition that alone has the power to actually save the world?**

Unable—until now—to truthfully answer this deepest and darkest of all questions of our seemingly-highly-imperfect, even 'fallen' or corrupted human condition, of are we humans fundamentally good or bad, we have used denial as our only means of coping with the whole depressing subject; so much so, in fact, that the human condition has been described as 'the personal unspeakable', and as 'the black box inside of humans they can't go near'. Indeed, the famous psychoanalyst Carl Jung was referring to this terrifying dilemma of the human condition when he

wrote that 'When it [our shadow] appears…it is quite within the bounds of possibility for a man to recognize the relative evil of his nature, but it is a rare and shattering experience for him to gaze into the face of absolute evil' (Aion in The Collected Works of C.G. Jung, Vol. 9/2, p.10). Yes, the 'face of absolute evil' is the 'shattering' possibility—if we allowed our minds to think about it—that we humans might indeed be a terrible mistake!

So, while the human condition has been the real, underlying issue we needed to solve if we were to exonerate and thus rehabilitate the human race and save the world, we have been so fearful of the issue that instead of confronting it and trying to solve it we have been preoccupied denying and escaping it. The truth is, rather than an attempt to save the world, focusing on the environment was a way of avoiding the issue of 'self'; it was a way of relieving ourselves of the real issue of our troubled human condition through finding a cause that made us feel good about ourselves—as the editor of Time magazine, Richard Stengel, recognized, 'The environment became the last best cause, the ultimate guilt-free issue' (Time Magazine. 31 Dec. 1990). …**Our ability to truly save the world depended on finding redeeming and thus psychologically ameliorating, truthful, real understanding of** ourselves**.**

Ralph Emerson on the **"Nature"**(Cliff Notes- "**Thoreau, Emerson and Transcendentalism"),** and the Unity of God, Man and the Universe:

Throughout *Nature*, Emerson calls for a vision of the universe as an all-encompassing whole, embracing man and nature, matter and spirit, as interrelated expressions of God. This unity is referred to as the Over soul elsewhere in Emerson's writings. The purpose of the new, direct understanding of nature that he advocates in the essay is, ultimately, the perception of the totality of the universal whole. At present, Emerson suggests, we have a fragmented view of the world. We cannot perceive our proper place in it because we have lost a sense of the unifying spiritual element that forms the common bond between the divine, the human, and the material. But if we approach nature properly, we may transcend our current focus on isolated parts and gain insight into the whole. Emerson does not offer a comprehensive scheme of the components and workings of God's creation. Instead, he recommends an approach by which we may each arrive at our own vision of totality.

Emerson asserts and reasserts the underlying unity of distinct, particulate expressions of the divine. In the Introduction, he emphasizes man's and nature's parallel positions as manifestations of the universal order, and consequently as means of understanding that order. He elaborates upon the origins in God of both man and nature in "Discipline," in which he discusses evidence of essential unity in the similarities between various natural objects and between the various laws that govern them:

Each creature is only a modification of the other; the likeness in them is more than the difference, and their radical law is one and the same. Hence it is, that a rule of one art, or a law of one organization, holds true throughout nature. So intimate is this Unity, that, it is easily seen, it lies under the undermost garment of nature, and betrays its source in universal Spirit. Could the human intelligence fail at certain level of predictability of the future and let the nuclear radiation destroy all that human civilizations have built over the centuries?

History provides enough food for thought: how many of the previous human dynasties and political powers have ended-up by natural causes of de-

struction. Emerging crises deserve careful scrutiny and critical thought from those capable to think and reflect at the Nature of Things. The Divine Revelation warns us ahead of time with certain element of predictability how human inventions such as the nuclear technology, unknown space weaponry and superficial intelligence and its by-products could work against the human race and its sustainable future. As in the Bible warnings, **The Quran** (**Chapter 52: 27**), narrates how righteous people will be protected at the end of the world: **But God has been good to us and has delivered us from the Penalty Of the Scorching Wind (fire).**

Of equal importance is another warning narrated in Chapter 73: 14, and 17-18 how the visible conditions of the seen world will change against the predictability:

One Day the earth and the mountains will be in violent commotion.

And the mountains will be as a heap of sand poured out and flowing down; Then how shall ye, if ye deny (God). Guard yourself against a Day that will make Children hoary-headed? Whereon the sky will be cleft asunder? His Promise needs must be accomplished.

Reality lives in its own sphere of appearance and existence and the thinking people of the world cannot ignore its implications on the on-going visible destruction of the systematic working of the earth and other objects in the solar system and vitality of human survival and future-making. **Professor Bostrom of Oxford University** ("**The Future of Humanity", 2007**), takes initiatives to share penetrating comments for the future of humanity within the context of man and its relationship to the Universe: **The future of humanity as an inescapable topic:**

Extinction risks constitute an especially severe subset of what could go badly wrong for humanity….The greatest extinction risks (and existential risks more generally) arise from human activity.

Environmental threats seem to have displaced nuclear holocaust as the chief specter haunting the public imagination. Current-day pessimists about the future often focus on the environmental problems facing the growing world population, worrying that our wasteful and polluting ways are unsustainable and potentially ruinous to human civilization……. There have been a number of attempts by scholars to explain societal collapse – either as a case study

of some particular society, such as **Gibbons'** classic **Decline and Fall of the Roman Empire**– or else as an attempt to discover failure modes applying more generally. Two examples of the latter genre include Joseph Tainter's Collapse of Complex Societies, and Jared Diamond's more recent Collapse: How Societies Choose to Fail or Succeed…….

……The greatest extinction risks (and existential risks more generally) arise from human activity. Our species has survived volcanic eruptions, meteoric impacts, and other natural hazards for tens of thousands of years. It seems unlikely that any of these old risks should exterminate us in the near future. By contrast, human civilization is introducing many novel phenomena into the world, ranging from nuclear weapons to designer pathogens to high-energy particle colliders. The most severe existential risks of this century derive from expected technological developments. Advances in biotechnology might make it possible to design new viruses that combine the easy contagion and mutability of the influenza virus with the lethality of HIV. Molecular nanotechnology might make it possible to create weapons systems with a destructive power dwarfing that of both thermonuclear bombs and bio-warfare agents. Super intelligent machines might be built and their ac-

tions could determine the future of humanity – and whether there will be one. Considering that many of the existential risks that now seem to be among the most significant were conceptualized only in recent decades, it seems likely that further ones still remain to be discovered.

Of all the creations on earth, human beings are the most important entity and equipped with knowledge and intelligent capacity to recognize and appreciate the favors given by the Creator of the entire Universe. The essence of this value comes from moral and spiritual imperatives which embody the human cultures and civilizations. Ignoring its vitality could be interpreted as a tyranny on human thoughts and soul. A tyrant (human being) discards all feelings of human rights, dignity and honor and drains out all the positive skills and abilities for change, progress and human emancipation. Most often tyranny destroys all standards and values of noble concepts and values as they pose a threat to its aims and implications.

What does the embracement of faith (belief in religious values), signify in the real world of human affairs? If one holds the faith that the earth, the sun, the moon and all other galaxies in the solar system have

a meaning and purpose linked to the existence and purpose of all forms of life on earth, it could help to establish a natural linkage to the Creator of the Universe. The ultimate outcome could discard the narrow mindedness of few notions and expose the life to a greater and larger meaning and purpose in world affairs. This could also help to uplift the innermost thoughts and desires to elevate human standards and values above the servitude to other human beings and linkage to eternal truth of being One Humanity. This could enjoin the true meaning of freedom and enhance human conscience of being a truly intelligent being with a defined purpose of life. Variably, any concept or man-made theories which deny the originality of life and human beings as a supreme creation of God, expounds a dishonorable origin to human beings disregarding the relationship to God, in reality invents derogation of the origin of human life and character as inferior being just like the other animals. This approach brings into question the Darwinian theory of human origin as often preached by some scholars and other thinkers lacking the true understanding of the Divine knowledge on this subject. Faith contributes positive motivation and value in human nature and its practices. It facilitates a sense of natural harmony between man, the universe and the Creator.

Chris Hedges (**"How to Save the Planet and Ourselves",** Information Clearing House: 11/18/2019), is an international journalist and widely recognized humanist shares the following alarming concerns on the planet and how to save our future: We must reduce carbon emissions by 40% in the next 12 years to have a 50% chance of avoiding catastrophe, according to a report last year by the Intergovernmental Panel on Climate Change (IPCC). But the ruling elites, as expected, ignored the warning or mouthed empty platitudes. CO_2 emissions increased by 1.6% in 2017 and by 2.7% in 2018. Carbon dioxide levels went up by 3.5 parts per million (ppm) last year, reaching 415 ppm. We are only a decade away, Hallam warns, from 450 ppm, the level equivalent to a 2-degree Celsius average temperature rise.

"Let's be frank about what 'catastrophe' actually means in this context," Hallam writes. "We are looking here at the slow and agonizing suffering and death of billions of people. A moral analysis might go like this: one recent scientific opinion stated that at 5°C above the pre-industrial mean temperature, we are looking at an ecological system capable of sustaining just one billion people. That means 6-7 billion people will have died within the next generation or two. Even if this figure is wrong by 90%, that means 600

million people face starvation and death in the next 40 years. This is 12 times worse than the death toll (civilians and soldiers) of World War Two and many times the death toll of every genocide known to history. It is 12 times worse than the horror of Nazism and Fascism in the 20th century. This is what our genocidal governments around the world are willingly allowing to happen. The word 'genocide' might seem out of context here. The word is often associated with ethnic cleansing or major atrocities like the Holocaust. However, the Merriam-Webster dictionary definition reads 'the deliberate and systematic destruction of a racial, political, or cultural group."

Immanuel Kant (**Idea for a Universal History from a Cosmopolitan Point of View, 1784**), one of the most reputable German philosophers and international thinker of 'Perpetual Peace', outlines the problematic inner consciousness of man and humanity:

"**The greatest problem for the human race, to the solution of which Nature drives man, is the achievement of a universal civic society which administers law among men. The highest purpose of Nature, which is the development of all the capacities which can be achieved by mankind, is attainable only in society, and more specifically in the**

society with the greatest freedom…..The history of mankind can be seen, in the large, as the realization of Nature's secret plan to bring forth a perfectly constituted state as the only condition in which the capacities of mankind can be fully developed, and also bring forth that external relation among states which is perfectly adequate to this end."

Grieving humanity across Gaza-Palestine

Chapter 4:
Peace and Conflict Management:
Russia-Ukraine and the West Needs a Dialogue for a Humanitarian Strategy to End the War not Perpetuated Animosities

Mankind is being Traumatized for its Hopes for Peace and Sustainable Future

The trajectory of peace and war between Russia, Ukraine and the West unfolds the pursuit of unbridled ambitions and insane geopolitics at the height of cheap military triumphs and fame. The egoistic class of leaders operating global institutions claim "suc-

cess" by rape of earth, destruction of human habitats and bellicose chauvinism without any accountability. The unending war fast became an economic warfare – accelerated weapons sales to warring parties and money making. The Transcend Media Service - Norway (8/21/23), reports that the "**top 5 US weapon contractors made US$196B in 2022.**" The inept leaders lack humanitarian consciousness of peace and conflict management and are well paid and well fed to have distorted the criterion of basic human values, morality if any, and standards of being honest. They solely rely on making bogus statements of peace and conflict management for public consumption. It is evidence of tragic abnormality and much evil and less goodness in the 21st century global affairs - an amassed collection of unthinkable junk history. If the leaders were honest, they should have faced the current challenges. If President Putin and President Erdogan (Turkey) could meet in Sochi to discuss the grain deal and prospects for peacemaking, surely, if the US and NATO and the EU wanted conflict resolution and peace could open a dialogue with Russia and China.

The on-going war in Ukraine and its wide range of global ripple effects – from the supply of gas, oil, grain deals, collaborative ventures in peaceful di-

alogue and the lingering suspicion of the threat of tactical nuclear weapons - all echo degradation of human values and soul, exhibit intellectual failure, universal chaos and socioeconomic miseries of innumerable multitude. Time and history are not going to wait for the few insane outrages, phony statements on human deaths and destruction unless we take this challenge in its time and opportunity to make things happen for change and for the best of all mankind.

We should not wait for the end game to watch global leadership failure but being the People of Reason call for the formulation of a global forum of peace and unity and to plan for peace and conflict resolution between Ukraine and Russia and elsewhere in the world.

Imperatives of Meeting of Minds: Conflicts, the Earth and Human Consciousness

A rational conflict analysis and search for peace involves listening and learning to divergent viewpoints and finding a common place of reasoning without agreeing or disagreeing to halt the warfare. This shows effective communication and enlightened leadership traits. Modern technologically advanced wars kill people; destroy the Earth and its systematic working, human habitats and its ripple impacts

entrap the future generations in psychological and intellectual captivity and dehumanization. Strangely enough, none of the Western leaders – be it the US, NATO or the EU had fostered a vision for a dialogue with Russia and China or to forge understanding for a peaceful resolution of the conflict.

Could we humankind count the blessings of God to maintain life for millions and billions of years on this planet? All things exist in a mathematical order, whether we recognize it or deny it. So strange, we know all about other material things and scientific - technological developments but we are ignorant and arrogant to learn about our own origin and existence on a living planet. Are we human beings intelligent enough to know about our own existence and Purpose of Life? How could we imagine peace and harmony among ourselves when we bomb and destroy each other with weapons of destruction as if we were not the human kind but some kind of animals without any sense of rational thinking? **The Earth is a living entity and is meant for us - the human beings.**

In all ages, people and nations claiming to be the most powerful and transgressors manipulating the Earth and humanity were destroyed by the Laws of God – natural causes. Have you not walked on the

earth to learn how most powerful nations of the past were destroyed by the Will of God – asks the Divine Revelations? We, the People live in a splendid Universe in which planet Earth floats ordained by the commands of God. We are moral beings unlike animals that possess the eyes, ear and other senses but cannot draw logical conclusions from their senses. There is a moral sense of spirituality and humanity to co-exist in harmony with the rest of all creations on this Earth.

Have You Ever Thought How the Day-Night Alternates Systematically to Serve Mankind?

"**Behold! In the creation of the heavens and the earth, and the alternation of Night and Day - There are indeed Signs for men of understanding." (The Quran: 3: 190).**Do you know who else other than God determined the Earth spinning of 1670 km per hour? Who else than God ordained it to orbit the sun at 107,000 km per hour? And who else than God made it to spin at 28,437 km per hour at the equator?(**https://www.newscientist.com/question/fastearthspin/#ixzz7C8p37S9X**). Be aware that earth average distance to the Sun is about **93 million** miles (**105 million km**); the distance of Moon from Earth is currently **384,821 km** equivalent to

0.002572 Astronomical Units and if the distance between the Earth-Sun and the Earth-moon were ever to change, there will be no sign of life, human civilizations or habitats left on Earth. **You as human being as One Humanity has one origin - why can't we co-exist in peace and harmony?**

Are the Global Leaders Ignorant of People's Aspirations for Peace?

If the Russian, American, Ukrainian and NATO's leaders are honest, proactive and accountable to the global community, they would urgently need new creative strategic thinking to cope with multiple layers of political conflicts and humanitarian crises and to find peaceful and workable solutions away from the entrenched political box of the few global warmongers. **Recently, this author proposed a strategic framework of dialogue for peace to global leaders to resolve the conflict :**

https://www.uncommonthought.com/mtblog/archives/2023/07/26/conflict-beyond-reason-a-dialogue-to-end-the-war-is-desperately-needed.php
https://www.uncommonthought.com/mtblog/archives/2022/06/22/global-conflict-management-why-cant-russia-nato-the-eu-and-ukraine-make-peace.php

The challenging truth arising from the emerging conflicts and leadership failure calls for rejection of the violent assumptions of militarization and egoistic triumphs by acts of genocidal plans. We, the People of global humanity, ask the conscientious leaders to listen to the voices of reason for an immediate cease-fire between Russia-Ukraine and stop the acceleration of military confrontations on all fronts.

Caitlin Johnstone, an Australian critical thinker and a housewife, spells out a prevalent scenario: **("Always Opposing Past Wars But Never The Present One." Information Clearing House: 8/30/23):**

One day it will be permissible to say in mainstream circles that it was wrong for the US empire to deliberately provoke the war in Ukraine and keep it going as long as possible to bleed Russia, but it's taboo to say that now, because the empire hasn't yet accomplished all its goals in Ukraine.

Despite the sketchy illusions of freedom, democracy, human rights, liberty and justice, we are encroached, stuffed and at terrible risk of annihilation more by error of judgment than planned scheme of things by Man against Man.

People of Ukraine and global humanity want an end to the war-
photo thanks to Orthodox Church Ukraine

Chapter 5: Conflict Beyond Reason: the NATO, Russia, the EU and Ukraine Urgently Needed New Thinking to End the War

The re-election of Donald Trump as America's 47thPresident sends alarming bells across Western Europe and casts critical unpredictability on the EU and its relationship with the US. Some EU members hurriedly called a meeting in Hungary to discuss Trump's futuristic policies and practices for the security of Europeans and cooperation under NATO. They remain uncertain about the future until it comes into effect. The NATO summit at Vilnius, Lithuania ended without any tangible move for peacemaking. It was more a show of compelling solidarity to enlarge and sustain the conflicts between Russia, Ukraine and NATO professing to be peacemakers. Out of nowhere, the Wagner group offered some unexpected hope for disruption to many Western protagonists of

conflict but it demonstrated Russian leadership capacity to manage an unthinkable conflict situation with ingenuity and without much loss of political integrity. Perplexed American and NATO leaders were stunned and speechless how Russia could overcome a difficult internal crisis that they wished to destabilize Russia. In every age and time egoistic leaders have pushed humanity to wars and the dehumanization process ending from NOTHING to NOTHING.

When would the morally and intellectually conscientious leaders learn from history that wars are not the solution to man-made conflicts. In a snap shot, beleaguered Ukraine and Russia are entangled in a proxy war across many conflicting time zones encompassing loss of time, human lives, energies, economic devastation, destruction of earth and its systematic natural setting spilling over to loss of a sustainable future for the rest of mankind. Both sides implying military dictum to tackle differences of human thoughts, geopolitical interests and priorities for future-making. Is it a perpetuated ignorance of pertinent facts of life or is it a deliberate surge to silence human wisdom for change and global harmony? When facts of life warrant a change, intelligent leaders take steps to bring change for the best of national interests.

There is a fearsome and ferocious flow of military actions and reactions causing tragic human casualties that could inundate all norms of morality and civilizations plunging us to timeless darkness. Do the leaders know what they are doing or are they all delusional by nature? **We, the People** of knowledge speak logically about the **Nature of Things affecting lives and our hopes for future. R.J. Rummel (Understanding Conflict and War: "Principles of Conflict Resolution"),** makes the following observations:

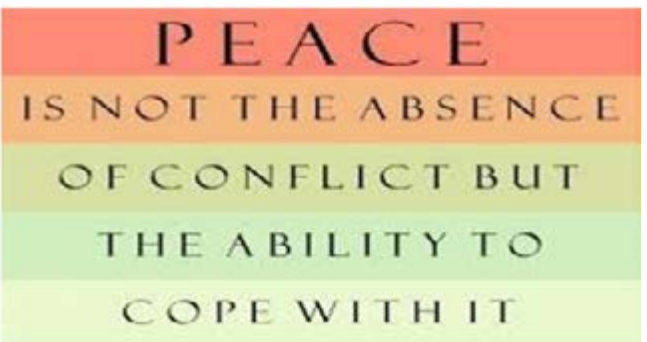
If extreme conflict or violence over a status quo erupts, the central problem is to achieve a new, just balance with minimum conflict. Whether from the perspective of a partisan or third party, the Peacemaking Principle is this:

You make peace by balancing powers.

Conflict over the status quo is a breakdown of what people and groups want and can and will do. It is a balancing of different powers. To make peace, then, is to achieve a balance of powers--an interlocking of mutual interests, capabilities, and wills. The means to accelerate or facilitate this process must therefore be focused directly on the balancing of these elements or the conditions influencing them.

The emerging conflicts between the old cold war era enemies represent amassed collections of deep mistrust, hatred and temptation of historic disorder to victimize the rest of mankind. There is no leadership vision and workable plan on table to change the course of contemporary tragic events, massive deaths and destruction as morality and human intellect continue to decline for a navigational change – for an immediate ceasefire to imagine a workable peace deal.

They All Manifest Wrong Thinking for the Wrong Reasons Destroying Earth and Human Civilizations



A rational conflict analysis and search for peace involves listening and learning to divergent viewpoints and finding a common place of reasoning without agreeing or disagreeing to halt the animos-

ities. This is effective communication and enlightened leadership traits to imagine peace outside the box. The mankind is fraught with sorrows and fear of unknown animosities and daily killings and displacement thinking process, a society - a nation no matter how normal claims to be, cannot function as normal beings to co-exist with their own self, the surroundings - in human culture and make any positive contributions to sustainable change and progress. The US, NATO, the EU, Russia and Ukraine are stuck in this seamless but vicious entanglement. Ironically, desperation could aggravate anyone to use tactical nuclear weapons unilaterally with global catastrophic consequences. Russian-Ukraine grain deal is suspended and Ukraine is increasingly being targeted with drones and civilian destruction. In a rational context, why can't this absurd war be stopped?

In all ages, people and nations claiming to be the most powerful and transgressors manipulating the Earth and humanity were destroyed by the Laws of God – natural causes. Many empires and egoistic leaders went this natural route of meeting their ends. We, the conscientious people of the globe possess rational understanding of an equilibrium and balanced relationship between Man, Life and God-given living Universe in which we all reside. **We, the People of**

knowledge wonder who else except God created life, the Earth and the living Universe floating in space well balanced and functional since time immemorial.

Global Warriors Besiege We, the People in Draconian Conflicts

For almost three years of the on-going catastrophic conflict between NATO, Russia, the EU and Ukraine being a victim exposes absurdities and contradictions for their strategic interests. Russia had plans to react with massive forces to destroy Ukraine and limit the affluent NATO for its futuristic militarization plans. The leaders having unbridled ambitions and power unleash violent assumptions of hatred, secret intrigues and animosities and killings overwhelm the daily thinking process, a society - a nation no matter how normal claims to be, cannot function as normal beings to co-exist with their own self, the surroundings - in the human culture and make any positive contributions to human change and progress. While truth telling is ridiculed , maligned and persecuted, global leaders pushing war as a means of peace and war economy are like scum floating on a torrent. Despite hollow claims of peace and moral values, no moral and ethical behavior is seen in the

sudden and inexplicable plunge to human wickedness. *Even the warmongers cannot predict what the end game is going to be. Evil happens when conscientious men do nothing. God created the Heavens and Earth as a trust to fulfill all human aspirations and to flourish human generations since time immemorial. It was not meant to be bombed and destroyed by sheer ignorance and wickedness. Are we neglectful of our origin and encompassed reality?*

Human glory lives in the conception of good and righteousness, not warriors of economic wars, robotic machines, weapons of destruction or agents of political terrorism. We are moral beings enriched with inner consciousness and vision for peace, human unity and sustainable future. It is a Hobbesian formula: "war of all against all."The on-going war between Russia, NATO, the EU and Ukraine has far reaching impacts on imperatives of life across the globe. German philosopher Immanuel Kant ("Perpetual Peace", 1795), was more proactive and realist when he noted that: "Intellectuals must be seated in chosen assemblies and systems of public governance to overt individualistic insanity against the people." But the vices and moral weaknesses of leaders are not invincible as ignorance and animosities could be replaced by nobler and more proactive visionary and competent leaders to resolve the conflicts.

God, The Beneficent, The Merciful, Loving, All Knowing and All Powerful created the human being from a '**mixed drop' ("Nutfa"- Cell),** equipped with intelligence and inherent diversities not as fault lines but hallmarks of human identities for unity and sustainable relationships. **God** created life and death to test human beings with choice whether we will do good or evil. The Creator reveals Himself as '**One' and has No Partner** and being '**closer to a human being than his (her) jugular vein** 'and appointed Man as "**vicegerent"** with rights and obligations on this planet.

Our professed ignorance and arrogance towards Divine Knowledge has pushed us to echo evil and futility in a global cataclysm – the treacherous conflict causing degeneration to be at the epicenter of man-made cataclysm driven by lingering suspicion in relations to others within the splendid Universe. The earth and universe are meant for human beings and are enriched to support all of their needs over time and space. Are we living in a disconnected world of our own making? Egoistic leaders implying hidden hatred and prejudices as favorite perversion to divide and conquer humanity and dominate the specious Earth and the systems of Nature of Things

which support life and our future. How strange! Are we so abhorrent and neglectful of our own present and futuristic sustainability?

Jesus is quoted in **the Bible** saying: **"If the world hates you, you know it hated me before it hated you…if they persecuted me, they will also persecute you…John 15:18-25"***How do* We, the People of Human Conscience *make these ugly and disingenuous politicians to learn from history and change the course of events into peace and harmony for all of us?* The quality of our intellectual consciousness is lost in the world of time and space. **Truth is One** and the same unchanging as it was many centuries earlier. We, the human beings are a creation of God, not the creator and We were "**indeed created man (human being) in the best of moulds"** 4:95 The Quran), and "**taught man that which he knew not - Nay but man doth transgress all bounds."** (5-6: 96 The Quran.).

We, the People Aspire for Peace and Global Harmony but Leaders opt for Conflicts

If Russian, America and NATO leaders are honest, proactive and accountable to the global community, they urgently need proactive advisors of new ideas and creative strategic thinking to cope with multiple

layers of political conflicts and humanitarian crises and to find peaceful and workable solutions away from the entrenched political box of the few global warmongers.

Recently, this author proposed a strategic framework of dialogue for peace to global leaders to resolve the conflict : **Why Can't Russia, NATO, the EU and Ukraine make Peace**: https://www.uncommonthought.com/mtblog/archives/2022/06/22/global-conflict-management-why-cant-russia-nato-the-eu-and-ukraine-make-peace.php. The challenging truth arising from the emerging conflicts and leadership failure call for new thinking and new people of ideas and ideals to reject the violent assumptions of militarization and egoistic triumphs by acts of genocidal plans . We, the People of globe, ask the global conscientious leaders to avoid the upcoming epicenter of cataclysm and listen to voices of reason for an immediate ceasefire in Ukraine, stop acceleration of military confrontations between Russia, NATO, America, the EU and others. At the **edge of reason**, war is anti-human and it could lead to global catastrophic annihilation of human cultures and civilizations. There will be **NOTHING** left moving on Earth called civilized people.

The Earth is Living and We, the People, We, the Humanity are Its Trustees

We live on earth that sustains all forms of living things, yet human ignorance and arrogance are at work to destroy the essential foundation of our own lives. Weapons of wars are the weapons of mass destruction and are being used without any sense of responsibility and accountability. We, the people, are rational beings with a choice of righteousness and wickedness to act in human affairs.

The creation of Earth, Moon, the Sun and all working systems are a **trust** to humanity. Have We, the People, We, the Humanity honored and protected that natural trust and its obligations? In a recent article ("Conflict Beyond Reason: a dialogue to end the war is desperately needed")https://www.uncommonthought**: 7/26/2023:** this author narrated the truth not for geological or meteorological explanations but for the understanding of fellow human beings that the earth spins at 1670 km per hour and orbit the Sun at 107,000 km per hour. Imagine, if this spinning fails, what consequences could occur to the living beings on Earth. Think again, about the average distance of earth from moon is 93 million miles -the distance of Moon from Earth is current-

ly 384,821 km equivalent to 0.002572 Astronomical Units -(https://www.newscientist.com/question/fastearthspin/#ixzz7C8p37S9X).

If this God given system of distance between the Earth-Sun and the Earth-Moon were ever to change, there will be no sign of life, human civilizations or habitats left on Earth.

The emerging wars and destruction of Earth and human habitats are blatant violations of that **TRUST** between Man and the Creator and call for awakening of human conscience and soul: "**Truly Man is to his Lord, ungrateful and that (fact) he bears witness (by his deeds.):** 6-7: 100: The Quran). The contemporary monstrous war instinct aims at annihilating mankind and earth. To this author, a cataclysmic nature of human intellect is unleashing a highly irrational and unthinkable world of complexity to come to our consciousness destroying all progress and achievements of any human civilization on this planet. Most human intellect knows the basic imperative: "**if you THINK intelligently, you could find workable remedies to human problems.**"

All informed global communities have passion for peace, not wars. The planet Earth is not a dead orbit-

ing object but a living entity providing continuous nourishment to human life and existence to all other living beings. When nations and leaders subscribing to political absolutism start acting like God and challenge the sanctity and limits of the **Laws of God**; historically speaking they become an object of unthinkable natural calamities- earthquakes, wildfires, floods, deaths and destruction.

The War between NATO, Russia and Ukraine Needs Urgent Dialogue and Reconciliation for Peace and Global Security:

Canons of rationality call for an urgent action to a ceasefire between Russia-Ukraine war and peacemaking as the core value of our floating on the stream of time. The Universe and all it encompasses are the products of God-given command; and do not operate in concert with man-made laws, constitutions, foreign policies, judgments, hopes and desires. Light is One, and darkness is many. Life and the Universe exist because it is ordained by the Creator of the Worlds. If history is relevant and is seen as a source of learning and warning, undeniably all those superpowers well equipped with weapons and animosity to destroy others or all have met the same fate of self annihilation. It is beyond doubts that when they

challenged the sanctity of the Laws of God governing the Earth and the living Universe, and invaded small and poor nations in farfetched lands, they ultimately met their own ending by natural disasters such as wildfires, earthquakes, flooding, tornadoes, exploding lava, sound blasts, landslides, lightning and lot more. **Are there any Thinking people to take heed from the prevalent facts of human history?**

What is the cure to raging indifference and cruelty to the interests of the whole of mankind? The 21st-century new-age complex political, economic, social and strategic challenges and the encompassing opportunities warrant new thinking, new leaders and new visions for change, conflict management and participatory peaceful future-making. The Divine knowledge offers the logical substance of reality to be reckoned with: (**3: 190**: The Quran): **Verily in the creation of the Heavens and of the Earth and in the succession of the night and of the day, are signs for men of understanding; Who standing and sitting and reclining, bear God in mind and reflect on the creation of the Heavens and of Earth and say: Oh, our Lord- Thou has not created this in vain.**

To be honest to ourselves, the time and opportunities we have are a trial of our lives and we are ac-

countable for our actions to reject corrupt policies of triumph and glory promising happiness and infinity. We cannot be complacent to allow ignorance, hatred, fear and animosity to destroy our lives, cultures and civilizations. Can we think to be human in all of our moral, political and intellectual endeavors? Late Professor **Howard Zinn**envisaged the future of humanity in the following words of wisdom: **To be hopeful in bad times is not just foolishly romantic. It is based on the fact that human history is a history not only of cruelty, but also of compassion, sacrifice, courage, kindness. What we choose to emphasize in this complex history will determine our lives. If we see only the worst, it destroys our capacity to do something. If we remember those times and places—and there are so many—where people have behaved magnificently, this gives us the energy to act, and at least the possibility of sending this spinning top of a world in a different direction.**

Chapter 6:
Global Peace and Conflict Resolution: Ukraine and Russia and We, the People Voices of the Oppressed

Unthinkable as it may be, humanity, every last person, could someday be wiped from the face of the Earth…..A discussion about the future of humanity is about how the important fundamental features of the human condition may change or remain constant

in the long run…. **Extinction risks constitute an especially severe subset of what could go badly wrong for humanity…. The greatest extinction risks (and existential risks more generally) arise from human activity. Professor Nick Bostrom** (**"The Future of Humanity", 2007**), Professor of Philosophy, Oxford University.

Leaders Who Could Not Lead

The people of Ukraine and Russia share a common geography and cultural history of values and beliefs and one wonders – what are they fighting for? Ironically, it seems that Russia, the EU, NATO and America – all are competing actors in making the current cataclysm of human sufferings, displacement and destruction. Killing of all by all goes unabated while they discuss sports and enjoy hollow laughter in secluded decisions-making rooms. To some it is a "positive" development to pursue the war agenda, and to others a catastrophic narrative of human ignorance and moral and intellectual degradation. Absolute power corrupts absolutely. Ignorance, indifference to human interests of peace, security and peaceful co-existence, and arrogance against the very mankind on whose existence the world enjoins all the attractions of lifelines, beauty and appreciation are at greater

risk of extinction. We, the People, We, the Humanity are fast becoming victims of anarchistic entrapment. Global leaders have not learned to be leaders of humanity. Late Robert Fisk ("**The only Lesson we ever learn is that we never learn**." 3/19/2008: Independent.co.UK), described them as "dead enders", claiming "mission accomplished" when they did nothing to stop war and make peace. The epicenter of cataclysm in-making is sheer human ignorance, greed and false sense of military triumphs. A reflective snap shot of a critical moment in time pulse and movement of history reveals absence of reasoned dialogue for the prevention of the on–going conflict causing massive human casualties, displacement of millions of refugees across Europe, destruction of essential civic infrastructures, foods and natural resources being used as weapons, and furious competitive edge for success in an ugly war between Russia, America, NATO, the EU and Ukraine. **Could we the 21st century conscientious thinkers, learners, observers and political scientists envisage a better world of human unity, peace, security and living in a coherent relationship within the splendid Universe?**

To glance ahead of the emerging horrifying events coming out of the conflict zones, **We, The People,** of conscientious humanity must call for immediate

halt to all war machines and lingering suspicion of one-sided peace and triumph. The sudden and inexplicable plunge into insanity of war will not produce any military or psychological gains for violent assumptions plagued with hatred, bias and false claims and counter claims of military superiority, defeats and occupation. The global institutions, global leadership and systematic working of international political affairs are managed by wrong thinking, wrong people and wrong priorities. None seem to have the capacity to further the cause of world peace, security and conflict resolution. **Despite the sketchy illusions of freedom, democracy, human rights, liberty and justice, we are encroached, stuffed and at terrible risk of annihilation more accidental and by error of judgment than planned scheme of things by Man against Man.**

Are **We, the People** being victimized by the individualistic clash of global leadership? **Caitlin Johnstone** (**"Trapped in the Slaughterhouse", Information Clearing House: 8/02/22), author of** *Woke: A Field Guide for Utopia Preppers*.*https://caitlinjohnstone.com*offers pointed expressions on how **We, the People, We, the Humanity** are being systematically victimized:

They let us populate the earth with more humans only to drain us of our humanity….We're not people to them. We are batteries. We are fuel….Western civilization is a story of full bellies and starving hearts……This is no civilization. It's a slaughterhouse….A fake plastic culture designed to keep us on the conveyor belt so that our life force can be converted into fuel for a soulless empire. A fake plastic society built to keep us marching into the food processor. There are so very many more of us than there are of them. We could crush them like an insect the moment we decided to. But the brainwashing is so very, very effective,…We'll either wake each other up, or we'll remain trapped in the slaughterhouse.

The 'New Normal' is Devoid of Rational Thinking and Actions

The contemporary leaders portray narcissistic authoritarianism in political governance and lack proactive imagination to promote peace, security and universal happiness for the masses by malevolence and the on-going miseries of innumerable multitudes. The **"new normal"** that economists speculate and politicians rejoice is a delusional phenomenon painted by corporate media, its greed and exploita-

tive strategies worldwide. Horrors of wars and catastrophic destruction of the environment and human habitats cannot be the statistic of kindness and love within the God-given system of universal order.

Few affluent classes and corporate entities are playing on the passions of people for economic warfare and political management. Entrapped global humanity continues to search for workable remedies to an unending COVID-19 Pandemic and its consequential pains and on-going sufferings echo worldwide concerns and **is climate change not a ticking bomb?** The political and legislative dictum do not rotate Earth, nor flow the rivers or produce oxygen or maintain the systematic day into night–night into day or the universe to support life. There is something terribly WRONG with human thinking and its rationality and behavior to undermine the normal processes of life.

We, the People are fast becoming victims of their ignorance and fictitious policies and priorities. Modern ignorance and Capitalist exploitative greed wrongfully exploiting the natural resources of Earth and leading to an end game of life and sustainable future. Time and chaotic events are moving fast and impacting all human societies. **We, the People,** ask

for reasoned discussion to find peaceful and workable solutions.

We, the People, We, the Humanity are an Integral Part of Earth and Splendid Universe

The earth sustains life and we breathe oxygen. You may call it '**Mother Earth',** it is created and ordained by God not by any State, the UNO or legislative decree; and it offers all that human beings needed for change, development, survival and sustainable future-making. The planet Earth is living not a dead entity, and is meant for all the creations, not for looting of its inhabitants for sustainable future. **We, the People** must ensure its future sustainability through increased measures of safety and security of the planet, human life, and production of foods and reduction of greenhouse effects on the earthly habitats. If the few insane and victims of their own vengeful paranoid continue to control the global political powerhouses and determine the future of mankind as it happened during the Two World Wars, consequently, they could undermine our future and the safety of Planet. To a conscientious mind and soul, the warning from God is self-explanatory: (The Quran Chapter 73: 14, and 17-18), how the visible conditions of

our seen world will change against the futuristic predictability:

One Day the earth and the mountains will be in violent commotion And the mountains will be as a heap of sand poured out and flowing down; Then how shall ye, if ye deny (God). Guard yourself against a Day that will make Children hoary-headed? Whereon the sky will be cleft asunder? His Promise needs must be accomplished.

To make peace and resolve the conflict peacefully, this author proposed direct communication between President Putin, President Biden, NATO, the EU and Ukraine leadership at the earliest: **"Why Russia, NATO, the EU and Ukraine cannot Make Peace?"** https://english.pravda.ru/opinion/152450-peace_ukraine/https://www.uncommonthought.com/mt-blog/archives/2022/06/22/global-conflict-management-why-cant-russia-nato-the-eu-and-ukraine-make-peace.php

The unforgivable crimes against humanity are dehumanizing global mankind. War is the focal point of man-made tragedies. We the People call for universal friendship and peaceful co-existence that lifts neighborly concern beyond one's tribe, race, eth-

nicity, class, and nationality is in reality a call for an all-embracing and unconditional love for all human beings. Human compassion and intellect is somehow the key that unlocks the door which leads to ultimate reality. **The Message of Quran (Chapter 40: 64 and 67**) clarifies the truth of universal brotherhood and wisdom for all the times to come:

It is God, Who has made for you the Earth as a resting place and the sky as a canopy; And has given you shape and made your shapes beautiful, and has provided for your sustenance; Of things pure and good; Such is God your Lord. So Glory to God, the Lord of the Worlds. It is He Who has created you from dust; Then from a sperm-drop; Then from a leech-like clot; then He does He get you out (into the light) as a child; then lets you grow and reach your age of full strength; then lets you become old. Though of you there are some of who die before; And lets you reach a Term appointed; In order that ye may learn wisdom.

In Chapter 23: 12-14,

God reveals the truth about the origin of Man (human being): Please see the diagram /pictures of human origin as revealed by the Divine Revelations:

"We did create man from a quintessence (of clay). Then We placed him as (a drop of) sperm in a place of rest, firmly fixed. Then We made the sperm into a clot of concealed blood; then of that clot We made a (fetus) lump; then We made out of that lump bones and clothed the bones with flesh; then We developed out of it another creature. So blessed be Allah, the Best to create."

Day 22: Heart starts to Beat

THINK! How God provides nourishment to YOU - the human being?

Baby in the womb of mother

The quest for human solidarity, love and peace envisages ultimate reality and is beautifully summed up in the **First Epistle of Saint John (The Bible): (John 4:7-8, 12): Let us love one another: for love is of God; and everyone that loveth is born of God, and knoweth God. He that loveth not knoweth not God; for God is love. If we love one another, God dwelleth in us, and His love is perfected in us.**

Chapter 7:
How Wars and Political Wickedness Destroy Humanity? The Case of Palestine

Politics of Wickedness Overshadows the Meaning of Peace, Humanity and Conflict Management

Political wickedness is not the cherished value of normal human character but embodies the characteristics of abnormal minds boasting clichés of power and affluence over others. Leaders and nations lacking rational thinking imply it to disguise cyni-

cism and treachery for socioeconomic and political domination. For the past 11 months, the US-Israel war on Gaza and Palestine goes unabated without an end in sight against the global humanity of consciousness of rights and wrongs in global affairs. The May 2024 Ceasefire proposal advanced by President Biden claimed to be the **"Israeli Proposal"** exposed a treacherous cons work to undo much expected halt to the insanity of war, destruction of habitats, issues of humanitarian aid and return to normalcy across Gaza and West Bank of Palestine. If it was an Israeli proposal, Secretary Blinken and President Biden both were wrong and misleading the global conscience of peace and conflict management. Rational choices speak the language of truth for an urgent ceasefire to restore trust in global undertaking but not the leaders of Israel and the US making any sense out of this quagmire of lies and deception to allow Israel a free hand to continue bombing a helpless 2.9 million entrenched population of Gaza. To date, 45656 people massacred, more than 105,339 injured, 16000 or more women and children killed and still 16,000 or more children and women buried under the rubble. What a tragic landscape deformed by men of evil and political deception?

It was PM Netanyahu and Israel not sure of a ceasefire and peace in the region. Thousands of concerned Israeli citizens march daily and hold continuous night vigils in Tel Aviv to demand peace, the resignation of Netanyahu and an immediate ceasefire for the safe return of 100 or so remaining hostages. People-oriented and effective leaders are always open to listening and learning but not PM Netanyahu and his extremist cabinet plans to put a finished answer on the freedom of Palestine as a State and occupy Gaza for new Israeli settlements. If righteousness and wickedness cannot be combined in one human character, Biden and Netanyahu are affluent and powerful enough to dehumanize the culture of rational thinking and responsible democratic governance in world affairs. Imagine! What intrinsic human values do these political monsters gearing to control and manage conflict resolution, peace and global humanitarian consciousness? Do they think the rest of mankind is just numbers, digits to be played with or just sheep and goats to be butchered without any accountability? They are the wrong people, imbued with wrong thinking and doing the wrong things as did Pharaoh, Hitler, Mussolini, George W. Bush and Tony Blair and so many others aligned with these mentally sick egoistic characters. Have they not seen the mummy of Pharaoh in Cairo's museum?

All monsters of history claimed good intentions and righteous ambitions but inflicted horrors, deaths and destruction on fellow human beings to achieve individualistic ambitions of power, triumph and glory.

The US and Israel Defy the Sanctity of Earth, Human Values and Sustainable Future

It is a presidential election year in America and nobody could predict its outcome. Often oil exporting Arab leaders (Saudi Arabia, the UAE and Qatar and others) have contributed millions of dollars to both US leadership campaigns without any favor. Western leaders view them as subservient puppets, **'camal jockeys'** and nothing else. The Arab-Muslim leaders live in colonial ages, just puppets of the US. The Israeli military occupied the Rafah Crossing belonging to Egypt but General Sissi did nothing to free it from forcible adventure. This opens the path for greater Israel across the Arab world. The Egyptian, Saudi, Emirates and others maintain friendly ties with Israel and have invested in Israeli technological manufacturing industries to keep Netanyahu happy and safe. The US and Israel appear isolated and more a portrait of vices, deception and injustice to degrade

humanity within the universe. They are afraid of the unknown future. The Earth is a Divine hub of human life, survival and a trust, those bombing and destroying it are mentally sick and defy the Divine Truth.

It looks as if the US and Israeli leaders do not believe in life and death reality and final accountability. No human being lived forever on this Earth. Israeli 'democracy' has no Constitution of equal rights and obligations to swear in the name of God, but a US President taking oath in the Constitution makes reference to God in faith. One wonders, what kind of accountability of deeds after death would be waiting for the crimes of Israeli and American leaders once they face God? The earth is living and spins at 1670 km per hour and orbits the Sun at 107,000 km per hour. Imagine, if this spinning fails, what consequences could occur to the living beings on Earth. Think again, about the average distance of earth from moon is 93 million miles -the distance of Moon from Earth is currently 384,821 km equivalent to 0.002572 Astronomical Units. Earth is a"trust"to mankind for its existence, sustenance of life, survival, progress and future-making. Wherever there is a trust, there is accountability. The Divine warning (Chapter 7: 56: The Quran), makes it known:

Do no mischief on the Earth after it hath been set in order, but call on God with fear and longing in hearts; For the Mercy of God is always near to those who do good.(44:38-39), the reminder is explicit: We created not the Heavens and the Earth; And all between them merely in idle sport. We created them not, Except for just ends. But most of them do not understand.

The same Divine message in repeated in Torah, Bible and Quran:(Quran:40:64),clarifies:

It is God Who made for you the Earth as a resting place and the sky as a canopy; And has given you shape and made your shapes beautiful, And has provided for your Sustenance, of things pure and good; Such is God your Lord. So Glory to God, The Lord of the Worlds.

And killing of innocent people is prohibited in the Ten Commandments (Torah):'**Thou shalt not kill' (Exodus. 20:13; also Deut. 5:17). Jewish law views the shedding of innocent blood very seriously, and lists murder as one of three sins (along with idolatry and sexual immorality), that fall under the category of yehareg ve'al ya'avor - meaning "One should let himself be killed rather than violate it.**

Global Community is the Net Victim of War of Economy and Sustainable Future Appears Disdained and Lost

To glance ahead it seems that the Western world failed to see a dreadful tragic history in the making of the end of time and loss of ingenuity to understand the consequences of naive egoism of Israeli leadership making war as an instrument of territorial expansion in the Arab Middle East**.** Rationally arguable conclusion to the war on Gaza was perceivable if there was a unified political-military challenge to the Israeli plans by the Arab-Muslim world. That landscape appears morally, intellectually and politically bankrupt **as a scum floating on a torrent** of naive puppets and dead-conscious leaders. They all live in palaces, not with people. For too long, the PLO leadership has followed foreign interest and has no responsible leader. The American-Israeli collaborative war on Gaza and its immediate consequences made the Western world and all of its institutions shamefully redundant and void in the 21st century global norms of civility, human rights, freedom, justice and safety of civilians- whereas crimes against humanity are captured in obscure impulses and indecision and deliberate inaction by the UN Security Council. The Western news media ignored coverage of Israeli

'genocidal' acts against the masses in Gaza and occupied West Bank. Some of the Western leaders remind Israel of "restraint" of its continuing bloodbath across Gaza and West Bank – what a joke to human intellect – the global community wanted to stop the Israeli-American insanity of war and hold them accountable for their crimes against humanity and alleged "genocide."

If Israel is not stopped, soon the leading Arab states will fly Israeli-American flags for a change. The Israeli-American denial of crimes against humanity, "genocide" in Gaza, forcible expulsion of millions clearly represent ferocious conception of right and wrong and how irrational the leadership tends to be in real world affairs. Political cynicism is endemic, the UNO, the EU and Western leaders appear mentally and morally lost and dubious without any accountability to informed global community seeking an end to the war in the Middle East. What a shame, what a disgrace that Arab-Muslim countries have armies, resources but no responsible leadership and would not act to defend people's freedom, rights, dignity, and sustainable future. Please see: **"Israel Lost the War and America Betrayed Humanity in Gaza. https://www.uncommonthought.com/mtblog/archives/2024/05/15/israel-lost-the-war-and-america-betrayed-humanity-in-gaza.p**"

Chapter 8:
Israel and the US Plan to Destroy Palestine and the Arab Leaders Just Waiting for the End Game

Monsters of History Defy Truth, Justice and Humanitarian Values

The Israeli-American fraudulent scenario of a ceasefire ended at Cairo without any agreeable outcome. There was nothing new but to kill the time and opportunities for the return of normalcy and humanitarian necessities to have allowed the people of Gaza to breathe oxygen while the bombing and killing of civilians continues unabated. The so-called Arab leaders – the authoritarian "puppets" of the US never had the capacity to think outside the decadent box and question the Master about this stigma of war and its ultimate purposes to dominate the Arab world. The US and Israel are moving around all quagmires and forging it to ensure continued killing of the people of Gaza under false pretext of ter-

rorism and allowing new settlements by settlers to strengthen Israeli command over the West Bank and to put a finished answer to Palestine freedom movement. Should Israel and the US be allowed to continue to commit crimes against humanity and genocide without any accountability? All monsters of history claimed good intentions and righteous ambitions but inflicted horrors, deaths and destruction on fellow human beings to achieve individualistic ambitions of power and glory. The US Congress bestowed undue political honor to PM Netanyahu who is alleged by the ICC -ICJ to have committed crimes against humanity and genocide across Gaza. Does the US Congress have a manifesto of human moral and political values?

Philip Giraldi ("War Criminal Benjamin Netanyahu Addresses the US Congress" GlobalResearch:7/26/24),Executive Director of the Council for the National Interest explains:

"Benjamin Netanyahu's presentation in the House Chamber today was by far the worst presentation of any foreign dignitary invited and honored with the privilege of addressing the Congress of the United States.....Netanyahu claims 'Hamas raped women and burnt babies **alive'** but Dr. Giraldi views it a false

propaganda stunt to win the US support for continued war against Palestinian people and clarifies:

The reality is, of course, it is the Jews who are killing Palestinians in large numbers using American supplied weapons. The highly respectable British medical journal **The Lancet** estimates that Israel has already killed more than 186,000 Palestinians since last October most of whom are still buried under the rubble of their homes, but for Netanyahu only Jewish lives matter. And the **unrelenting savagery** of the Israeli soldiers has also been confirmed by multiple independent sources. Bibi would also do well to read the new Knesset law **passed last week** that completely rejects the idea of a unilaterally declared sovereign Palestinian state side-by-side with Israel, confirming that Israel's intentions do not include living at peace with its neighbors. **https://www.globalresearch.ca/war-criminal-netanyahu-us-congress/5863708**

Israel and America will not Stop at Gaza and Arab Leaders are Just Waiting for the Unknown

Gaza and the West Bank are obliterated by Israeli insanity over more than a year of continued war and bombardments of civilian infrastructures. The Arab-Muslim leaders have no mind, wisdom and courage to challenge Israel for its planned onslaught of Palestinian masses. They profess friendship with Netanyahu against Israeli animosity. The Arab leaders appear morally, intellectually and politically bankrupt **as a scum floating on a torrent** of naive puppets and discredited leaders. The American-Israeli collaborative war on Gaza and its immediate consequences made the Western world and all of its institutions shamefully redundant and void in the 21st century global norms of civility, human rights, freedom, justice and safety of civilians- whereas crimes against humanity are captured in obscure impulses and indecision and deliberate inaction by the UN Security Council. Is the global community heading towards unthinkable man-made disasters as no international law, no humanitarian value or Geneva Conventions apply to Israel and the US for accountability? If Israel is not stopped, soon the leading oil exporting Arab states could fly Israeli-American flags for a change. Please see:"Israel Lost the War and America Betrayed Humanity in Gaza."https://www.uncommonthought.com/mtblog/archives/2024/05/15/israel-lost-the-war-and-america-betrayed-humanity-in-gaza.php

Those Bombing the Earth are the Enemies of Humanity and Peace

Tears of Angel Nurse

Israel so far, has dropped more than 90,000 ton of bombs on Gaza - four times more insane than what happened at Hiroshima and Nagasaki during World War 2. Perhaps, the Israeli and American leaders do not believe in life and death and accountability to God for all of their actions. The Torah and Bible fully reflect on this core human responsibility and punishment to those who violate the Divine Covenants. The Earth is not a property of the US or Israel but a Divine hub of human Life, Survival and a Trust, Those Bombing and Destroying it are mentally sick and defy the Divine Truth. It looks as if the US and Israeli leaders do not believe in life and death and accountability. The earth is living and spins at 1670

km per hour and orbits the Sun at 107,000 km per hour. Imagine, if this spinning fails, what consequences could occur to the living beings on Earth. Think again, about the average distance of earth from moon is 93 million miles -the distance of Moon from Earth is currently 384,821 km equivalent to 0.002572 Astronomical Units. Earth is a "trust" to mankind for its existence, sustenance of life, survival, progress and future-making. The Earth exists and floats without any pillars in a capsule by the Will of God, so, **"Fear God Who created life and death."**Is human intelligence still intact to understand this reality? Wherever there is trust, there is accountability. All human beings are accountable for their actions. The Divine Message (Quran:33:72), clarifies:

We did indeed offer the Trust to the Heavens and the Earth
And the mountains but they refused To undertake it, being afraid thereof: But man undertook it;
He was indeed unjust and foolish.

And in Chapter 44:38, human beings are reminded: **We have not created the Heavens and the earth and whatever is between them in sport: We have not created them but for a serious end. But the greater part of them understand it not.**

And killing of innocent people is prohibited in the Ten Commandments (Torah): **'Thou shalt not kill' (Exodus. 20:13; also Deut. 5:17). Jewish law views the shedding of innocent blood very seriously, and lists murder as one of three sins (along with idolatry and sexual immorality), that fall under the category of yehareg ve'al ya'avor - meaning "One should let himself be killed rather than violate it.**

"Phase One of Israel's" genocidal campaign on Gaza has ended. Phase Two has begun. It will result in even higher levels of death and destruction" reports Chris Hedges.

Chris Hedges "Israel Reopens the Gaza Slaughterhouse." Chris Hedges Report: 12/05/23: https://chrishedges.substack.com/p/israel-reopens-the-gaza-slaughterhouse?utm_source=post-**email**title&publication_id=778851&post_id=139349128&utm_campaign=email-post title & isFreemail=true&r=b7lbz&utm_medium=email

This is not a war against Hamas. It is a war against Palestinians.

Israeli strikes are generated at a dizzying rate, many of them from a system called "Habsora" — The Gos-

pel — which is built on artificial intelligence that selects 100 targets a day. The AI-system is described by seven current and former Israeli intelligence officials in an article by Yuval Abraham on the Israeli sites +972 Magazine and Local Call, as facilitating a "mass assassination factory." Israel, once it locates what it assumes to be a Hamas operative from a cell phone, for example, bombs and shells a wide area around the target, killing and wounding tens, and at times hundreds of Palestinians, the article states.

Chapter 9:
War on Gaza:
Are We Witnessing the End of Time and Civilized Humanity?

The Horror is beyond words and beyond imagination. The Horror is of blood and shredded children. The Horror is of thousands and thousands – tens of thousands, maybe hundreds of thousands — dead bodies disintegrating in **the rubble of indiscriminately IDF-bombed hospitals, apartment buildings, mosques – you name it.** *The Horror is of universal bearing, especially since the world – HUMANITY, yes, humanity – just looks on. That, in itself, is beyond words, beyond imagination, beyond the spirit of anything that calls itself human.*

Chris Hedges and Peter Koenig ("The Horror, The Horror" in Gaza. Chris Hedges. What Is the UN Good for? Where Is the Human Rights Commission When It Is Needed? Global Research: 11/13/2023): https://www.globalresearch.ca/horror-gaza-what-un-good-where-human-rights-commission-when-needed/5839831

Global Community Calls for an Immediate Ceasefire

Are We, the People not witnessing a cataclysmic bloodbath being unleashed by continuous aerial bombardments and destruction of lives and habitats across Gaza? There is a mixed sense of intrigued mystery but a visual reality unfolding on screen and the sudden and inexplicable plunge into tyranny of cruelty and planned killings of civilians and forcible displacement of millions of innocent people that the so

called international Humanitarian Law forbids and others define the violent developments as "crimes against humanity." President Biden asked Israel to safeguard the Al-Shifa hospital but stopped short of calling for an immediate ceasefire. Is there another name for political cruelty? The hospital with 36 premature born babies (plus 3 have already died), and without electricity and incubators cannot function under Israeli attacks. To stop the horrors against humanity, urgent action is needed to protect the sanctity of the hospitals and emergency services. Are we at the dead-end of inhuman catastrophe? And not even the Humanitarian Law, Geneva Conventions, the ICRC and Red Cross are able to ensure the safety of the hospital.

The voices of public consciousness echo across many continents to " **Stop the War in Gaza", "Let Palestinians Live", and stop the "Crimes against Humanity by America and Israel."** No wonder who listens to these inner voices of humanity when unabated bombardments are destroying Gaza. How strange all American and European proponents of human rights, law and justice, liberty and equality are plagued with dormant ideas and fake statements of "humanitarian pause" rather than calling for an immediate ceasefire and halt to bombing of hospi-

tals, places of worships, civilians dwellings supporting life and civility in the 21st century of informed humanity. These encompassing realities are not the media disinformation but truths and facts of prevalent lifelines across Gaza. Please see:

"**War on Gaza and the Pedagogy of the Oppressed."** https://www.uncommonthought.com/mtblog/archives/2023/12/05/war-on-gaza-and-the-pedagogy-of-the-oppressed.php

When Will the Tyranny End and What is the End Game?

Evil happens when conscientious people do nothing. What is the end game of the Israeli onslaught of Gaza? Even the US and Israeli leaders cannot predict what the end game is going to be. There is a fearsome and ferocious flow of dubious statements originating from the Western politicians to 'wipe out the alleged extremists from Gaza' and finish the debacle of "terrorism" from Gaza. Others would argue for a complete flattening of the enclave to allow Israel re-occupation. The unchallengeable truth coming out of Gaza speaks of daily planned bloodbath of the civilian population and forced displacement of

1.5 millions to make Gaza another occupied entity of Israel facilitating futuristic exploration of gas and oil in the Mediterranean region favoring Israel and the US interests. Is Israel attacking Gaza for oil and gas?There are reportedly huge gas and oil fields in Gaza and West Bank, reports Muhdan Saglam "**How much oil and gas does Palestine have?"** InformationClearingHouse:**11/13/23** https://informationclearinghouse.blog/2023/11/13/is-israel-attacking-gaza-for-oil-and-gas/

After 15 months of continuous bombardments of Gaza causing some 45,625 civilian deaths, more than 105,000 civilian injuries and catastrophic destruction of homes, essential infrastructures, blocking of foods, medicines, fuel, electricity, internet, and destroying hospitals and mosques and churches as if these were not embolden acts of "crimes against humanity." The latest media reports of 16,000 mostly women and children still buried under rubble of collapsed buildings across obliterated Gaza. The horrifying figure tells of some 16,000 children and women or more killed during the bombing. On October 7, Hamas attacked the Israel southern region, a revised figure puts Israeli civilian casualties at 1,300 citizens including some 350 soldiers and 65 policemen and that 239 were taken hostages by Hamas fighters. Ha-

mas spokesperson reports that some 60 hostages were killed during the hostilities. To glance ahead as if the Western world failed to see a dreadful tragic history in the making of the end of time and loss of ingenuity to understand the consequences of naive egoism of Israeli leadership making war as an instrument of territorial expansion in the Middle East. Peter Koenig ("**Gaza: US and the West Support Israel's Crimes Against Humanity: Understanding the Never-Ending Conflict"**, Global Research: 11/06/23), explains: *Israel's PM Netanyahu is a war criminal and should be held accountable for war crimes throughout his PM-ship of Israel, according to the 1945 / 1946 Nuremberg trials criteria. His crimes against humanity, against a defenseless Palestine are comparable to the Holocaust.* https://www.globalresearch.ca/gaza-us-west-supports-israel-crimes-against-humanity/5745763. *Human glory lives in the conception of good and righteousness, not in wickedness and genocidal plans.* The Earth is a living entity and is meant for us - the human beings, not for bombardment and destruction. "*Fear God" and 'do not violate the covenants of peace and trust on earth', warns the Divine Revelation.* The Earth was not meant to be bombed and destroyed by sheer ignorance and wickedness. The Divine warning **(Chapter 7: 56: The Quran),** is self-explanatory: *Do no mischief on the Earth after it hath been set in*

order, but call on God with fear and longing in hearts ; For the Mercy of God is always near to those who do good.

Are We Moving Toward a Third World War of Complete Annihilation?

The United States, Israel and West European nations have vested imperial and geopolitical interests to control the oil producing Arab Middle East. What should have been the priority agenda of peace and conflict resolution is lost between competing political interests and competing moral claims. The Western world views the Arab leaders as "camel jockeys" with no weight on a moral or intellectual leadership scale. The US and Israel knew this reality too well. The November 11, Arab-Muslim OIC gathering in Saudi Arabia did nothing useful to demonstrate its ability and relevance to global affairs. The Arab leaders failed miserably to offer any sense of security to the besieged masses of Palestine. Courage is a characteristic of intelligent leaders; but shame to those who could not offer any protection against American complicity and Israeli killing of the civilians in Gaza. "**How the Oil-Exporting Arab Leaders Betrayed the People and Lost the Future.**" .https://www.esinislam.com/Articles201205/WritersArticles_Mah-

boobAKhawaja_0524.htm and "How the United States and Britain Lost the Bogus War in Iraq and Afghanistan" (Global Research: 10/22/2010); and please see "World Affairs and Insanity as Entertainment: Are We at the End of Human Morality?" Transcend Media: 6/4/2018

The US and West European leaders would confer with Israeli planned displacement of Palestinians. We, the People reject the violent assumptions of militarization and egoistic triumphs by acts of genocidal plans in Gaza. Peter Koenig ("**Israel's Killing Fields. Albert Einstein's Foresight?"** Global Research: 11/12/2023), elaborates how Albert Einstein viewed the emerging conflict in his foresight: **Did Einstein foresee, or sense, Palestine becoming Israel's killing fields, from 1948 forward, to explode in a worldwide tolerated, even supported, and encouraged democide / genocide, just three-quarters of a century after the birth of Israel? Does Netanyahu, his entourage – and the West – realize that the 75 years of Apartheid, of ethnic cleansing of Palestinians and of wiping the Gaza Strip and eventually all the Palestinian land off the map is comparable to, or worse than the "Holocaust"?** https://www.globalresearch.ca/israel-killing-fields-albert-einstein-foresight/5839352

Mocking its Charter obligations, the UN Security Council failed to protect the civilians from terror of daily bombardments of hospitals and places of worship. It is a humanitarian crisis in the making that mankind has never witnessed except the Two WW. The animals live and do not reflect on the imperatives of life whereas we the human beings cannot act like animals as we are supposed to be intelligent and responsible species on this Earth. At the edge of reason, the notion of evil leads to realization of evil and the tyranny of war must be stopped.

"*It's Not The 'Israel-Hamas War', It's The Israel-Gaza Massacre*" (Information Clearing House: 10/15/23), *Caitlin Johnstone spells out the current catastrophe: Stop calling it the "Israel-Hamas war". It's the Israel-Gaza massacre. Calling it the Israel-Hamas war creates the false impression that this is a war that is directed exclusively at Hamas when it's really an ethnic purge that's directed at all Palestinians in Gaza.* https://informationclearinghouse.blog/2023/10/15/its-not-the-israel-hamas-war-its-the-israel-gaza-

Chapter 10:
Ignorant and Arrogant Leaders Bomb Mother Earth Again and Again

Why Do Egoistic Leaders Scorch the Earth?

Power and politics is a game of acquisitiveness engrossed in inordinate and monopolistic adventures. Something evocative and hauntingly familiar about the 21st century's leaders claiming to be intelligent but act foolishly to bomb mother earth under pretext of conquests and imperial domination. Holistic life and co-existence within the universe has no meaning to their strategic agenda. Ferocious scenarios about the future of the Arab world originating from Israel indoctrinate President Trump policies and his hawkish advisors. Gaza and West Bank-Palestine are the net victims. The traitors are within the leading oil exporting Arab leadership. Understanding Arab-Persian sectarian rifts, "**the Operation Midnight Ham-**

mer" hit Iran conveniently without any formidable response or reaction to American power over Saudi Arabia, Egypt, Jordan, Kuwait, Bahrain and Qatar. If the Arab-Muslim people had unity, it could not have happened. Analyze comparatively Russia vs. America; would Trump dare to attack Russia? Certainly NOT because Putin would respond forcefully to make America understand its power.

The Arab-Muslim leaders are sterilized and unable to think of a cult of the US-Israeli aggressive dynamics working against them. Iran must rethink critically about its strengths and weaknesses to defend its freedom and sovereignty. The Iran-Israel conflict could restart anytime. The Arab-Muslim leader's inexplicable plunge into political cataclysm makes Gaza bombed daily by the IDF and Palestine lost to the "Greater Israel" plan. To America and the EU, Arab-Muslim societies remain a colonized hub subservient in manners and morals to Western imperialism. Hatred of Islam and ethnic sarcasm shape the American and European political thoughts, morals, international law, humanitarianism and competitive values justifying their own version of rights, politics and status of ethnic superiority and denial to others in blatant violations within the working of global systems of states. Those dropping bombs on earth are not normal beings but think and act like wild beasts.

After the 9/11, the US, Britain and NATO invaded Afghanistan killing and disrupting millions, then conspired a false premise and pretext of the WMD, it was Iraq, they committed genocide of three million civilians; then Syria bombed and devastated for the ISIS; and now Iran for alleged nuclear weapons which do not exist. American violent assumptions of "terrorism" plagued the Islamic landscape. Why was Israel not scrutinized by the West for having 50-90 or so nuclear arsenals threatening peace and security of the region?

The Earth - a Splendid Divine Creation for All, Speaks for Herself

The Earth, a creation of God exists, serves His purpose equally to all creations of God and floats in the universe without any pillars. It clarifies now and will do the same on the Day of Judgment - Day of Truth: O' People, the chief creation of God! you appear adopted to intellect, fortitude and fortune being a victim of ignorance, superstition and arrogance against me - your Mother Earth. I am not a property of any nations, states, geography or corporations but a Divine hub of life beyond human imagination, survival and a trust, those bombing and destroying me are

mentally sick and defy the Divine Truth. Their hearts beat and they breathe oxygen on me and exhibit petty behaviors to politics as a scum floating on a torrent. Sketch out your genius, I am a living being and spin at 1670 km per hour to orbit the Sun at 107,000 km per hour. Imagine, if this spinning stalls, what consequences could occur to all the living beings on Earth? Think again, about the average distance of earth from moon is 93 million miles -the distance of Moon from Earth is currently 384,821 km equivalent to 0.002572 Astronomical Units. Recall, Earth is a **"trust"** to mankind for its existence, sustenance of life, survival, progress and future-making, so, **"Fear God Who created life and death."**Is human intelligence still intact to understand this reality? Where there is trust, there is accountability. All human beings are accountable for their actions. (The Quran: 22: 66): **It is God Who gave you life. Will cause you to die. And will again give you Life. Truly man (human being) is a most ungrateful creature!** Whether you believe or betray, life is a continuous struggle, a trust and a trial in all ages.

Do you not see my existence floating in space by the command of God? My existence brings day into night, rotating sun and moon to your service otherwise, life will cease to exist. Think again! How God produced water mixing oxygen and hydrogen for your life, oxygen to breathe, climate changes, oil for engines, water to drink, seas to travel, mountains, oil, gases, and rare minerals and all other necessities needed to your nature at all the times for change and technological progress. Don't forget of uranium to make bombs, and hydrogen bombs and unknown space weapons are all readily stockpiled to be used on fellow human beings to repeat Hiroshima, Nagasaki and now Gaza, Ukraine and Iran. But this is nothing new in human consciousness and history; more of the same have already happened on earth – Fascist-Nazi claimed: **"We are the most powerful armies of the world to defend our standards of living" - "who is more powerful than us?"**

Those Sadistic Leaders Bombing the Earth Must be held Accountable for Crimes against Humanity and Earth

Are we witnessing a TIME when most precautionary vigilance is liable to consequential surprises? How foolish and stupid they are assuming

superior ethnicity, nationalism, economic power and invincible armed forces have bombed the Mother Earth again and again for petty things of their own wrong thinking. Please see: **"Leaders, Time and Accountability for War and Peace. "Gaza and Ukraine Portray the Reality"**https://www.globalresearch.ca/leaders-time-accountability-war-peace/5889803-andhttps://www.globalresearch.ca/war-gaza-arab-muslim-leadership-complicity/5865073

Rejecting cynicism of infinity, nations do rise and fall throughout history. The US Empire in its infancy, European imperialists, Israelis, the oil soaked mindless Arab-Muslim authoritarian rulers and other warlords - the acclaimed insane killers and aggressors - fearful of the self and of the unknown future - don't repeat the history:

Do they not travel through the earth and see What was the End of those before them. They were even superior to them in strength: they tilled the earth and populated it in greater numbers than these have done:…. it was not God Who wronged them but they wronged their own souls (The Quran: 30:9). The Divine warning (The Quran: 99:1-3), is self-explanatory to those claim to be having invin-

cible armies and achieve success at the cost of ruthlessness, horrors of wars and bombing of the Mother Earth, listen carefully: **When the Earth is shaken to her utmost convulsion. And Earth throws up her burdens (from within). And Man cries (distressed) ‘ What is the matter with her?’**

Mysteries of the Universe We live-in

Thanks to NASA

Chapter 11:
How to be Human in the Tyranny of a War on Humanity?

The Horrors and Pains Inflicted on the People of Gaza and the West Bank- Palestine

We, the people of conscience, are living in a time when moral and intellectual vigilance is being ruthlessly purged from our very humanity—our very existence: ***"How can we be human in the tyranny of the US-Israel war culture?"*** There is no sustainable idealism in human life except as a painted fantasy, for there is both much evil and much good in the world we inhabit. If we claim to be moral beings, we must prove ourselves as such in all our endeavors. The

truth is that we have serious problems defining ourselves as moral beings when ongoing wars in Gaza and Ukraine, alongside bombings and the killing of innocent people, are daily occurrences, turning abnormal doses of inhumanity into the new normal of socioeconomic and political consumption. These contradictions are covered up by massive political, economic, and inhuman manipulations by a few elite classes that govern global affairs.

Often, realist thinkers have wondered if human beings are born as bloodthirsty creatures. Michael Wesch (**The Art of Being Human**: A Textbook for Cultural Anthropology, 2018) attempts to define this and quotes David Foster Wallace:

RELIGIONS AND WISDOM OF THE WORLD

> **"In the day-to-day trenches of adult life, there is actually no such thing as atheism. There is no such thing as not worshiping. Everybody worships. The only choice we get is what to worship. And the compelling reason for maybe choosing some sort of god or spiritual-type thing to worship—be it JC or Allah, be it YHWH or the Wiccan Mother Goddess—is that pretty much anything else**

> **you worship will eat you alive. If you worship money and things, then you will never have enough, never feel you have enough. Worship your body and beauty and sexual allure, and you will always feel ugly. Worship power, and you will end up feeling weak and afraid. Worship your intellect, being seen as smart, and you will end up feeling stupid, a fraud, always on the verge of being found out."**

Do cultures and civilizations grow out of the moral mire of bombardment, cruelty, killing, conquest, occupation, and destruction of humanity? If the US and Israel think themselves the most powerful nations on Earth, they are on the wrong path, having already killed more than 42,000 Palestinians in Gaza, with around 17,000 women and children still buried under rubble, all while an unhealthy atmosphere prevails in the strip. History shows that people and nations claiming to be the most powerful and transgressors manipulating the Earth and humanity are often destroyed by the Laws of God—natural causes. We are witnessing biblical warnings such as storms, flooding, earthquakes, and wildfires happening across the globe, just as the Bible warns its faithful. Many empires and egoistic leaders met their end through these natural forces.

Life is a trial, and bombing and killing fellow human beings is not a justifiable act of reason or truth but of madness and crimes against humanity. Has America and Israel reached that stage of thought and endeavor? Is it a gain in the present and a loss in the future? Do they not believe in the holistic conception of life as a sacred trust, with ultimate accountability to God?

> *Behold, thy Lord said to the angels: I will create a vicegerent on earth. They said: "Wilt Thou place therein one who will make mischief and shed blood; whilst we do celebrate Thy praises and glorify Thy Holy Name?" God said: "I know what ye not know."* **(The Quran: Chapter 2, Verse 30)**

Warmongers Waiting for 'The Judgment'

The US Biden administration deceived and misled the world with talks of a ceasefire plan since May 2024, and a 'two-state solution'—all simply to buy time for Israel to put an end to life in Gaza and the freedom of Palestine. Its Arab leader stooges in the Arabian Gulf region, running around pretending to be peace mediators, are nothing more than authori-

tarian complicit rulers, failures in all walks of life. We see US and Israeli leaders, with unbridled ambitions and power, unleashing violent assumptions of hatred, secret intrigues, and animosities that overwhelm the daily thought processes of a society—a nation, no matter how "normal" it claims to be, cannot function as a normal entity when it mocks the originality of Palestinians and calls for "death to Arabs."

Israeli leaders had planned long before the Gaza onslaught to populate the region with settlers and rob it of its natural resources. Felicity Arbhutant (Video: **"Wiping Gaza Off the Map": Big Money Agenda. Confiscating Palestine's Maritime Natural Gas Reserves**, Video Interview with Michel Chossudovsky, Global Research: 10/23/24), explains: An official "secret" memorandum authored by Israel's Ministry of Intelligence recommended the forcible and permanent transfer of Gaza's 2.2 million Palestinian residents to Egypt's Sinai Peninsula, specifically to a refugee camp in Egyptian territory. There are indications of Israel-Egypt negotiations, as well as consultations with the US.

A slanted vision flares up the dark face of political reality, with US-Israeli leaders pushing war as a means of peace. Their war economy is like scum

floating on a torrent. Evil thrives when conscientious men do nothing. Human glory lies in the conception of good and righteousness—not in the hands of economic warriors, robotic machines, weapons of destruction, or agents of political terrorism. We are moral beings enriched with inner consciousness and a vision for peace, human unity, and a sustainable future.

It is a Hobbesian formula: "*War of all against all.*" German philosopher **Immanuel Kant** (Perpetual Peace, 1795) was more proactive and realistic when he noted: ***"Intellectuals must be seated in chosen assemblies and systems of public governance to prevent individualistic insanity against the people."***

Life and Earth Are a Trust to be Protected

God created the Heavens and the Earth as a Trust to fulfill human aspirations and to allow human generations to flourish since time immemorial. It was never meant to be bombed and destroyed by sheer ignorance and wickedness. Are we neglectful of our origin and the reality that surrounds us? Life is a trust and connected to accountability. It is God Who gave you life, will cause you to die, and will give you life again. Truly, man is a most ungrateful creature. (The Quran: 22:66)

Our professed ignorance and arrogance toward Divine Knowledge have pushed us toward evil and futility in a global cataclysm—the treacherous conflict at the epicenter of man-made destruction, driven by lingering suspicion toward others within this magnificent Universe. The Earth and the Universe are meant to support human beings and meet all their needs across time and space. Are we living in a disconnected world of our own making?

How can we limit man-made terror, egomaniac tyranny, and devastation against fellow human beings? Jesus is quoted in the Bible: "If the world hates you, know that it hated me before it hated you. If they persecuted me, they will also persecute you…" (John 15:18-25). How do we, the people of conscience, make these ugly and disingenuous politicians learn from history and change the course of events toward peace and harmony for all of us? The quality of our intellectual consciousness has been lost in the world of time and space. All international institutions are broken and deliberately kept dysfunctional.

Truth is one and unchanging, as it was centuries earlier. The emerging wars and destruction of Earth and human habitats are blatant violations of the trust between humanity and the Creator, calling for an

awakening of human conscience and soul. *"Truly man is to his Lord ungrateful, and he bears witness to this by his deeds."*(The Quran: 6:100)

All informed global communities are passionate about peace, not war. When nations and leaders subscribing to political absolutism start acting as though they are

God and challenge the sanctity and limits of the Laws of God, history shows that they become objects of unthinkable natural calamities—earthquakes, wildfires, floods, deaths, and destruction. The Message of the Quran (64:40, 67:40) clarifies the truth of universal brotherhood and wisdom for all times:

> *It is God Who has made for you the Earth as a resting place and the sky as a canopy; and has given you shape and made your shapes beautiful, and has provided for your sustenance of things pure and good; such is God, your Lord. So Glory be to God, the Lord of the Worlds. He it is Who created you from dust, then from a sperm-drop, then from a leech-like clot, then He brings you out as a child. Then lets you grow and reach your full strength, and lets you become old—though some of you die before—and*

lets you reach an appointed term, so that you may learn wisdom.

The Earth - a TRUST to mankind

We, the people, must synthesize the awakening of human consciousness for an immediate ceasefire, peace, and a sustainable future. Our reasoning cannot be tampered with impunity, as those responsible must be held accountable for crimes against humanity and genocide in Gaza and Palestine. Caitlin Johnstone ("**We never really had a chance to build a healthy world**," Information Clearing House: 09/11/22) clarifies what went wrong:

> ***And we wonder why everyone's so dysfunctional and self-destructive… So we're all innocent, in the end. Again, we must, of course,***

push to bring consciousness to the parts of humanity that have taken a wrong turn—to the war criminals, plutocrats, and managers of the empire, and all other abusers and the abusive systems which elevate them. But underneath that fierce burst of light, there can also be a deep compassion and understanding born of a lucid seeing of how we got here in the first place.

International Laws and the Geneva Conventions are Mocked by the Warmongers

The WHO- Geneva warns of the 'tsunami of diseases' in the making if immediate preventive measures are not taken to remove the rubble, dead bodies and restore functional hospitals and increased supplies of fuel, clean water, foods and well being of the displaced people. While the US and West European leaders offer lip service, canons of fairness demand equal treatment of both parties to the conflict. Palestinians are worthy of human dignity and rights as are the Israelis", and "Two States - Israel and Palestine." "Gaza: War on We, the People and Arab-Muslim's Shame" https://www.uncommonthought.com/mt-blog/archives/2023/11/22/gaza-war-on-we-the-people-and-arab-muslims-shame.php

To unlock the claimed impunity, the UNO or the ICC should call for an investigation to the violations of the Geneva Conventions of Humanitarian International Law and crimes against humanity. The UN-Security Council failed to stop the madness of war against highly vulnerable civilian population in Gaza. As of now according to the UN reports, some 44,000 civilians killed , some 100,000 or more injured and some 16,500 or more children and women killed during the long Israeli bombing campaigns and some 16,000 or more women and children still buried under the vast Gaza rubble and stinking unhealthy atmosphere. It was reported that 1,147 Israeli were killed on October 7, when Hamas attacked the Southern region of Israel and approximately 1,000 Israeli soldiers wounded according to the Haraatez newspaper. One wonders how do you justify war on the civilians, hospitals, schools and places of worship across Gaza? Please see more by this author: **https://www.uncommonthought.com/mtblog/archives/2023/10/31/the-war-on-gaza-humanity-is-being-destroyed-by-the-madness-of-war-and-inept-leadership.php**

The Spacious Earth is a Trust Not to be Bombed and Destroyed

We live on Earth that sustains all forms of living things, yet human ignorance, arrogance and insanity are at work to destroy the essential foundation of our own lives. Weapons of wars are the weapons of mass destruction being used without any sense of accountability. We, the people are rational beings with a choice of righteousness and wickedness to act in human affairs. Do we the mankind have any collective sense of responsibility and accountability to protect the Earth and its imperatives in life?

"*God is nearer to you than your jugular vein*", ***and*** *"Fear God"* ***and*** *'do not violate the covenants of peace and trust on earth',* the Divine reminders (The Quran), echoes the messages conveyed by Prophets Abraham, Moses, Jesus and Mohammad.

If the Israelite believe in God and Torah, human blood should not be shed on a precarious scheme to expel Palestinians from their ancestral homes. Arguably the War on Gaza substantiates the wide range of evidence to forcibly displace the civilians from North to South, genocidal acts of bombing and "crimes against humanity" impacting the unprotected population, bombardment of hospitals, stopping of foods,

fuel, medicine, water and attacks on places of worship. While a ceasefire pause in place, Israeli forces continue to raid the West Bank, Janine and kill targeted civilians and children in the occupied region. This dreadful culture of thinking and action will diminish all peaceful prospects for reconciliation and the Two States solution.

Chapter 12:
How Arab Leaders Betrayed the Masses? The Al-Aqsa Mosque and Its Importance in Islam - East Jerusalem – Palestine

The original Al-Aqsa Mosque in East Jerusalem-Palestine

Truth has its own Language

How do you contemplate wisdom, reason, and respect for tolerance and decency given the political chaos, blind terror, religious awe, and moral and intellectual hatred-filled trajectory submerged in in-

human action? The live video portrayal went across the global networks of Israeli police using stern grenades, smoking blasts, and beating the worshipers at midnight prayers during the month of fasting (Ramadan) at the Al-Aqsa Mosque – the Third holiest site in Islam. The Israeli Police Commissioner called it "a terrible impact of police behavior." A flip-flop of mediocre expression of the prevalent reality. At a loss is the decadent culture of human thinking, behavior, and integrity and a miserable failure to respect others – the innocent and helpless worshipers. If you want to be respected for your national identity and religious values, then respect that of others. The souls of Abraham, Ishmael, Ishaq, and Jacob resting in neighboring Al-Khalil (Hebron), and Moses and Jesus must have been tormented by the extreme wing of the Israeli political government under PM Netanyahu. There is a chronic problem of irresistible political and religious necessity to dehumanize Palestinians in particular, and Muslims in general, as the State of Israel occupies their Third Holiest site in East Jerusalem. Netanyahu desperately needs diversion and unthinkable conflicts for his own political survival and to avert the massive year- long public protests and new kind of socio-political chaos to balance his weak and corrupt leadership. What is the core impulse of the problem?

This was not the first incident of politically engineered hatred and primitive tyranny against the Abrahamic Faith worshipers at the Al-Aqsa Mosque. Ramzy Baroud, a Palestine scholar explains in his 2014 article: "**Al-Aqsa vs. Israel: The Lurking Danger Beneath**" (Uncommon Thought Journal: 3/14/2014):

"Something sinister is brewing around and below al-Aqsa Mosque in occupied East Jerusalem, and it has the hallmark of a familiar Israeli campaign to strip the Mosque of its Muslim Arab identity. This time around, however, the stakes are much higher. It was on February 25, 1994, that US-born Jewish extremist Baruch Goldstein stormed into the Ibrahimi Mosque in the Palestinian city of al-Khalil (Hebron) and opened fire. The aim was to kill as many Arabs as he could.

At that moment, nearly 800 Muslim worshipers were kneeling down during the dawn prayer in the holiest month of the Muslim Calendar; Ramadan. He killed up to 30 people and wounded over 120. Exactly 20 years later, the Israeli army stormed the Al-Aqsa Mosque, the third holiest Muslim site, and opened fire. The timing was no accident……That same dangerous combination – right wing politicians allied with religious zealots – is at work once more. They are eyeing Al-Aqsa for annexation; the same way the Israeli government is laboring to permanently annex large swathes of the occupied West Bank…."

Global Reaction to the Israeli Police Attack on the Worshipers

AT the UNO Headquarters, New York, thousands of concerned people held a protest against the Israeli

police incursion and attacks on the Muslim worshipers inside the Al-Aqsa Mosque compound, Palestinians call it 'Haram-Sharif' – a Place of Honor and Respect. Like other religious followers, Jews, Christians, Muslims and others were active participants calling out to a global audience for respect for the sacred site and reasoned conflict resolution and peace between Palestine and Israel.

At the edge of reason, Israeli political leaders under PM Nethanyu appear to be victims of ignorance, religious immorality and imbecility to have ordered the police to raid the Al-Aqsa mosque. Had they known who the Prophet Abraham, Ishaq, Jacob, Joseph, Moses, and Jesus were and what their teaching, beliefs, and practices were, they would have never dared to tyrannize the innocent worshipers at the mosque. Muslims in their five-times daily prayers send salutations to Abraham and his progeny, and their belief and respect are integral parts of the Islamic faith. No Palestinian or other Muslim would ever dare to disrupt the Jewish worshipers or insult the Prophets of Islam – Abraham, Ishaq, Jacob, Moses, and Jesus. It was only a convenient and self-serving interest to the extreme right wing of Israeli political governance. But the real issue rests not with Judaism; it is the "Zionism" that governs the minds and Israeli political construct.

An overview of Al Haram Sharif Compound - East Jerusalem- Palestine

Alan Hart– an American Jewish scholar, a former BBC Panorama and ITN Middle East correspondent with a vast first-hand knowledge of the subject narrates in his 2010 book: **ZIONISM, THE REAL ENEMY OF THE JEWS / Volume III Conflict Without End?**

Alan Hart (**"Zionism and Peace Are Incompatible"** Dissident Voice, Oct 21, 2010), explains the core problem embedded in Zionism:

"**Zionism is not only Jewish nationalism**

which created a state in the Arab heartland mainly by terrorism and ethnic cleansing. It is also a pathological mindset. In the deluded Zionist mind the world was always anti-Jew and always will be. It follows that Holocaust II (shorthand for another great turning against Jews) is inevitable. It follows that there can be no limits to what Zionism will do in order to preserve nuclear-armed Greater Israel as a refuge of last resort for all Jews everywhere when the world turns against them……. But alas, reality continues to slap everyone in the face: Zionism and peace are incompatible. I will say it again, Zionism and peace are incompatible."

Are the Arab -Muslim Leaders and the Custodians of the Holy Mosques Alive?

While the world was watching the most pernicious actions and their consequences on the news screen, most Arab leaders lacking the moral and intellectual profile and reasoning were obsessed with their own personal agenda items and strategic priorities. While political tyranny and cynicism rule across the Middle East, the landscape, what this author narrated some 20 years earlier ("**Arab Ummah vs. Mus-**

lim Ummah, Who you were and where you are?" Media Monitors Network, May 8, 2002), remains unchanged. The contemporary leaders pose no moral, intellectual, or political challenge to Israeli leadership and the occupation. If the Arab people were united and had educated and intelligent leadership, they would have changed the shape and forms of contemporary hopeless affairs. Should authoritarian Arab leaders not be questioned and held accountable for their incompetence, treachery, and failure to protect the interests of the Arab masses on Palestine?

> "World observers describe the Arab leaders as "defeated" cronies who capitalize on inflicted miseries of the masses to build palaces and to increase foreign bank balances. Is it possible that the defeated parties could pressure the victors? Or demand favorable terms and conditions on issues that involve life and death questions? ……When you discarded Islam, you left behind all its merits and claims. Your leaders believe, you are an economic man and woman like the Western cultures, they work to earn, you consume fatty dinners and enjoy 4 wheels cruiser without working for it. Your enemies are happy; you are true believers in progressive economic myths and lifestyles. But

your leaders are without followers, without a sense of responsibility or guilt. **Most Western political analysts believe Arab leaders hardly bother to use their brain; it is always new and fresh like a baby."**

The Arab people, politics (if any), cultures and values need a navigational change to coexist with the moral and intellectual demands of the 21st century. They are prisoners and divided by sectarianism in their countries. **Carly Fiorina**, the former CEO of Hewlett Packard ("**TECHNOLOGY, BUSINESS AND OUR WAY OF LIFE: WHAT'S NEXT**" 09/2001), fascinated us with her ideas and vision she had shared decades ago on the Islamic civilization:

"There was once a civilization that was the greatest in the world…."

"And this civilization was driven more than anything, by the invention. Its architects designed buildings that defied gravity. Its mathematicians created the algebra and algorithms that would enable the building of computers and the creation of encryption. Its doctors examined the human body and found new cures for diseases. Its astronomers looked into the heavens, named the stars, and paved the way for space travel and exploration……."

Recently, an old Palestinian woman was reported with a heart attack and the attending physician explained that for a long time, she was waiting to be freed by the marching Arab armies and Generals. But the other day she heard roaring sounds and public outbursts and she imagined that perhaps Arab armies had come but she was told there are no Arab armies and no Generals. Rather, the crowd cheering and the noise was coming from a football match and consequently, she fell on the ground and fainted. It is no wonder why the Palestinians have no proactive leadership and are highly disorganized. They failed to have a united purpose for sustainable change in

the Middle East. A young prince of the UAE chatting with the UAE news-maker TV network about his new pets and blond wife, when asked about the attack on the worshipers at the Al-Aqsa Mosque, said he was not aware at all. He sounded optimistic to ask the CIA for authentic information. The Saudi royals, when contacted for comments by the Truth Digger foreign network, made a surprise statement that they enjoyed a friendship with Netanyahu and American leadership and hoped to conduct peace talks on the Palestine-Israel relationship in the near future. How long would Al-Aqsa Mosque wait for the Neo-colonial kings, princes, and presidents of the Arab world, asked one Imam of a Saudi Central mosque during a Friday sermon? It is reported that he was put under house arrest for his own safety. Imagine the history when the Arabs were the pioneers of new knowledge, scientific and technological discoveries, and human development and where do they stand today in global analysis? Please see "**The Arab Time Capsule: Once You Were the Leaders of Islamic Civilization**" Al-Jazeerah Cross-Cultural Understanding Editorial: 02/01/2010.

Bogus wars in the Arab world destroy sanctity of life and kill innocent people

Chapter 13:
Is Global Peace and Security Just a Fantasy? The Leaders Who Betrayed the Canons of Truth, Wisdom and Humanity

UN Security council
Thanks to the UNO Gallery

Today's Political World at a Glance

Global politics is overwhelmingly becoming robotic when the question of safeguarding mankind comes up. Global political leaders are fast becoming actors on stage - issuing abstract statements of out-

rage and phony sense of grief when thousands and millions of human lives are constantly bombarded by the weapons they manufacture and sell to crush the human soul and to support the war economies. The UNO and its Secretary General and the UN Security Council – all are just debating clubs engaged in time-killing exercises to deceive mankind and to betray the ideals of the Charter to "safeguard the humanity from the scourge of wars." Many top UN officials are paid employees with no sense of accountability to the global community. The reality of man-made catastrophic conflicts enhanced by national interests and war-led economies are ingrained in the war racketeering plans across the globe. The 21st century knowledge-based informed mankind is the net victim of the global political monsters. Millions of human beings are forcibly displaced, evicted by plans and char-coaled by forbidden chemical weapons across the Middle East yet; most global leaders do nothing to prevent the aggressive catastrophes except statements of fake 'outrage' reaction as if others were inhuman casualties. We are witnessing abnormal political culture of human bloodbath as being normal.

The global community - a divided and dispersed mankind is unable to challenge the war racketeers

and global hangmen who claim to be political leaders. They are egoistic professionals with big mouths without wisdom and full of self-engineered false democratic clichés, contradictions, distortions and misrepresentation of the rights of common citizens in modern democracies. These are frightening trends for the present and future generations to survive. Most of the economically influential actors occupy the political platforms - either through backdoor conspiracies or entrenched political intrigues. They profess to be intelligent and outspoken for the rights of the people but in reality are offensive to truth and listening to voices of reason and honesty. How do we call for a balancing act in a world terribly imbalanced by nationalism, political and economic ideologies of supremacy and shallow imaginations and practices of human equality, human rights, peace and harmony among all the diverse segments of the living humanity?

We cannot abandon the search for a better and more rational world of systematic mechanisms to protect the peace and security of mankind on this One Planet. We, the People, We the Humanity and conscientious thinkers and scholars must wake-up to the immense sophisticated and technologically advanced challenges to disconnect us from the Nature

of Things and to dehumanize us by global scenarios of ethnicity, nationalism, state borders and cultural superiority and ruling class distinctions. **William Godwin** (**Enquiry Concerning Political Justice and Its Influence on Modern Moral and Happiness, 1793**), said it right:

Men of genius must rise up ... .to analyze the machine of society to demonstrate how the parts are connected together… and point out the defects and remedy. It is thus only that important reforms can be produced…He who is a friend to general happiness will neglect no chance of producing in his pupil or his child, one of the long-looked for saviors of the human race.

Do We, the People, Realize to be One Humanity on One Earth?

We are One Humanity on One Planet and we have a right to be here in peace and harmony, not in conflicts, not collaborators to kill mankind and destruction of the human environment and habitats. This will be contrary to our Nature and inhuman if we cannot come to terms with our peaceful co-existence, identity and responsibility being the chief guardians of the living planet in a living Universe. We, human-

ity, live on a balanced Planet – Earth located at a measured distance from the Sun and Moon and other stars. God created the Universe and blessed it with all functionalities and provisions for life-sustaining factors for millions and billions of years. Do you realize if there was no water, no oxygen or hydrogen and other gases or sunlight to support all the living creations – what would have been the shape and form of life on Earth?

Could we the humankind count the blessings of God to maintain life for millions and billions of years on this planet? All things exist in a mathematical order, whether we recognize it or deny it. So strange, we know all about other material things and scientific - technological developments but we are ignorant and arrogant to learn about our own origin and existence on a living planet. We are born from our mother's tummy - one and the same all over the globe – One Humanity. Yet, we dare to challenge each other with nationalism and ethnic superiority and indulge in wars and deaths and destruction of our own beings. Are we human beings intelligent enough to know about our own existence and Purpose of Life? How could we imagine peace and harmony among ourselves when we bomb and destroy each other with weapons of destruction as if we were not the human

kind but some kind of animals without any sense of rational thinking?

We, the People of Conscience can only correct the political fallacies if we are united and blended together with reason and accountability to be the savior of our own world. We must awaken the minds and souls of the 21st century humanity to synthesize the vitality of peace and human security in a world of time and opportunities for political justice, equal rights and participation to be part of the change phenomenon for a better and more promising world of tomorrow. The voices of reason will echo across the globe if we together are committed and united for this idea and human ideals. We strongly believe that knowledge-based wisdom, plans and actions will lead to benevolence and global harmony, peace and justice and will nullify the malignity and political tyranny from the 21st century highly challenging and competitive world. When We, the People, articulate cooperation and understanding in societal diversity, it will replace the impulse and urge for competition and unjust indulgence to destroy fellow human beings.

Political Propaganda: War as Noble but Truth and Peace are Offensive

Strangely enough, warmongers hire war propagandists to classify wars as "noble", "good", necessity of the ruling nobility and to protect the flag, borders and national interests. George Bush claimed to be "Man of God" who started the day with the Bible, to orchestrate the bogus war on terrorism. These are cynical notions implied to enforce the monstrous viewpoints of the few warlords in every age. **Professor Camillo "Mac" Bica, School of Visual Arts, New York City** and an activist of Peace and Justice ("**Atrocity and War",** OpenEdNews), offers a penetrating insight on the inequality criterion and falsification of information and facts of human life:

Having been indoctrinated by the propaganda of those whose militarism and wariest agenda requires acceptance of the mythology of the "good war" and the "noble warrior," the uninitiated and unaffected most civilians and many non warrior members of the military fail to realize this truth, that all war is barbarism in which cruelty and brutal atrocity is the norm rather than the exception. During World War II, for example, often cited and celebrated as the "good war," over 50 million civilians were murdered by both Axis

and Allied Nations. The American servicemen in the Wikileaks video who so nonchalantly "engaged the target" slaughtering some 12 human beings are no different from the pilots and bombardiers from the "greatest generation" who with equal nonchalance, incinerated millions of civilians during the terror bombings of Hamburg, Dresden, Tokyo, Hiroshima, Nagasaki, etc. **Despite the moral depravity of their actions, these individuals were not born killers. Rather they were created to do our bidding, first conscripted or lured into the military with promises of employment, a college education, or U.S. citizenship, then subjected to sophisticated indoctrination techniques of value manipulation, moral desensitization, and psychological conditioning, aimed at destroying/overriding their humanity, their moral aversion to killing, reinforced by the violence and horrors of the battlefield environment.**

Blame Games of Distortion and Prejudice against the Informed Humanity

To be united in global political diversity, We, the People must exercise forbearance, canons of rationality and strive for blended unity of mankind - the core of human understanding and harmony. Lead-

ers who want to lead must have rational thinking and followers to claim leadership effectiveness. Most contemporary leaders are devoid of REASON as the focal point of policy formulation and decision-making in global human relationships. Often they use blame game and popularity numbers to score fictitious ratings in public. Most leaders are infected with this syndrome and egoistic sickness to remain influential and powerful.

To protect mankind from further dehumanization and annihilation, People of new ideas (**Idea Men**), are needed to take initiatives for political change - indeed a navigational change at this critical moment: a New UNO with people's leadership, New Global Political Systems of Governance planned and developed by the people of knowledge and integrity and rejecting Hobbesian "wars of all against all"; and producing a rational rebuttal to the war of insanity, torture, political tyranny, inept global leadership and offer a balanced new vision of a world enriched with learning knowledge of rational policy-making and decision-making, human equality, fairness, protection of life and its natural support systems, and the Universe and equal justice for all the living beings on this planet. The leaders have not learned from the imposed deaths and destruction of the Two World

Wars. The Third World War is already in progress in Syria, Palestine, Iraq, Yemen, Libya and soon to engulf many self-made tribal Arab kings, princes and authoritarian dictators.

Surely, We, the People, could create a better and more sustainable world of today and tomorrow. A natural sense of piety and political wickedness cannot co-exist in one human character as most of the world leaders pretend to be. We must THINK and ACT outside the global box of political wickedness and cult of political allegiance to the few and sickening political minds of egoistic leadership. Time and history are not going to wait for the few insane outrages, phony statements on human deaths and destruction unless we take this challenge in its time and opportunity to make things happen for change and for the best of all mankind. The Divine Revelation (**Al-Qur'an**) states clearly: **"Intelligent people always readily accept advice."**

American historian **Harry Elmer Barnes** ("**Perpetual War for Perpetual Peace: A Critical Examination of the Foreign Policy of Franklin Delano Roosevelt and Its Aftermath"),** offered this stern warning to American politicians if the US led wars continue leading to man's annihilation from this planet:

"If trends continue as they have during the last fifteen years, we shall soon reach this point of no return, and can only anticipate interminable wars, disguised as noble gestures for peace. Such an era could only culminate in a third world war which might well, as Arnold J. Toynbee has suggested, leave only the pygmies in remote jungles, or even the apes and ants, to carry on 'the cultural traditions' of mankind."

The UN Security Council - a debating club of oligarchy or an institution for peace, security and conflict resolution?

Chapter 14:
Leaders Who Could not Lead: Ignorance and Egoistic Leaders Destroy Mankind and the Living Earth

Humanity is a victim of sadistic Elite's Thinking and wrong actions. The trajectory of economic wars causing destruction of Earth, phenomenal climate change, pollution and human habitats, and the coming of natural disasters - massive floods, continuous earthquakes and raging wildfires across the world and unknown impacts of the COVID-19 Pandemics are staunch reminders that most advanced and cultured nations and people are on the wrong track of thinking and priorities, time and place. **"Fear God"** and 'do not violate the covenants of peace and trust on earth', the Divine reminders echoed by Abraham, Moses, Jesus and Mohammad - Prophets of God to

humanity for peace and global brotherhood. Logically speaking, human beings could be effective role models for human progress, happiness and future-making. Whether modern or ancient, the abstract philosophy of **'state'** formation is devoid of any solid foundation of belief in God or the covenants of the known Prophets of God.

The leaders claiming to be chosen by democratic systems hardly converge on this reality or find time to think of God or the living Earth sustaining life and all that mankind would need to fulfill its reasoned sustainability - from oxygen to socioeconomic, material and spiritual future-making. The leaders focus more on their **"self"**, their re-election and manipulation of power rather than the masses they claim to represent. Most often politicians are stage actors pretending to be role models of realism. Their unbridled ambitions and power unleash egoistic darkness and violent assumptions of hatred, secret intrigues for conflict making, and animosities and killings overwhelm the daily thinking process; a society - a nation no matter how normal claims to be, cannot function as normal beings to co-exist with their own self, the surroundings - in the human culture and make any positive contributions to human change and progress. Witnessing paradoxes of ignorance

and political wickedness makes the mankind think as if living in stone ages. This state of affairs reflect complete societal thinking breakdown and march towards self-annihilation. Despite hollow claims, no moral and ethical behavior seen in the sudden and inexplicable plunge to human wickedness. Even the warmongers cannot predict what the end game is going to be. Evil happens when conscientious men do nothing. God created the Heavens and Earth as a trust to live and to flourish human generations since time immemorial. It was not meant to be bombed and destroyed by sheer ignorance and wickedness. Are we neglectful of our origin and encompassed reality?

Glory lives in the conception of human consciousness of goodness and honesty, not the warriors of genocide, robotic machines, weapons of wars and hollow aims of egoistic power and politics. The on-going war between Russia, NATO, the EU and Ukraine has far reaching impacts on imperatives of life across the globe - be it the oil, food grains, gas supply and peacemaking. But the vices and moral weaknesses of leaders are not invincible as ignorance and animosities could be replaced by nobler and more proactive visionary and competent leaders to resolve the conflicts. The unending war fast became an economic

warfare – accelerated weapons sales to warring parties and money making. The Transcend Media Service – Norway, TMS (8/21/23), reports that the "top 5 US weapon contractors made US$196B in 2022."

The on-going wars in Ukraine and Gaza and their wide range of global ripple effects – from the supply of essential foods, gas, oil, grain deals, collaborative ventures in peaceful dialogue and the lingering suspicion of the threat of tactical nuclear weapons - all echo degradation of human values and soul, exhibit intellectual failure, universal chaos and socioeconomic miseries of innumerable multitude. Time and history are not going to wait for the few insane outrages, phony statements on human deaths and destruction unless we take this challenge in its time and opportunity to make things happen for change and for the best of all mankind.

Conflicts and Imperatives of Communication for Peace and Human Unity

Man by nature seems to be a 'contentious' being. A rational conflict analysis and search for peace involves listening and learning to divergent viewpoints and finding a common place of reasoning without agreeing or disagreeing to halt the warfare. This shows effective communication and enlightened

leadership traits. Modern technologically advanced wars kill people; destroy the Earth and its systematic working, human habitats and its ripple impacts entrap the future generations in psychological and intellectual captivity and dehumanization. Strangely enough, none of the Western leaders – be it the US, NATO or the EU had fostered a vision for a dialogue between Russia and Ukraine under some impartial auspices to ensure a reasoned outcome for a ceasefire and peace-making.

In all ages, people and nations claiming to be most powerful and transgressors manipulating the Earth and humanity were destroyed by the Laws of God and natural causes. Life and death are not legislative human issues. The message is clear: "It is He (God) Who gives Life and Death; And when He decides upon an affair; He says to it: "Be", And it is." (40: 68 The Qur'an). Have you not walked on the earth to learn how most powerful nations of the past were destroyed by the Will of God – asks the Divine Revelations?

All things exist in a mathematical order, whether we recognize it or deny it. So strange, we know all about other material things and scientific - technological developments but we are ignorant and arro-

gant to learn about life and death, our own origin and existence on a living planet. How could we imagine peace and harmony among ourselves when we bomb and destroy each others with weapons of destruction as if we were not the human kind but some kind of animals without any sense of rational thinking?

The Earth is Living and We, the People are its Trustees to Protect it.

The Earth is a living entity and is meant for us - the human beings. The Divine warning (Chapter 7:56: The Quran), is self-explanatory: **Do no mischief on the Earth after it hath been set in order, but call on God with fear and longing in hearts; For the Mercy of God is always near to those who do good.**

We live on earth that sustains all forms of living things, yet human ignorance and arrogance are at work to destroy the essential foundation of our own lives. Weapons of wars are the weapons of mass destruction and are being used without any sense of responsibility and accountability. We, the people are rational beings with a choice of righteousness or wickedness to act in human affairs. The creation of Earth, Moon, the Sun and all working systems are a trust to humanity. Have We, the People, We, the

Humanity honored and protected that natural trust and its obligations? In a recent article (**"Conflict Beyond Reason: a dialogue to end the war is desperately needed"**): https://www.uncommonthought: 7/26/2023: this author encompassed the truth not for geological or meteorological explanations but for the understanding of fellow human beings that the earth spins at 1670 km per hour and orbit the Sun at 107,000 km per hour. Imagine, if this spinning fails, what consequences could occur to the living beings on Earth. Think again, about the average distance of earth from moon is 93 million miles -the distance of Moon from Earth is currently 384,821 km equivalent to 0.002572 Astronomical Units -(https://www.new scientist.com/question/fastearthspin/#ixzz7C8p37S9X). If this God given system of distance between the Earth-Sun and the Earth-Moon were ever to change, there will be no sign of life, human civilizations or habitats left on Earth.

The emerging wars and destruction of Earth and human habitats are blatant violations of that trust between Man and the Creator and call for awakening of human conscience and soul: **"Truly Man is to his Lord, ungrateful and that (fact) he bears witness (by his deeds.)**: 6-7: 100: The Quran).

You as human beings are One Humanity and has one origin - why can't we co-exist in peace and harmony? Are the Global Leaders Ignorant of Making Peace and Conflict Resolution? If the Russian, American, Ukrainian and NATO's leaders are honest, proactive and accountable to the global community, they would urgently need new creative strategic thinking to cope with multiple layers of political conflicts and humanitarian crises and to find peaceful and workable solutions away from the entrenched political box of the few global warmongers. Recently, this author proposed a strategic framework of dialogue for peace to global leaders to resolve the conflict :**https://www.uncommonthought.com/mtblog/archives/2023/07/26/conflict-beyond-reason-a-dialogue-to-end-the-war-is-desperately-needed.php**

https://www.uncommonthought.com/mtblog/archives/2022/06/22/global-conflict-management-why-cant-russia-nato-the-eu-and-ukraine-make-peace.php

The challenging truth arising from the emerging conflicts and leadership failure calls for rejection of the violent assumptions of militarization and egoistic triumphs by acts of genocidal plans. We, the People of global humanity ask the conscientious leaders to listen to the voices of reason for an imme-

diate ceasefire between Russia-Ukraine and stop the acceleration of military confrontations on all fronts.

War on Gaza and how civilian population is subjected to tyranny

Chapter 15: Global Peace and Security: Unending Crusades against the Arab-Muslim World

"If trends continue as they have during the last fifteen years, we shall soon reach this point of no return, and can only anticipate interminable wars, disguised as noble gestures for peace. Such an era could only culminate in a third world war which might well, as Arnold J. Toynbee has suggested, leave only the pygmies in remote jungles, or even the apes and ants, to carry on 'the cultural traditions' of mankind."American historian **Harry Elmer Barnes** ("Perpetual War for Perpetual Peace: A Critical Examination of the Foreign Policy of Franklin Delano Roosevelt and Its Aftermath").

"The Romans were slipping into violence by a process of self-justification, and once a nation or an individual has started down this particular slope, it is impossible to apply breaks the Roman people were too unimaginative and short sighted to realize that, once murder has been justified on grounds of expediency, it can become a habit, then a disease."

(Colin Wilson. A Criminal History of Mankind)

Western Political Morality Lost its Values

Leaders universally hated and feared are actively engaged to wage unwarranted war against humanity as if it was the new normal. Netanyahu's obsession of Iran being a few weeks away for having a nuclear bomb is nothing else except a suspicious and vengeful act of aggression intrinsically supported by false narrative of self-defense. The same rhetoric is echoed

by President Trump as if both are on the same page of ignorance and arrogance. Ironically, seeing violations of international law and peaceful resolution of disputes, global leaders turned a deafening silence to the moral, intellectual and political imperatives of the systems of governance. Israel violating all the civilized norms of international systems attacked Iran pretending to be in "self-defense", while Iran was engaged in dialogue with the US to resolve the issue of nuclear enrichment. We are witnessing a new world of perpetuated ignorance, dishonesty and warmongering to preserve the aggressive expansionist aims of Israel after 20 months of war against innocent people of Gaza. Egoistic leaders appear powerless to use tyranny as means to ambitious conquests. How do you define, condemn or cure the pernicious consequences of unilateral actions of transgression? Are there any role models of moral and responsible leadership in the contemporary world? President Trump demands **"unconditional surrender"** from Iran although America is not a declared party to the current war. PM Netanyahu claims, **'Israel has full control over the Iranian airspace.'** The emerging conflict has caused catastrophic casualties both in Iran and Israel. Where do you draw a balancing act between insanity and humanity? Are we living in an era of false truth, feigned piety and alternate transient facts of human affairs?

Stephen M. Walt, professor of international relations at Harvard University claims that "Israel Can't Be a Hegemon-The Israeli government is making a bid for regional dominance that's unlikely to succeed." https://foreignpolicy.com/2025/06/16/israel-iran-war-middle-east-hegemon/**?**

Emboldened by the US chaotic leadership, Israel's long awaited wish comes to reality and Iran's nuclear sites and public are attacked under a false pretext of "preemptive strike" in self -defense. Over three decades, PM Netanyahu campaigned alleging Iran of making nuclear bombs in days and weeks. Rafael Grossi, the Director General of the IAEA clarified (Al-Jazeera interview: 6/19/25), "There is no evidence that Iran has active plan to make nuclear weapons." Israel spared no time to target the public sectors in Iran, national tv station, oil refineries, hospitals and assassinated its top military leaders and nuclear scientists. This war unfolds multiple aims beyond the nuclear capability, a regime change and destruction of Iran as a people and an ancient civilization. While the US and European leaders - the so-called gatekeepers of law, order and peace, contrary to the facts of the case aligned with Israel's irresistible necessity of fallacy and ignored the principles of international law and truth of the Iranian's uranium enrichment

program for peaceful purposes. The facts speak loud and clear, Iran is a signatory to the NPT *(Nuclear Non -Proliferation Treaty),* Israel is not; Iran has not developed any nuclear arsenals, Israel possesses approximately 50 -90 nuclear bombs. Rational person could only assess performance when it is performed, not otherwise. Alfred-Maurice de Zayas, a ***Professor of international law and history at the Geneva School of Diplomacy****("Israel Is Out of Control. "A Terrorist Government that Endangers International Peace" Global Research: 6/18/25) spells out the facts:* https://www.globalresearch.ca/israel-out-control-alfred-de-zayas/5891459

Israel's unprovoked aggression against Iran raises fundamental issues about the authority and credibility of the United Nations and more generally about the continued validity of international law and an international order based on the prohibition of the threat and the use of force…….He further noted that: Once again, Israel, the United States and their supporters are flouting international law and participating in a conflict that could lead to nuclear disaster…..On 17 June 2025 the Geneva International Peace Research Institute issued this call to the United Nations and to all men and women of good will. "By bombing Iran, Benjamin

Netanyahu has violated article 2(4) of the United Nations Charter and article 5 of the Rome Statute. This act of unprovoked aggression cannot be excused by reference to a non-existent doctrine of 'pre-emptive attack', which George W. Bush had invoked to attack Iraq, and does not fall within the meaning of Article 51 on the UN Charter, which allows for self-defense.

Should Leaders be Mindful of Their Wrong Thinking and Wrong Actions?

Most Western leaders lack moral characteristics of responsibility and their civilizations are in sharp self-contradictions. If President Trump follows the George W. Bush lead of a false genocidal act against Iraq in 2023 for the WMD and repeats the killing of three million Iraqi for his experiment without any accountability, where would the global community go to find safety and protection from terror and tyranny. The masses in the Arabian Peninsula are already victims of the pains, horrors and devastation of the Israeli war on Palestine. If there is no global vigilance and mechanism for accountability, Netanyahu and Trump could destroy humanity with a **"mother bomb"** on Iran. The Chris Hedges Report (*"War Déjà Vu"* : 06/19/25), tells more:

The lies told to ignite the war with Iraq have been resurrected to ignite a war with Iran. The assessments of intelligence agencies and international bodies are dismissed, replaced by hallucinations...Forget the intelligence community's Annual Threat Assessment **that "Iran is not building a nuclear weapon and Supreme leader Khomeini has not authorized the nuclear weapons program that he suspended in 2003," something** reiterated **by the International Atomic Energy Agency (IAEA) Director General Rafael Grossi this week. Please see more: "How the United States and Britain Lost the Bogus Wars in Iraq and Afghanistan?"** https://www.globalresearch.ca/how-the-united-states-and-britain-lost-the-bogus-wars-in-iraq-and-afghanistan/21556

Watching dreadful apparatus of fire and brimstone, We, the People are horrified by the threat of aggressive war by few warlords. Both leaders lack the moral, intellectual and legal capacity to understand the consequences of their wrong thinking and unjust war against Iran. Leadership is an art and it could be improved and changed for the good of humanity. Do intelligent leaders listen to voices of reason and make a navigational change when facts of life warrant an urgent change in attitudes, policies and behavior?

The Divine Revelations (the Quran: 40: 21), offer a stern warning to conscientious leaders and nations:

Do they not travel through the earth and see
What was the End of those before them. They were even superior to them in strength
And in the traces they have left on the earth. But God did call them to account for their sins
And none had they to defend them against God.

The quest for peace, justice and humanity by a Man of Humanity: Dr. Martin Luther King, Jr.

Horrors of Wars - kill innocent people

Chapter 16:
The Arab Triangle: How the Oil-fed Prosperity Bubble Destroyed Arab's Moral and Intellectual Culture?

The Arab people live in a fantasy bubble being floated by the transitory oil revenues, controlled and managed by the Western nations. Oil revenues are not the outcome of Arab's hard work but a planned scheme of things carried out for several generations to distract from the real problems. The aim is to destroy the Arab culture and civilization with delusional prosperity instead of poverty. Poor people always maintain a live conscience, think and strive to survive but prosperity gives them false amenities without working for it to ultimately become useless and die on their own without external intervention. Arabs have lost the moral and intellectual capacity to THINK intelligently of the self, about their cul-

ture, their global presence and about their future. With massive killings, daily bloodbaths across the Arab world, the leaders are happy that people are occupied in their own follies and that America and Britain are sheltering their role-play with increased militarization of the Arab world. All major public institutions in the Arab world are dominated by the Western thinking and agents of influence. The tragedy of Arab authoritarianism and economic militarization of the oil producing Arab nations is more complex and full of individualistic horrors, societal complacency and political blunders. Almost at every opportunity offered by time and history, the absolute rulers took wrong turns and slipped into the vices and ruins of self-generated corruption.

The US and some of the West European nations have played a central role in institutionalizing authoritarian corruption. The new educated and thinking generations of Arabs must make a navigational change and set priorities to detach the economy and politics from the oil fed thinking and consequential militarization and inter-dependency on the Western nations unto social and economic-political reconstruction of the Arab societies for a sustainable future. Time and history shall not wait for their tangible actions but they should be conscientiously powerful and skilled

enough in time management to share new and moving visions and to plan strategies and actions for A NEW Arab world dedicated to informed and responsible people's governance and living in harmony with the rest of the global community.

In 1918, **Robert Briffault**, Professor at Cambridge University (**The Making of Humanity**). made the following historical observations:

> **"It was under the influence of Arabian and Moorish revival of culture and not in the fifteenth century, that the real Renaissance took place. Spain not Italy, was the cradle of the rebirth of Europe...It is highly probable that but for the Arabs modern European civilization would never have arisen at all; it is absolutely certain that but for them, it would not have assumed that character which has enabled it to transcend all previous phases of evolution. For although there is not a single aspect of European growth in which the decisive influence of Islamic culture is not traceable, nowhere is it so clear and momentous as in the genesis of that power which constitutes the paramount distinctive force of the modern world and the supreme source of its victory."**

For more than eight hundred years, the Arabs produced an advanced civilization morally, intellectually and scientifically unparalleled in modern history. When the European lived in the dark ages and fought within themselves for nationalistic identities and symbols, the Arabs were the most progressive people articulating a model civilization to pursue balanced human development (material and spiritual) to give meanings to freedom, peace and equality and clear purpose to global sense of humanity called Ummah. The message of Islam was meant for the whole of mankind to be One Humanity living on one planet in peace and progress. But when the European crusades colonized the Islamic world, they destroyed Islamic institutions and divided the Arabs and Muslims and made them fight for their existence as was their own history of European cultures. Despite the oil generated paper wealth and transitory economic prosperity, Arab people lack Islamic unity and force of being one Ummah to restore their own historical linkage to change and human progress. The Western media views them as a source of entertainment and one track business deals to sell the obsolete weapons and consumer products but not valuable partners in the global community. We live in an information age of images carved up by the few for business and human exploitation. The Western media networks

portray their own manufactured images of the contemporary Arab and Muslim world - more so of the oil exporting Arab nations - twisting the tail of the camel, women covered in burka or splendid shopping malls full of walking black veils versus bikinis.

The past decade has occupied the minds and strategic priorities of the Western leaders in their support of the War o Terrorism. Terrorism originates from the Western colonial powers but none would dare to concede it for the fear of unknown intellectual, moral and political consequences in contemporary history. When the European businessmen explored new world markets for diminishing resources and their armed forces invaded and occupied the vast Islamic world, there were no television, internet, video cameras and stone throwing public and voices of reason to call them foreign mercenaries, aggressors and terrorists. The colonization scheme of things was not an outcome of the Western democratic values to spread freedom, liberty and justice but ferocity of violence and killings of millions and millions of human beings for the Empires to be built on colored bloodbaths. The European crusaders crossed the channels and unknown time zones to subjugate the much divided Muslim people as part of their superior nationalism perception and values that Mus-

lims were inferior to the European race and could be used as subjects without human identity and as raw material to build the new Empires. Many centuries past, if there was a global organization like UNO, it would not have dared to call the European intruders as terrorists because it would have been their own organization as Muslims lived in slavery and denial of basic human rights and identity. In an information age, knowledge-driven global culture of reason, ignorance is no longer a requisite to learn from living history.

British author and producer **Adam Curtis("The Power of Nightmares: The Rise of the Politics of Fear"**: BBC documentary challenging the American version of the "War on Terrorism"), spells out the myth with clarity: "international terrorism is a fantasy that has been exaggerated and distorted by politicians. It is a dark illusion that has spread unquestioned through governments around the world, the security services and the international media."

Ron Suskand - a White House insider (**The One Percent Doctrine: Deep Inside America's Pursuit of its Enemies Since 9/11, 2007**), shares intriguing and fact-digging perspectives how George W. Bush acted like an egomaniac and sadistic president and his

immediate colleagues looking for excuses to re-enact the crusade against the Muslim World. Many Arab and Muslim rulers were willing partners and complacent in this project to safeguard their powerhouses and to ensure continuity of the Neo-colonial governance. America lives in continued insecurity maintained by the corporate world and instigated by the former Bush administration.

Paul Craig Roberts ("**9/11 After A Decade: Have We Learned Anything?**"Global Research: 8/24/2011) shares the prevalent perspective:

> **Today Americans are unsafe, not because of terrorists and domestic extremists, but because they have lost their civil liberties and have no protection from unaccountable government power. One would think that how this came about would be worthy of public debate and congressional hearings.**

In a peak oil stage, the prosperity oil bubble is fast diminishing and the illusion of borrowed happiness and good time is already in ruins. Human development was neglected and economic men and women could not generate the Darwinian scenario of change and development. All of the Arab Middle

East more so the oil exporting nations consist of the client states managed by puppets rulers, handpicked by the ex-European colonial masters and transferred onward to the US political hegemony. The trade-off was kept under check by the subsequent US administrations to launch economic development programs and make the Arab societies believe that they are progressive and will have new prosperous "imaginative communities" carved out of the dry and non-productive and ruined deserts by time and history. The real game was to ensure continued supplies of cheap oil to the Western military-industrialized complexes and in return militarization of the Arab Middle East under the aegis of fraudulent illusion of economic development and prosperity. The strategy was that one war will destroy the economic infrastructures and another follow-up planned scheme will rebuild them to be destroyed again by another emerging conflict. For over a decade, the unending and bogus War on Terrorism continues throughout the Arab world onward to Pakistan. Daily bloodbaths and torture of the people paint a picture of the Arabs as if living in the draconian age without any recourse to civilization, reason and Islamic system of governance. Was the discovery of oil a conspiracy ("Fitna") to dehumanize the Arabs and Muslim people and to destroy their sense of originality, culture and values? But in Egypt

and some parts of the Middle East, people are getting organized and rising to the political atrocities which have been imposed on them by the sadistic rulers. It is obvious that the Arab world of today will not be the same for tomorrow. In Egypt, out of a terrible sense of helplessness, people have emerged with political imagination, courage and strength to challenge the authoritarian rulers on solid grounds and reasoning and attract global support and appreciation for their cause of peace and freedom from oppression.

There are more daunting challenges and opportunities ahead for concerned Arab-Muslim scholars and thinkers to grasp the momentum and try to sort out feasible remedies and workable solutions. The role and tasks of the people dealing with change and management of development is painfully challenging and progressive over a certain period of time. The societal problems are complex and there is no single pill to diagnose cancerous sickness. Professor Fouad Ajami (Arab Predicament) said it right: "the problems of the Arab world are the result of self-inflicted wounds." If the one track rulers were open to listening and learning (vital traits of effective modern leadership), the current catastrophic wars against the Arab people - firing on demonstrators in streets, funeral processions and worshipers in Mas-

jids, killings of innocent citizens and destruction of the social environment and political horrors could have been avoided. From Syria onward to many Arab lands, people are the victims of cruelty and planned brutality against mankind.

The common Arab folks are cultured and civilized people with immense tolerance for diversity as the European and now American have capitalized their life, markets and governance. Historically, Arabs were leaders in progressive culture and development of human civilization, whereas, the West was in its infancy learning from the Arab knowledge, explorations and scientific achievements. They remained the single most contributors of 1000 years of advanced civilization in Al-Andalusia (Spain). When the Arabs left Islam and stopped listening to voices of intellectual reasoning, they fell in disgrace. Money cannot buy the honor and integrity lost because of the modern ignorance and arrogance of the Neo-colonial Arab ruling elite. If the Arab leaders could change and reform themselves and return to their originality of Islamic Thinking and behavior, they are the best people to invite towards goodness and forbid evil. Arabs exponents of peace do speak but are unable to reach the majority of the media controlled humanity. The Arab religious scholars have not played any sig-

nificant role in changing the societal aims and priorities except seeing the light only in mosques, whereas the people live in darkness. Their barricaded Islam is supplemented by matching regular salaries and making it a non-active part of distant history.

The question is how to encourage change and emerging new and challenging opportunities to undo the political and economic chaos and return to normalcy? It requires soul searching and foresight and strong commitment more than bringing a revolution to set the proper strategies and to initiate planned solid actions for the future. Do the Arabs have the proactive visionary leaders and competent people and institutions to deal with change and conflict management?

Some thirty five years earlier while working in the Arab world, this author took initiatives to share new ideas and fore-sights which were envisaged in "Towards Muslim Unity" - "Why Muslims are a Divided People?" and "Approaches to Comparative Strategic Policy Planning: Muslims World and the West" published original in English and Arabic translation in the Muslim World League Journal, Makkah, Saudi Arabia, AlMujtama, Kuwait and other papers/magazines in Egypt and elsewhere. The proactive thoughts

essentially dealt with some of the political issues and tragedies encountering the Arab world today as I could see them coming while working in the Arab world. Strangely, nobody paid attention, not even the people who were supposed to be tracking the global developments affecting the interests of Muslim Ummah. In a nutshell, a reformative system of governance based on legislative body - Ummah Council (Parliament), comprised of the elected/chosen scholars-thinkers and professionals from the Islamic world to devise economic and political priorities for change and reformation of the Neo-colonial governance by keeping intact the existing infrastructures and figureheads, encouraging and enlisting participation of new and educated generation to assume the leadership role in policy making, decision making, development of public institutions, banking, common currency, enhanced trades between the Muslim world and the Western nations, interactive relationships with the Western institutions and reassuring the Arab rulers of recognition and respect without revolution, and a gradual phase-out and phase-in process of new governance for the future building - sustainable economic and political life of the Muslim Ummah as One People, One Nation existing in peace and harmony with the rest of the world and of course, without the authoritarian and despotic rulers. Is this

not what is desperately needed in the contemporary Arab world to avoid further bloodshed, innocent killings of people and devastation of the social and economic infrastructures built with oil revenues?

Arab refugees displaced by wars and victims of crimes against humanity

Imagine! what would the history say about the Arab rulers complacent in America's led bogus War on Terrorism - a crusade against Islam and about their leadership role model for the future generations to come? Take a moment and have a cool breathe and think if you can, of the on-going planned massacres and killings of innocent people, political horrors and physical injuries, intellectual and moral insult to Muslim conscience, and deaths and devastation these monsters have caused to the traditional and valued culture of the Arab people - how should the world view the Arab people, societies, Islam and their sense of moral values? Were there no conscien-

tious and intelligent folks, scholars and thinkers to Think of the Navigational Change and challenge the absurdity of anti-Islamic authoritarianism? Was there nothing else other than a handful of sadistic rulers, oil pumping and militarization as the culture and economy of the Arab people? These questions MUST be answered to the demands of history and future generations.

Devoid of knowledge and basic leadership traits, the rulers appear defiant and paranoid to encounter the voices of reason - organized and effective people's revolutionary movements for freedom and new leadership. President Obama dashed away all the optimism for rethinking and rebuilding Anew America - different from the perpetuated insanity of the Bush era, more akin to peace and co-existence with the rest of the global community, in particular, the Arab-Muslim world. It was a political myth that Obama got elected for the first time, not to just govern but workout a new way of thinking for the future of US policy behavior and relationships. Who is going to write the closing chapter of the history of the bogus "War on Terrorism?" Is history going to wait for the cessation of the aggressive hostilities in Iraq and Afghanistan and Pakistan? Would the American-led war achieve its agenda priorities or meet the same

destiny as it happened to the Romans, German Nazis and the USSR Empires? Ostensibly, history will judge the nations and leaders by their actions, not by their claims. In his farewell address President D. Eisenhower (01/17/1961), made the following foresight, political and intellectual priorities known to the people of America:

> "…. Together we must learn how to compose differences, not with arms, but with intellect and decent purpose. Because this need is so sharp and apparent, I confess that I lay down my official responsibilities in this field with a definite sense of disappointment. As one who has witnessed the horror and lingering sadness of war - as one who knows that another war could utterly destroy this civilization which has been so slowly and painfully built over thousands of years..... We pray that peoples of all faiths, all races, all nations, may have their great human needs satisfied, that those who denied the opportunity shall come to enjoy it to the full..... That the scourges of poverty, disease and ignorance will be made to disappear from the earth, and that in the goodness of time, all peoples will come to live together in a peace guaranteed by the binding force of mutual respect and love."

THINK AGAIN! The universe We live-in - photo Thanks to NASA

Chapter 17:
The War on Gaza and How the US and Israel Are Dehumanizing Human Culture

Humanity in pains and agony across Gaza and the West Bank-Palestine

Today's Humanity is a Victim of Powerful Political Cults

The trajectory of daily aerial bombardments, targeted killings of fellow human beings, planned destruction of human habitats, and cries for help by innocent children. Adults go unanswered for more than a year. It is madness, inhumanity, complete breakdown, and impotence of global organizations such as the UNO and its Security Council and complete indifference of global leaders to challenge the animosities perpetuated by Israel. American-supplied weapons are used daily on masses who should be protected by the

so-called civilized world of the 21st century if there is any left intact. The global thinking hubs wondered how to avert the tyranny and oppression to safeguard the innocent people of Gaza.

President Biden and Secretary Blinken claimed to be d-escalating the war in the Middle East and focusing on humanitarian aid desperately needed by the entrapped civilians across Gaza, but they appear preoccupied with sending THAAT and weapons of mass destruction to level Gaza and make it available to Israeli settlers. Their words and actions are self-contradictory, treacherous, and misleading as Israel extends bombardment on Lebanon to crush the will of the civilian population for security and survival. Essentials of human survival are being weaponized. Global humanity must be concerned, about why Israel is stopping food, medicine, and water supplies to the entrapped civilians in the Northern Strip and why it is repeatedly bombing the Al-Aqsa hospital and places of worship across Gaza. PM Netanyahu and his Far-Right extremist coalition live in a political fantasy not representative of the people of Israel. The contradictions covered up adroit formulation but continued to haunt the Israeli masses for peace and belonging to the land of Palestine.

People of Israel Feel the Denied Freedom and Curse of Political Lies

Ari Shavit ("**Israel Takes its Last Breath",** Haraatez, Israel: 10/8/24), clarifies the essence of current affairs: It appears we have passed the point of no return, and it may be that "Israel" can no longer end the occupation, stop colonization, or achieve peace. It seems impossible to reform Zionism, save democracy, and divide the people of this land."

He added: If the situation is as it is, then: There is no reason to live in this country. There is no reason to write in "Haraatez."

There is no reason to read "Haraatez." We must follow what Rogel Alpher suggested two years ago—leave the country… If "Israelism" and Jewishness are

no longer a vital part of one's identity, and if every Israeli citizen holds a foreign passport, not only technically but psychologically, then it's over. We should say goodbye to our friends and move to San Francisco, Berlin, or Paris.

Ari Shavit points out in **Israel Takes It's Last Breath**: "The curse of lies is what haunts the Israelis, and day after day it strikes them in the face in the form of a knife in the hand of a Jerusalemite, Hebronite, or Nabulsi, or with a stone or from a bus driver from Jaffa, Haifa, or Acre. The Israelis realize they have no future in Palestine; this is not a land without a people as they falsely claimed. Another writer acknowledges not just the existence of the Palestinian people but rather their superiority over the Israelis. This is Gideon Levy, the leftist Zionist, who says:

> **It seems that the Palestinians are of a different nature from the rest of humanity… We occupied their land and treated their youth with drugs, prostitution, and depravity. We said that after a few years, they would forget their homeland and land, and then the younger generation would erupt in the 1987 Intifada.**

Aluf Benn, Editor, Haraatez: **Israel's Paradox of Defeat**(Transcend Media: 10/16/24), spells out the fear of common citizens: "But even with the IDF occupying about a third of Gaza's territory, to many Israelis, the current situation feels like defeat. …..This calamitous stasis, coupled with Israel's growing global isolation and increasingly gloomy economic outlook, contributed to a national sense of hopelessness and despair. In fact, paradoxically, important facets of Israeli politics and society have changed surprisingly little since the immediate aftermath of Hamas's attack. Citizens of border communities in the north and the south remain unable to return to their homes. Rather than uniting Jewish Israelis against a common external enemy, Israel's now multi-front fight against its external enemies has only widened preexisting social and political fissures between Netanyahu's opponents and his supporters. Beating the expectations of his foes and his friends alike, Netanyahu continues to act as the center of gravity in Israeli politics. The right-wing coalition that keeps him in power has amped up its quest to crush the Palestinian statehood movement and "replace the Israeli elite," a euphemism for demolishing Israel's democratic and liberal institutions."

The thinking Israelis are fast awakening to question the doctrine of Zionism, acclaimed Jewish superiority over others, and systems of fake democracy. The 21st century age of knowledge and human expectations offers a grim picture of the present and future in waiting. Israeli citizenry protesting and self-centered and heavily relies on Israeli extremist policies and practices to undermine their future. Once in power, is Netanyahu irrelevant, problematic, and paranoid to see the people's interests? Biden and Netanyahu both appear to have lost sense of reality and awareness and most importantly, consciousness of the self and the political environment around them. They have become psychopaths who waffle with time and tides of political mismanagement, and wars on mankind, and destroy cultures and civilizations to overrun those who challenge their obsessed ignorance and viciousness.

Living time and encompassing realities demanding a navigational change are ignored in political statements, policies, and actions. Aggressive cults are working across America and Israel mysteriously as if Joe Biden, Blinken, and Netanyahu would have an infinite lifespan. They breathe oxygen in a self-generated conflict zone without any accountability. The cults used them for their vested interests. Every ego-

istic leader is an enemy of the self and mankind. Throughout history, men of power and influence have committed horrible crimes against the humanity of which they are an essential part. Why? The answer lies in their individualistic absolutism and mindset. Is it part of human nature that man should be cruel to man? We, the People are at a RISK of Extinction. Global warriors are the elite class born to rule – the men of the king, who are most often hated and feared and always dream of glory and triumph to achieve at a cost of ruthlessness, triviality, and success leading to degeneration and viciousness across human societies. They are influential in defying accountability for their crimes. against the war and calling for an immediate ceasefire, return of hostages, and peace wants PM Netanyahu to resign alleging he is inept, greedy,

We, the People, and Earth Sustains Life and Humanity and Our Enemies Destroy It

The Earth was a Divine "**trust**" to mankind for its existence, survival, and progress. We, the people of the Earth, are standing and moving faster than the speed of sound. It could be hard to imagine or believe it. But you were standing on solid ground, and not in the cockpit of a supersonic jet. At any given

moment, we are all moving at a speed of about 1,674 kilometers an hour, thanks to the Earth's rotation and thanks to the Creator of the Earth. We live on Earth created by God for Man and Humanity and all other living beings: In **Chapter 23: verse 72**, The Quran makes a vivid revelation:

"**We did indeed offer the Trust to the Heavens and the Earth. And the Mountains but they refused to undertake it, being afraid thereof: But man undertook it; He was indeed unjust and foolish."**

Western cultures are neglectful of the memory of God and lack a rational understanding of the imperatives of living on Earth and how it sustains life and humanity and all that could be imagined. Does reason operate the functionalities of the Earth or is it the Command of God to ensure miraculous operations for billions of years? Is it unreasonable to believe in the Divine Revelations and be the People of REASON? Earth's average orbital speed is about 30 kilometers per second. In other units, that's about 19 miles per second, or 67,000 miles per hour, or 110,000 kilometers per hour (110 million meters per hour). The earth rotates once every 23 hours, 56 minutes, and 4.09053 seconds, called the sidereal period, and its circumference is roughly 40,075 kilometers.

Thus, the surface of the earth at the equator moves at a speed of 460 meters per second–or roughly 1,000 miles per hour. Across the varied spectrum of human thoughts hardly any thinking people reflect upon the existing and continuously balanced environmental gases that sustain the living creatures on Earth. Our environment contains 78% nitrogen, 21% oxygen, 0.97% argon, and carbon dioxide 0.04% and the air safeguards the atmosphere and life on earth by absorbing ultraviolet solar radiation and reducing the temperature extremes in constant and systematic changing of days and nights.

The US and Israel could be Charged by the ICJ-ICC for Crimes against Humanity and Genocide

Wars kill people and destroy human habitats. Yet, the paranoid and most hated maniacs put up a show of war celebrations – a success achieved by strangulating humanity – the cost of ruthlessness, human degeneration, and lack of imagination. To glance ahead it seems that the Western world failed to see a dreadful tragic history in the making of the end of time and the loss of ingenuity to understand the consequences of the naive egoism of Israeli leadership making war an instrument of territorial expan-

sion and conquest across Palestine, Lebanon, and the larger Arab Middle East. If Lebanon had responsible public institutions and leadership they should have formed a legitimate government to encounter the Israeli onslaught. Not so, they appear to their enemies working against the interest of the people just like the Arab-Muslim leaders lacking a sense of honesty and capacity, unable to challenge the US-Israel war against the helpless masses of Gaza. The Israeli leaders prophesize "greater Israel" and the US hegemony over the oil-exporting Arab states. The Arab-Muslim leaders could well be described as a scum floating on a torrent. If Israel is not stopped, soon the leading oil-exporting Arab states could fly Israeli-American flags for a change. Please see "**How Arab Leaders Betray Islam and Defy the Logic of Political Change, Peace and Security**."

The UNO, its Security Council, and the EU shamefully became dubious and void in the 21st-century global norms of civility, human rights, freedom, justice, and the safety of civilians. The UNSC resolutions for ceasefire and peace turned out to be a joke to mankind's hopes as Israel refused to honor them. The US and Israeli leaders are not conscious of their own end game and could be charged and prosecuted for crimes against humanity and genocide. PM Net-

anyahu and his extremist regime would see Gaza and the occupied West Bank more like an experimental lab for that end game. Animals live and do not reflect on the imperatives of life whereas, we, human beings cannot act like animals as we are supposed to be intelligent and responsible species on this Earth. At the edge of reason, the notion of evil leads to the realization of evil and the tyranny of war must be stopped by all means and those responsible for the genocide and crimes against humanity must be held accountable to restore the manifestation of a sustainable human future.

NATO-led wars against Arab people

Chapter 18:
Strange Celebrations: How the US-European Celebrate the Strange D-Day Mocking the Reasoned History?

In the 17th Chapter of the Bible - Saint Luke: it is written:

The Kingdom of God is within man Not one man, nor a group of men, but in all men; in you, the people.

The Quran, the Divine Revelations makes the point:

Your Lord is One ... .You are a community of nations (Ummah)…. killing one person unjustifiably is equal to killing of whole of mankind.

D-Day European Events Exclude Russia and other Nations

People of knowledge, thinkers and morally conscientious intellectuals look at history as an embodiment of collective reasoning preserved for learning, change and future-making. Not so, leaders of many advanced Western industrialized nations, unlike historians, implant their own version of conventional politics to distort the record of history. The metaphor of deceit and concealment of facts appeared clear at many events recently. Those making the media headlines were not the actual participants of the 2ndWW-D-Day but political commentators after the facts of history. There were many reputable leaders and nations excluded from the momentous events of the D-Day in the UK and France. Those who planned the events excluded Russia and its leadership from participation. No rationale is given to deny history its rightful place. Russia (former USSR), was an equal partner with the US-European in fighting against the Nazism and Fascism on several global fronts. The United States, Britain, France could not have defeated the Nazi Germany and Italian Fascism without the help of the then USSR. There were more than two million Arab-Muslim colonized participants fighting against Germany and Fascist Italy. Someone in the

planning committee must have strangled the facts and truth of the 2nd World War engagements and outcomes. But Why?

We, the People, of the 21st century humanity view history with a critical inborn eye to be certain that we are rational and responsible towards the futuristic generations for our assessment and standing in history-making or history revelations. In spite of all being in the realm of thoughts and facts, there was a deliberate detachment from the presentation of the historic facts. Political truth must be opened to ensure intellectual integrity and fairness. The contradiction covered up by the political presenters but it lives on without any change within the public consciousness. None of the Western leaders seem to have learned any tangible lessons from the dreadful events, planned killings and destruction of the environment caused by the 2nd WW. There is no real verifiable account of the deaths and destruction but many historians estimate somewhere between 40-60 millions innocent people perished during the 2nd WW. Have the Western leaders stopped that insanity after the end of 2nd WW- D-day? Did any of the participating leaders share a futuristic vision of peace, harmony and unthinking of the war syndrome? The Nazi and Fascist cult of aggressive wars continue to

this day. Did the US, Britain, France and others under NATO go to Afghanistan, Iraq, Libya and Syria for peacemaking? If so, who killed the 3 millions Iraqi civilians, one million or so Afghani and several millions in Syria and madness goes on and …on. How come these planned massacres were not part of the record of human killings? They all used dogma of force and carpet bombing to deal with situations of diversity and opportunities of peace-making. If knowledge-based imagination and strategies and wisdom were employed, it should have led to critical thinking before hasty and inhuman actions against the poor and vulnerable nations, and not to malignity and tyranny of continuous wars and bloodshed. We are living in a conflicting time zone of political democracy lacking reasoned politics and dialogue for human understanding to co-exist in peace and harmony. Most leaders are self-centered politicians, not people of reason and enlightenment to view the facts of human history.

Since the Sochi Olympics in Russia, there is a planned indifference towards Russia as a reliable partner in global affairs. The G8 no longer includes Russia. Strangely enough, despite the ideological contrasts, Stalin actively joined Harry Truman and Churchill to defeat Nazi Germany. What is the crite-

rion now to oppose Russian participation in global peace-making? Russia is moving forward as a progressive nation opening up its institutions and secret corridors of power. The Russian elite speak critically on many issues and political activities/elections are geared for a sustainable future-making. President Putin is a nationalist but also a global leader of vision and change for a people-oriented systematic process of democracy. None of the European or Western democracies evolved overnight paradoxically. Russia is growing and making formidable changes in thoughts and political culture. Today Ivan Gulnov (investigative journalist) was freed from fake drug charges. To encourage Russia for dialogue and participation would lead to global peace and enhanced political understanding for conflict resolution.

We, the People and the 2nd World War- A Human Catastrophe, Not a Celebration

The British, French, American and German leaders spoke at the D-Day events in the UK, not at Omaha Beach. None of them ever had first-hand knowledge and experience on a war front. Magnifying philosophical principles of vice and falsehood never change the human character conveying a message of superficial imagery or fictitious appearance of peace, liberty and

justice. Realizing the ferocity and horrors of war to a common human mind, one cannot be comfortable at these celebrations. Soldiers and civilians who were crushed to death were not just machines or numbers but living human beings. Wars kill people. Killings cannot be celebrated by rational beings. Martin Kettle ("**Britain must not turn its back on the world made possible by D-day" The Guardian: 6/05/2019),** observes the inherent discard**:** The uneasy relationship between Wednesday's major Portsmouth and those that will take place on Thursday in France illustrates Britain's change of stance. In recent decades, Normandy has overwhelmingly been the main place to commemorate D-day…... But it is also as though Britain is choosing to reassert a closed-off version of its own national wartime myth alongside – and even in opposition to – the previously more established international one…. Now, though, we have reached a sharp turn in the narrative. Donald Trump's isolationism and indifference to international institutions such as the EU and NATO mean these will be the most uneasy D-day commemorations for years. And so they ought to be. For Trump represents a defiance of the internationalism and shared interests that marked D-day itself, as well as most of the commemorations over the years. Faced with a president who doesn't care whether he offends others, it is hard for the collective D-day song to remain the same.

The 2nd World War ended in catastrophic consequences for mankind throughout the globe. Its ripple effects continue to haunt the inhuman memories compelled by the powerful nations that subjected humanity in unwarranted battlefields. While transformational leadership was the essence of time and urgent need of the aftermath survival across Europe and elsewhere, those occupying the top elite positions were mostly men of the past - men of king lacking imagination of the future and phenomenon of change and adaptability to global political affairs. All of the major international institutions evolved were led by the similarly indoctrinated ideas and ideology of the past that were initially part of the war-making strategies. Those hated and feared are seen as problematic in many domains of international institutional work culture.

Global Waking Consciousness - We, the People to Challenge the Global Governance of the Few Extremists

Rational arguments lead to a reasoned platform of moral and intellectual convergence and understanding - how to cope with the challenges of the 21st century issues of war, peace and human survival.

Karl Hillenbrand("German Thought, From The Seven Years' War To Goethe's Death": Six Lectures (1880) p. 207), a 19th century German philosopher and author said it right:

"**Men will not understand … that when they fulfill their duties to men, they fulfill thereby God's commandments; that they are consequently always in the service of God, as long as their actions are moral, and that it is absolutely impossible to serve God otherwise."**

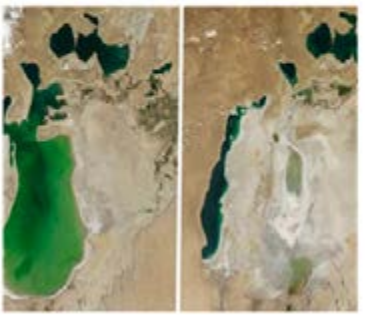
Inadvertent aerial bombings and sectarian rifts causing daily bloodbaths do not appear to change the warmongers. Unpredictable but paranoid and vengeful political monsters have incapacitated the in-born faculties of American lifelines to be a morally and intellectually crippled and more of a redundant nation in global affairs. This was not accidental but a planned scheme of things although unknown in its short-long terms consequences over its ability to cope with the change phenomenon for a sustainable future. America became insane – a victim of its own obsession with power and fearful of its own future. The planet Earth is not created or built by the imperialist Nation States. The comprehensive system of splendid and encompassed Universe and its

resources on the planet Earth are a God-given gift to mankind, and its violation and exploitation will be checked by God as it happened to many powerful nations in the past only to be found as artifacts in museums and history books. History offers a learning role but nations and people denying the role of history ultimately cannot escape the wrath of history. Winning the wars was not part of the American aims and strategies but killing and destabilizing the poor nations was, and it has achieved that aim. All actions have reactions. The consequences are yet to come. Aggressive thinking is propagated, the echo of peace is silenced. Global peace and security require Men of New Ideas, new Thinking and New Visions.

As responsible thinkers and scholars, we must not play with the facts of history and a sustainable future-making for One Humanity. A system of political governance must be the embodiment of truth, and a rational history based on facts of human life. Facts in a mathematical order follow one another just like truth follows one another. The facts of history are interwoven with the present and future and nobody should dare to mock the living history.

Climate Change- global warming

- Before-and-After Photos of Our Changing Environment
- See just how much glaciers, lakes, and snowpacks have been altered by nature and humans.



Chapter 19:
Global Thinking and Rethinking: Emerging Rational Models to Combat Human Ignorance and Arrogance in Global Peace, Conflict Resolution and Sustainable Future

"Strange times are these in which we live when old and young are taught in falsehoods school. And the one man that dares to tell the truth is called at once a lunatic and fool." - Plato

a t In a time of universal deceit, telling the truth is a revolutionary act." - George Orwell

To think and rethink about the challenging global affairs while living in a 21st century age of knowledge, wisdom and innovation, we continued to experience the dark illusion of human ignorance, arrogance embedded in mutual exploitation to move forward,

systematic manipulation by the corporate entities of natural resources, global warming and climate change as a time bomb but we find no workable alternatives and solutions to comfort the global community of imminent coming of a catastrophic future. When human cultures and civilizations exist in darkness, they lose sense of direction and appear to be in conflict within their own thinking spectrum and the external environment as if human intellect and conventional wisdom has further gone astray from the 21ts century advanced human societies. Are we at the point of No Return in our quest for change and reformation or new imagination for a sustainable future?

Once late Robert Fisk, the reputable British journalist of the Independent noted: **"The only lesson we learn from history is that we do not learn from history."** Since time immemorial, history substantiates the phenomenon of "learning society" occurring and reoccurring regardless of time and place factors. Human mind adopts to change as a natural process affecting the life. Change aims at assessing the facts of human affairs to envisage human development for progress and continuous acceleration of thoughts and ideals to move beyond the obvious.

A focused mind is the most powerful intellectual pursuit to achieve the goals. It is important to acknowledge the imperatives of a focused mind for change and progress in conducting peace and conflict management which may be described as follows:

- **Learning Mind: Intelligent people are always open to listening and learning**
- **Organized Mind: Capable of knowledge-based personal strength, skills and interactive abilities**
- **Disciplined Mind: Capable to manage diverse interests and to respond constructively to varied opinions and constructs in a given situation**
- **Innovative Mind: Capable to imagine workable alternatives and new ideas to deal with complex and unusual emergency conflict situations**
- **Global Mind: Capable to share enriched knowledge, understanding and appreciation of the interests and aspirations of global mankind for change, peace and security**
- **Balanced Mind: Capable to behave and act in a balanced emotional-intellectual manner in situations of high degree of confusion and conflicts challenging the basic norms of human thinking, moral-spiritual values and rational behavior**

Meeting of Minds: At the 2016 Paris Conference on Climate Change - Worst global polluters – USA and China prefer dialogue over confrontation and disagreement Global Warming is a 21st century time bomb to be tackled by all the states.

At the epic center of 21st century challenging global political affairs, most Western democratically elected leaders lack practical experiences of leadership in war and peace. They win election campaigns entirely on highly commercialized strategic planning carried out by the corporate-run news media and financial-

ly affluent agents from many of the top most business enterprises, banks and corporations. A fictional leadership profile is crystallized and fantasized for public consumption time and again before and during the political election campaigns. Often agents are hired from different walks of specialty to propel the image-making of a leader or a party what otherwise could not be done in a rational context across the mainstream. Power and people live in different and conflicting time zones without any logical convergence except to cast votes for the candidates under superficial and dramatized affairs of media imagery and future prospects. The ironies of time and place spell out clearly that these so called elected leaders rely heavily on hired advisors to manage the affairs of the society. Devoid of knowledge-based moral, intellectual and political leadership vision, when they encounter the Reality, they flunk in dealing with the real world affairs of people-oriented democratic governance. They hold imagination and fantasy derived from the movies and video games lacking real world experience in human affairs, global peacemaking and security and conflict management. You will not find any elected leaders ever admitting being a failure or irrelevant to the societal norms and aspirations for change and adaptability to the future. We are not looking at the rebirth of human thinking but

more at discovery of rethinking and critical thinking as a rational being which has been part of the Human Nature throughout human history.

Our Model of Global Thinking and Rethinking is based on a rational assumption taken from the study of current complex global affairs to help understand and evolve a new approach for a **Sustainable Future**, unthinkable by the present cadre of scholars and thinkers across international spectrum. Most Western nations and leaders produced the weapons of mass destruction are the leading ex-

porters of weapons to the war torn sites in the Arab Middle East and elsewhere. While the global mankind values peace and security, only few scholars and experts can imagine how to analyze their principal interests in view of the lost wars on terrorism, formative history, degeneration of the wear victims, political mismanagement, arrogance and refusal to learn from the history, and irreplaceable loss to the human intelligence and natural environment that assists and maintains all forms of life. There is no connection between a knowledge-based moral –intellectual vision of the future and the contemporary global leadership hegemonic control and determination of the global priorities for peace and security of the world. While fear of the unknown and political arrogance set the global agenda for policy-making and strategic actions, we foresee a recurrence of global encouragement by the informed humanity to find new and alternative methods for conflict prevention, conflict resolution and global peacemaking among the competing nations. The presence of logical new ideas and concerted endeavors for flexible global rethinking to cope with and adaptability could usher a new threshold of vistas for the disdained 21st century mankind.

A Rethinking approach to the making of a viable future must encompass the following:

- A proactive vision of global mankind and passion for success
- Knowledge-based comprehension of the origin of human life and its ultimate purpose
- Relationship to the Nature of Things - Man and the Universe
- Balanced relationship to material and spiritual spectrum of human composition
- Sensitivities to strength and weakness of human character and aspiration for change and progress
- Listening and learning of facts when facts of human affairs warrant a change or a navigational change
- Able to manage diverse interest and aspirations of the people
- To encourage men of ideas for inputs and change
- Equipped with knowledge and capacity to foster change and adaptability to the future
- Leadership Flexibility to Change and adaptability: the continuous functional monitoring and the need for change and adaptability to the challenges of the future. This flexibility must be built-in all the planned systems of institutions and governance and stipulations to ensure continuity of the systematic operations and uninterrupted accord in any change process that could affect the future adaptability.

Meeting of Minds: Variables toward reaching consensus in situations of societal conflicts, disagreement and lacking understanding of the facts of human life

Requisites of Visionary Leadership Role Model

- Visionary Leadership- hold vision of tomorrow- a picture –an imagination of tomorrow
- Proactive imagination
- They would not wait for events to happen but took steps to make positive things happen
- Interpersonal and group behavior skill: being sensitive to persona strength, weaknesses and biases of people around them
- Very knowledgeable to utilize people in the

best manner- not agreeing or disagreeing- just knowing- fully informed

- Skilled and competent to manage diverse interest.

Leadership and Problem -Solving

- Problem Solving.
- Leaders had broad-based information sources with concerns for facts and not for feelings.
- Open minded to all kind of rational sources.
- Able to listen to ideas from all sources and would change their views if the facts warranted a change or a navigational change.
- Change and adaptability to the future-making.
- Informed, skilled and confident to meet all kind of usual and unusual emergency situations in a crisis and / or conflict management.
- Effective communicators.
- Leaders lead and are never a pawn on crisis management chessboard.

Global Leadership and the Changing and Challenging World Affairs

The phenomenon of **CHANGE** is affecting all aspects of the 21st century human affairs. Knowledge-based new and creative thinking, advanced communication networks between varied societies and nations, innovations in technology and advancements, political elections, new ways of doing business, emerging markets, globalization, and more are increasing the need for leaders to deal with change directly. Change within organizations is difficult enough without the added dimension of a global context.

Issues such as culture, history, nationalism, law and order, language and geographical context are just a few of the many obstacles that can be faced by leaders when attempting to affect change globally. Examining the cultural and contextual factors involved in global leadership will allow for a deeper understanding of both the similarities and differences that exist between global and domestic change.

Critical Issues in Peace, Security and Conflict Management

◆ Global communications and awareness of issues- internet, twitter and cell phones and more

◆ How to produce "learning men" to evolve progressively "learning societies" for peace and conflict management

◆ Leadership to have global vision of human unity, peace and security

◆ Unprecedented urbanization of the last decade, urban fragility has emerged as a central challenge in global security and development. Like the fragile state, fragile cities suffer from rising instability, poverty, and violence and lack the capacities needed to face the magnitude of these challenges.

◆ Global Warming, depleting ozone layer and climate change

◆ Globalization and its economic and political impacts on the developing world - politics of issues unresolved

Proactive Leadership Effectiveness

◆ Effectiveness, time management and action-oriented productivity in global organizations

◆ Flexibility: measured by competitive influence and deficiencies

•

◆ Adaptability to Change: bureaucracy, linkage with academic –cultural-public institutions, knowledge integration, harmonization of individual and public interests, purpose and innovation

◆ Idea Men: to welcome concerns/opinions. Consensus by other sources out of the box, be it the specialists or common concerns

◆ Effective leaders are always people-oriented enriched with positive and realistic self-perceptions and inherent knowledge-based abilities to demonstrate with people of diversity, issues and understanding of PURPOSE and relationship in the 21st century

The Imperatives of Global Teamwork Thinking and Actions

- **Foreign Policy** ("A World Disrupted: The global Thinkers of 2014") **pinpoints that** "something big requires a team rather than an individual…."
- "The global thinkers herald causes often wrongly considered inconsequential or verboten. They support forgotten victims of sexual violence, protect civilian targeted in internecine violence, count casualties in the fog of war, and demand legal protection for world's most vulnerable migrants. Often these men and women, scholars, activists and religious leader among them- do this work on their own peril and pay the price landing in court or in prison in some of the world's most repressive countries. For all of them, however, the risk is worth the possible rewards."

Where Do Democratization and Globalization Meet?

- What political transformations are necessary to enable the fulfillment of the democratic principle in an age of deepening interdependence?
- **Globalization and Masses:** to have collaborative nations working in harmonized culture of thinking and new thinking for a sustainable future

Thanks to the UNO Gallery

Flags at the UNO Headquarters

Global Status-quo is Not the Aim of Humanity for Peace and Security

International customs, laws, ethics, regimes, and institutions can nurture and protect — or deny and destroy — the values of human dignity. In short, they may or may not be or become effective allies in the strategic building of peace. Currently the educated and attentive public of the world focus insufficiently on how our global system is evolving, what shape we want it to take, and what systemic changes may be possible. Surprisingly, our governments do very little planning to shape a more cooperative world system that could be more peaceful and just. This omission seems scandalous when we recognize that there is only **one world system** and that we all live in it, whether we like it or not.

Peace and Conflict Management

Crises and societal conflicts in various forms, create highly complex and challenging negotiation/mediation situations for diplomats, UNSC, and government officials; presenting new challenges and fresh opportunities for participation in decision-making processes. Effective performance in international negotiations during a crisis requires a broad and self-as-

sured understanding of a number of policies and their interconnections, as well as both an awareness of the forums and contexts of multilateral diplomacy and an ability to employ sophisticated negotiation techniques. This knowledge and these proficiencies are essential for officials working in the UNO and foreign ministries and the sections of other departments concerned with international peace and conflict resolution.

Meeting of Minds or Challenges for Global Peace and Security?

Thanks to the UNO Gallery

Contemporary Issues in Global Crisis Mismanagement

- Poverty, famine and deprivation of masses to participate in a people-oriented system of governance
- Democracy of the 1 % elite class and rejection of the 99% working people
- USA, Russia, Britain, France, China and Germany- the major suppliers of weapons to the war zones in the Middle East.
- Global military interventions and the bogus wars on "terrorism."
- Failure of the UNO and global leadership to resolve the Syrian and Iraq wars
- Complacency of the superpowers and military interventions in Iraq, Afghanistan and Syria and Libya
- Evolution of the Islamic State (IS) and foreign powers engagements
- Continuous bombing and destruction of the habitats in the Arab world
- Humanitarian migration to Western Europe and the Refugee Crisis
- Iran's nuclear advancement and Western fears
- Social unrest, poverty and civilian displacement of people
- Technological advancements and impacts on war and peace

Leadership Model for Agenda - Setting in Peace and Security

Global Leadership Tightrope Walk and Challenges for Peace, Security and Future-Making

- Leadership Ego, vision, self-discipline, characteristics to inspire others
- Understanding the big picture of tomorrow – the good of public and mankind

- Planned goals to achieve and deliver success to the masses
- Message of hope and promise for sustainable Change, Peace and Conflict Resolution
- To imagine endless challenges and endless learning for the future
- Effective leaders are leaders of Change and Teamwork strategy
- To manage and control situations of unusual emergencies, crises and societal upheavals
- A focused mind is more powerful than any other weapons
- Collaborative leadership is effective leadership
- Rationality and dichotomy of tightrope leadership walk and crisis management
- Risk taking and adventurist spirit to normalize the challenge and its impact on human thinking and behavior under extreme stress and challenges
- Being optimistic to reach the end with safety and self-balanced maneuver
- Reasoned intellectual construction of the self and public imagination witnessing the scene
- Learning through experience as life is a continuous process of human emancipation
- Leadership Ego, vision, self-discipline, characteristics to inspire others
- Understanding the big picture of tomorrow – the good of public and mankind

- Planned goals to achieve and deliver success to the masses
- Message of hope and promise for sustainable Change, Peace and Conflict Resolution
- To imagine endless challenges and endless learning for the future
- Effective leaders are leaders of Change and Teamwork strategy
- To manage and control situations of unusual emergencies, crises and societal upheavals
- A focused mind is more powerful than any other weapon
- Collaborative leadership is effective leadership
- Rationality and dichotomy of tightrope leadership walk and crisis management
- Risk taking and adventurist spirit to normalize the challenge and its impact on human thinking and behavior under extreme stress and challenges
- Being optimistic to reach the end with safety and self-balanced maneuver
- Reasoned intellectual construction of the self and public imagination witnessing the scene
- Learning through experience as life is a continuous process of human emancipation

How to THINK Globally?
Global Warming is a Critical Problem Facing the Whole of Mankind

- The planet is warming, from North Pole to South Pole, and everywhere in between. Globally, the mercury is already up more than 1 degree Fahrenheit (0.8 degree Celsius), and even more in sensitive Polar Regions. And the effects of rising temperatures aren't waiting for some far-flung future. They're happening right now. Signs are appearing all over, and some of them are surprising. The heat is not only melting glaciers and sea ice, it's also shifting precipitation patterns and setting animals on the move.
- Some impacts from increasing temperatures are already happening.
- Ice is melting worldwide, especially at the Earth's poles. This includes mountain glaciers, ice sheets covering West Antarctica and Greenland, and Arctic sea ice.
- Researcher Bill Fraser has tracked the decline of the Adélie penguins on Antarctica, where their numbers have fallen from 32,000 breeding pairs to 11,000 in 30 years.
- Sea level rise became faster over the last century.

- Some butterflies, foxes, and alpine plants have moved farther north or to higher, cooler areas.
- Precipitation (rain and snowfall) has increased across the globe, on average.
- Spruce bark beetles have boomed in Alaska thanks to 20 years of warm

Thinking Minds and Souls for the Future of Global Humanity:

Late Professor Howard Zinn explained:

> "And if we do act, in however small a way, we don't have to wait for some grand utopian future. The future is an infinite succession of presents, and to live now as we think human beings should live, in defiance of all that is bad around us, is itself a marvelous victory."

Plato noted: "strange times are these in which we live when old and young are taught in falsehoods school. And the one man that dares to tell the truth is called at once a lunatic and fool."

Dr. Martin Luther King, Jr. extracts- Nobel Prize, "the quest for peace and justice", December 11, 1964, shared the following visionary statements:

"There is a sort of poverty of the spirit which stands in glaring contrast to our scientific and technological abundance. The richer we have become materially, the poorer we have become morally and spiritually. We have learned to fly the air like birds and swim the sea like fish, but we have not learned the simple art of living together as brothers."

"So man's proneness to engage in war is still a fact. But wisdom born of experience should tell us that war is obsolete. There may have been a time when war served as a negative good by preventing the spread and growth of an evil force, but the destructive power of modern weapons eliminated even the possibility that war may serve as a negative good. If we assume that life is worth living and that man has a right to survive, then we must find an alternative to war. In a day when vehicles hurtle through outer space and guided ballistic missiles carve highways of death through the stratosphere, no nation can claim victory in war. A so-called limited war will leave little more than a calamitous legacy of human suffering, political turmoil, and spiritual disillusionment. A world war - God forbid! - will leave only smoldering ashes as a mute testimony of a human race whose folly led inexorably to ultimate death. So if modern man continues to flirt unhesitatingly with war, he will

transform his earthly habitat into an inferno such as even the mind of Dante could not imagine."

"So we must fix our vision not merely on the negative expulsion of war, but upon the positive affirmation of peace. We must see that peace represents a sweeter music, a cosmic melody that is far superior to the discords of war. Somehow we must transform the dynamics of the world power struggle from the negative nuclear arms race which no one can win to a positive contest to harness man's creative genius for the purpose of making peace and prosperity a reality for all of the nations of the world. In short, we must shift the arms race into a "peace race". If we have the will and determination to mount such a peace offensive, we will unlock hitherto tightly sealed doors of hope and transform our imminent cosmic elegy into a psalm of creative fulfillment."

William Shakespeare(Julius Caesar), explained logically how leaders manipulate the citizenry:

"**Beware the leader who bangs the drums of war to whip the citizenry into patriotic fervor, for patriotism is indeed a double-edged sword. It both emboldens the blood, just as it narrows the mind. And when the drums of war are reached a fever**

pitch and the blood boils with hate and the mind has 'closed', the leader will have no need in seizing the rights of the citizenry. Rather, the citizenry, infuse with fear and blinded by patriotism, will offer up all their rights unto leader and gladly so. How do I know? For this is what I have done.

AND I AM CAESAR."
